List of Figures	i
List of Tables	v
List of Abbreviations	vii
Symbols used	ix
Abstract	xi
CHAPTER 1	1
1.1 Background of the 45S5 bioglass and its machinability aspects	1
1.1 Motivation for the present work	4
1.2 Research objectives	6
1.3 Approach taken to meet the objectives	6
1.4 Scope of the thesis	7
1.5 Thesis outline	7
CHAPTER 2	11
2.1 Bioceramics	11
2.2 Machining methods for advanced ceramics	13
2.3 Ductile regime machining (DRM)	14
2.4 Scratch & indentation test of brittle materials	16
2.5 Elevated temperature machining of hard and brittle materials	18
2.6 Application of acoustic emission sensor to machining or scratch process ..	21
2.7 Research gaps	23

CHAPTER 3.....	25
3.1 Material and sample casted.....	25
3.2 Sample preparation for study of traction forces at elevated temperature	27
3.3 Sample preparation for study the effect of temperature on brittle-ductile transition.....	28
3.4 The portable heating setup	29
3.5 Modification to the portable heating setup	39
3.6 The experimental setup for the study of traction forces at elevated temperatures during micro scratch tests on 45S5 bio-glass	43
3.7 Experimental setup for effect of temperature on brittle-ductile transition and critical depth of cut for 45S5 bioglass.....	44
3.8 Experimental setup for study of acoustic emission (AE) output During elevated temperature scratch test on 45S5 bioglass	46
3.9 Summary	48
CHAPTER 4.....	49
4.1 Introduction.....	49
4.2 Determination of heating characteristics (first setup).....	49
4.3 Heating characteristics of the upgraded heating setup.....	56
4.4 Thermal conductivity measurement.....	57
4.5 Summary	60
CHAPTER 5.....	63
5.1 Operating parameters	63

5.2	Experimental procedure.....	64
5.3	Results and discussion.....	66
5.4	Summary.....	68
	CHAPTER 6.....	71
6.1	Operating parameters.....	71
6.2	Experimental procedure.....	72
6.3	Results and discussion.....	75
6.4	Summary.....	84
	CHAPTER 7.....	87
7.1	Operating parameters.....	87
7.2	Experimental procedure.....	87
7.3	Results and discussion.....	88
7.4	Summary.....	100
	CHAPTER 8.....	103
8.1	Work conducted in this research	103
8.2	Conclusions	104
8.3	Suggestions for future work	106
	Annexure- I: CAD Drawings of parts for Portable Heating Setup.....	109
	Annexure- II: Thermal image processing of the portable heating setup.....	115
	Annexure- III: Wavelet analysis for APK signal for haar wavelet analysis with 5 level decomposition and the statistical analysis of APK signal at 5th level of decomposition.	127

Annexure- IV: Detailed report of stress analysis on heat plate127145
