

ACKNOWLEDGEMENT

Undertaking this PhD has been a truly life-changing experience for me and it would not have been possible to do without the support and guidance that I received from many people.

I express my deep sense of gratitude and indebtedness to my supervisor, Dr Piyush Rai, Professor of the Department of Mining Engineering, IIT (BHU) for providing precious guidance, inspiring discussions and continuous supervision throughout the research period. His timely help, constructive criticism, and conscientious efforts made it possible to complete and present the work contained in this thesis.

The support, co-operation and encouragement rendered from the departmental end by the Head, Professor, academic and non-teaching staff of the Department of Mining Engineering, IIT (BHU), is gratefully acknowledged.

A very special thank you to Dr. Mohammad Zaheer Khan Yusufzai Associate Professor of Department of Mechanical Engineering, IIT (BHU) for his invaluable advice and feedback on my research and for always being so supportive of my work.

I also thank the wonderful staff of the Mining Department as well as of other departments for always being so helpful and friendly. People here are genuinely nice and want to help you out and I'm glad to have interacted with many. If I have forgotten anyone, I apologize.

The valuable support rendered by Northern Coalfield Limited(NCL) and Sasan Coalfield, Singrauli, M.P., India, for rendering excellent co-operation and support during the entire field work is greatly acknowledged.

My other colleagues and friends are gratefully acknowledged for their support during the thesis writing period. Finally, I feel indebted to my family whose encouragement and support all though helped me in accomplishing this mammoth work.

At the end, I record my thanks to all concerned directly or indirectly with the present work.

(SHAH FATEH AZAM)
