Abstract	v
List of Tables	xi
List of Figures	xiii
1 Introduction	1
1.1 Classification of AC-AC converters	3
1.1.1 Converters with DC-link energy storage	3
1.1.2 Matrix converters	7
1.2 Common mode voltage in AC-AC converters	15
1.3 Objective	18
1.4 Structure of the Thesis	19
2 SVM techniques to reduce the CMV in USMC	21
2.1 Introduction	21
2.2 SVM for CSR	23
2.3 SVM for VSI	25
2.4 SVM for USMC	26
2.5 CMV in USMC	30
2.5.1 Calculation of CMV in USMC	31
3 CMV reduction in USMC using Auxiliary shoot-through switches	39
3.1 Introduction	39
3.2 Proposed SVM modulation	41
3.3 Voltage equations	45
3.4 Simulation results and analysis	45

3.4.1	Rating of the AST switch	47
3.4.2	Frequency spectrum of CMV	48
3.4.3	Modulation index effect	49
3.4.4	Effect on input and output frequencies	51
3.4.5	Ripple in the DC link voltage	51
3.4.6	Load power factor angle effect	52
3.4.7	Power loss and Efficiency	53
3.5	Experimental results	56
3.6	Summary	59
4	Quasi Z-source USMC with Reduced Inductor Current Ripple and CMV	61
4.1	Introduction	61
4.2	SVM for QZS-USMC	62
4.3	Proposed switching strategy	66
4.4	Design guidelines	69
4.5	CMV calculation	70
4.6	Simulation results	73
4.7	Experimental results	75
4.8	Analysis of the proposed method	79
4.8.1	Effect on CMV and inductor current ripple	79
4.8.2	Practical gain	81
4.8.3	Effect on output current THD	84
4.8.4	Efficiency of the proposed method	85
4.9	Summary	86
5	Switched Boost USMC	87
5.1	Introduction	87
5.2	Switching strategy for SB-USMC	88
5.2.1	Mathematical modelling	90
5.3	Selection of impedance network elements	92
5.4	Analysis of the proposed converter	93
5.4.1	Operating range of the load power factor ($\cos(\phi_o)$)	93

5.4.2	Relation between m and d_{st}	95
5.4.3	Overall voltage gain of the proposed converter	95
5.4.4	Voltage and current stresses of the passive components	96
5.5	Simulation and Experimental Results	96
5.5.1	Simulation Results	96
5.5.2	Experimental Results	99
5.5.3	Unbalanced input voltage conditions	102
5.5.4	Variable input frequency analysis	104
5.6	Comparative analysis	104
5.7	Summary	106
6	SB-USMC with reduced CMV	109
6.1	Introduction	109
6.1.1	Calculation of CMV in SB-USMC for the conventional SVM	110
6.2	SB-USMC with TVSVM-I method	112
6.3	SB-USMC with TVSVM-II method	114
6.3.1	Calculation of CMV for the proposed TVSVM-II	116
6.4	Simulation results for TVSVM-II	117
6.5	FFT analysis on TVSVM-I and TVSVM-II	121
6.6	Experimental results for TVSVM-II	122
6.7	Summary	124
7	Conclusion and future work	125
7.1	Conclusion	125
7.2	Future work	126
	Bibliography	129
A	List of Publications	143
A.1	Patent	143
A.2	Journal papers	143
A.3	Journal papers (not related to thesis)	144
A.4	Conference papers	144
