

# List of Tables

<b>Table</b>	<b>Caption</b>	<b>Page no.</b>
2.1	Maximum current and voltage stresses on the elements of TSHGC	28
2.2	Comparison between TSHGC and some reported high gain DC-DC converters	30
2.3	Normalized total voltage stress on the devices ( $C$ , $Di.$ , and $Sw.$ ) of TSHGC and some reported high gain DC-DC converters	31
2.4	Operating conditions and list of parameters for the verification of TSHGC	33
3.1	KCL and KVL equations of HGIBC at different switching states	45
3.2	Maximum current and voltage stresses on the elements of HGIBC in the three operating regions	49
3.3	Comparison between HGIBC and some reported high gain converters	54
3.4	Discussion on the pros and cons of HGIBC and reported converters	55
3.5	Normalized total maximum voltage stress on the elements ( $Sw.$ , $Di.$ , and $C$ ) of HGIBC and reported converters	56
3.6	Common operating conditions and list of parameters for the verification of HGIBC in the three operating regions	56
4.1	Maximum current and voltage stresses on the elements of Type 1 SLC-ZSI	78
4.2	Maximum current and voltage stresses on the elements of Type 2 SLC-ZSI	86
4.3	Comparison among the proposed SLC-ZSIs and some reported SL based ZSIs	90
4.4	Maximum total voltage stress on the elements of proposed SLC-ZSIs and some reported SL based ZSIs	92

4.5	Maximum total current stress on the elements of proposed SLC-ZSIs and some reported ZSIs	93
4.6	Operating conditions and list of parameters for the verification of proposed SLC-ZSIs	93
5.1	Maximum voltage stresses on the elements of eSLC-ZSI	118
5.2	Comparison between proposed eSLC-ZSI and some reported high gain ZSIs	124
5.3	Maximum total voltage stress on the elements ( $C$ , $D_i$ , and $Sw$ .) of eSLC-ZSI and reported ZSIs	125
5.4	Maximum total current stress on the elements ( $D_i$ , $L$ , and $Sw$ .) of eSLC-ZSI and reported ZSIs	126
5.5	Operating conditions and list of parameters for the verification of eSLC-ZSI	130
6.1	Maximum voltage stress on the elements ( $C$ , $D_i$ , and $Sw$ .) of IHC in the three operating modes	152
6.2	Operating conditions and list of parameters for the validation of IHC	155
A.1	Maximum current and voltage stresses on the elements of modified Type 1 SLC-ZSI	188
C.1	List of components used for the experimental verification of proposed converters	193
