

Table of Contents

List of Figures.....	i
List of Tables.....	v
List of Schemes.....	vii
List of Abbreviations.....	ix
List of Symbols.....	xi
Preface.....	xiii
1. Introduction.....	1
1.1. Alzheimer's disease.....	1
1.2. Statistics of AD.....	2
1.3. Pathophysiology of AD.....	3
1.3.1. Role of acetyl and butyrylcholines in AD.....	3
1.3.2. Role of amyloid beta (A β) and tau proteins.....	5
1.3.3. Role of metals in AD.....	7
1.3.4. Role of oxidative stress (OS) in AD.....	9
1.3.5. Role of β -secretase (BACE) in AD.....	10
1.4. Current drug targets for AD.....	11
1.4.1. Cholinesterases (ChEs)	12
1.4.2. NMDA receptor in AD.....	14
2. Literature Review.....	15
2.1. Current therapies for AD.....	15
2.1.1. Cholinesterase inhibitors (ChEIs).....	15
2.1.2. Noncompetitive N-methyl-D-aspartate (NMDA) antagonists.....	16
2.2. Antioxidant therapy for AD.....	17
2.3. Piperine Background.....	18
2.4. PA as a potential therapeutic agent for AD.....	20
2.4.1. Synthesis of piperine analogues as AChE and BChE inhibitors for the treatment of Alzheimer's disease.....	20
3. Objective, Rationale, and Plan of Work.....	23
3.1. Objective and Rationale.....	23
3.2. Plan of Work.....	25

• ChEs inhibition studies.....	25
4. Results and Discussion.....	27
4.1. Chemistry.....	27
4.1.1. Conversion of piperine into piperic acid and synthesis of novel PA derivatives.....	27
4.1.2. Chemistry involved in the synthesis of the first series of compounds.....	27
4.2. Biological evaluation of the first series of compounds.....	28
4.2.1. Cholinesterase inhibition studies.....	28
4.2.2. The enzyme kinetics studies of 6j on AChE inhibition.....	31
4.2.3. Propidium iodide displacement assay.....	31
4.2.4. Evaluation of antioxidant activity by DPPH assay.....	32
4.2.5. Metal chelation study.....	33
4.2.6. Molecular modelling studies.....	34
4.2.7. PAMPA assay for in-vitro analysis of permeability.....	40
4.2.8. Cytotoxicity study.....	40
4.2.9. Acute toxicity studies in animals.....	41
4.2.10. Y- Maze experiment for scopolamine-induced impairment on spatial memory.....	42
4.3.1. Chemistry of the second series of compounds.....	44
4.3.2. Biological evaluation of the second series of compounds.....	45
5. Experimental Work.....	61
5.1. Materials and methods.....	61
5.2. Extraction and isolation of piperine from black pepper.....	61
5.2.1. Extraction.....	61
5.2.2. Isolation of piperine and conversion into Piperic acid.....	62
Biological evaluation.....	75
Determination of IC50 values.....	75
6. Summary and Conclusion.....	85
References.....	89
Appendix.....	103
List of Publications.....	107
Curriculum Vitae.....	109
