

Table of contents

List of figures	xxv
List of tables	xxxiii
Nomenclature	xxxiv
1 Introduction	1
1.1 Overview of the Sun	2
1.1.1 The Solar Interior	3
1.1.2 The Solar Atmosphere	5
1.1.3 Solar Dynamo and Activity Cycle	7
1.2 Sun-Like Stars	11
1.2.1 Stellar Dynamo Mechanisms	12
1.2.2 Stellar Activity and Rotation Relation	13
1.3 Solar and Stellar Magnetic Activities	14
1.3.1 Photospheric Activities	15
1.3.2 Chromospheric Activities	18
1.3.3 Coronal Activities	18
1.3.3.1 Filaments	19
1.3.3.2 Coronal mass ejections (CMEs)	19
1.3.3.3 Solar flare	20

1.3.3.4	Magnetic reconnection	22
1.3.3.5	Standard solar flare model	23
1.3.3.6	Stellar flares	25
1.3.3.7	Flare observations	26
1.3.3.8	Stellar flare models	28
1.3.3.9	Flare-CME relationship	31
1.4	Observational Diagnostics of Stellar Flares	32
1.4.1	Stellar Light Curve	32
1.4.2	High-resolution X-ray Spectroscopy	34
1.4.2.1	FIP and inverse-FIP effect	35
1.5	Aim and Objective of Thesis	38
1.6	Outline of the Thesis	39
2	X-ray Observations, Data Reduction, and Analysis Techniques	41
2.1	XMM-Newton	42
2.1.1	European Photon Imaging Camera (EPIC)	43
2.1.2	Reflection Grating Spectrometer (RGS)	45
2.2	X-ray Observations	46
2.3	Data Reduction Procedure	47
2.3.1	EPIC Data Reduction	48
2.3.2	RGS Data Reduction	50
2.4	Analysis Techniques	51
2.4.1	Stellar Coronal Plasma Models	52
3	Diagnostics of Super-flares Observed on Active Fast Rotator AB Doradus	55
3.1	AB Dor	56
3.2	Observations and Data Reduction	58

3.3	Analysis and Results	58
3.3.1	X-ray Light Curves	58
3.3.2	EPIC Spectral Analysis	60
3.3.2.1	The quiescent spectroscopy	62
3.3.2.2	Spectral evolution during the flares	63
3.3.3	Loop Modeling	66
3.3.3.1	The rise phase	66
3.3.3.2	The decay phase	68
3.3.4	Loop Parameters	69
3.4	Discussion and Conclusions	71
4	Characterizing Super-flares in V711 Tau using Time-resolved Spectroscopy (TRS)	83
4.1	HR 1099	84
4.2	Observation and Data Reduction	85
4.3	Analysis and Results	85
4.3.1	X-ray Light Curves	88
4.3.2	EPIC Spectral Analysis	89
4.3.2.1	The quiescent state spectroscopy	89
4.3.2.2	Spectral evolution during the flares	90
4.3.3	Loop Modeling	92
4.4	Discussion and Conclusions	94
5	Coronal Elemental Abundance Analysis: FIP and Inverse-FIP effect	103
5.1	FIP and Inverse-FIP Effect	104
5.2	RGS Spectral Analysis	104
5.2.1	AB Dor	104

5.2.2	HR 1099	106
5.3	Results	106
5.4	Discussion and Conclusions	115
6	Possible Evidence of CMEs Associated with Flares by Inferring Variations in Hydrogen Column Density	123
6.1	Introduction	124
6.2	Analysis and Results	125
6.3	Discussion and Conclusions	126
7	Conclusions and Future Plans	135
7.1	Summary and Conclusions	135
7.2	Future Plans	138
	Bibliography	141
	Appendix List of Publications	161
