List of Abbreviations	xv
Preface	xvii
Chapter 1: Introduction	1
1.1 Overview of MSW and Legacy Waste Issues	1
1.2 Legacy Waste and Landfill Mining	3
1.3 Municipal Solid Waste Fines and its Characteristics	6
1.4 Scope of MSWF in Civil and Construction Applications and Need for Sustainable Utilization	7
1.4.1 Applications in Soil Stabilization and Construction	8
1.5 Challenges in Utilization and Disposal of MSWF, Guidelines, and Present Practice	9
1.6 Mechanical and Chemical Stabilization Waste before Utilization	10
1.7 Potential of Biopolymer in Stabilization of Soil and Industrial Waste and Scope in Stabilization of MSWF	12
1.8 Circularity and Sustainability Aspects of Sustainable and Safe Utilization of MSWF in Geotechnical Application Post-Stabilization through Biopolymers	13
1.9 Study’s Objective in Brief	15
1.10 Key takeaways and Way forward	16
Chapter 2: Review of literature- Gap Identification, Objectives Setting, and Thesis Structure	17
2.1 Introduction to the chapter:	17
2.2 Study’s Objectives:	17
2.3 Literature Review:	18
2.2.1 Characterization of MSW and Retrieved Fines	18
2.2.2 Utilization of Additives for Stabilization	19

2.2.3. Practical Application and Sustainability:	19
Part 1: Characterization of MSW and Retrieved Fines.....	21
Part 2: Utilization of Additives for Stabilization	25
Part 3: Practical Application and Sustainability.....	31
2.4. Research Gap.....	37
2.5. Key takeaways and Way forward.....	41
Chapter 3: Material and Methodology.....	43
3.1. Brief Overview of the Methodological Approach.....	43
3.2. Material Municipal Solid Waste Fines (MSWF).....	44
3.2.1. Site Description of Aged-MSW Collection.....	44
3.2.2. Sample Collection and Transport.....	46
3.2.3. Processing of MSWF.....	46
3.3. Biopolymers:.....	48
3.3.1. Xanthan Gum (XG).....	48
3.3.2. Agar Gum (AG).....	48
3.4. Methodology.....	50
3.4.1. Physical Analysis:.....	50
3.4.2. Chemical & Microstructure Analysis.....	52
3.4.3. Geotechnical Analysis.....	53
3.4.4. Analytical Determination.....	56
3.4.5. Sustainability Analysis.....	56
3.5. Key Takeaways and Way Forward:.....	57
Chapter 4: Depth-Wise Assessment of Engineering Properties of Legacy-Waste/Municipal Solid Waste Fines	59
4.1. Introduction of the Chapter:.....	59
4.2. Material and Method	60
4.3. Results of Experimental Investigation:.....	63
4.3.1. Composition Analysis of MSW at Varying Dumpsite Depths:.....	63
4.3.1. Effect of Depth on Organic Content of MSWF	64
4.3.2. Variation of pH of MSW of Varying Dumpsite Depth.....	65
4.3.3. Variation in Specific Gravity of MSWF with Depth.....	66
4.3.4. Particle Size Distribution of MSWF	67
4.3.5. Compaction Characteristics of MSWF with Depth.....	69
4.3.6. Variations in Consistency Limits of MSWF.....	70
4.3.7. Compressive Strength of MSWF with Depth.....	71
4.3.8. California Bearing Ratio (CBR) of MSWF with Depth.....	72

4.3.9.	Shear Strength Characteristics of MSWF with Depth	73
4.3.10.	Microstructural and Elemental Analysis of MSWF with Depth.....	75
4.4.	Significance of Geotechnical Findings.....	77
4.5.	Key takeaways and Way Forward.....	79
Chapter 5: Stabilization of Municipal Solid Waste Fines by Xanthan Gum & Agar Gum		81
5.1.	Introduction to the Chapter	81
5.2.	Materials & Method.....	82
5.3.	Results and Discussion.....	84
5.3.1.	Effect of Biopolymers on Compaction Characteristics of MSWF	84
5.3.2.	Effect of Biopolymers on Shear Strength Parameters.....	86
5.3.3.	Unconfined Compressive Strength of Bio-Stabilized MSWF.....	91
5.3.4.	Effect of Moisture Content on the Strength of MSWF.....	93
5.3.5.	Analysis of Soaked CBR of treated MSWF	94
5.3.6.	Analysis of Leachates of Bio-Treated MSWF.....	96
5.3.7.	SEM Analysis.....	98
5.4.	Statistical Evaluation of UCS.....	99
5.5.	Key Takeaways and Way forward	101
Chapter 6: Long-term Durability of Biopolymer in Stabilization of MSWF		103
6.1.	Introduction to the Chapter	103
6.2.	Material & Method	104
6.3.	Results and Discussion.....	106
6.3.1.	Effect of Biopolymer on the Cohesion ‘c’ of MSWF with Curing-Time.....	108
6.3.2.	Effect on the Angle of Internal Friction (Φ) with Curing Time.....	109
6.3.3.	Stress-Strain Relation of MSWF-Biopolymer Mix	111
6.3.4.	Effect of Curing Period and Biopolymer Content on Shear Strength.....	114
6.3.5.	SEM Analysis of MSWF Stabilized with Biopolymer.....	117
6.4.	Key Takeaways and Way forward	118
Chapter 7: Geotechnical Applications of Untreated and Treated MSWF		121
7.1.	Introduction to the Chapter	121
7.2.	Settlement Analysis of the Foundation Laid over MSWF	122
7.2.1.	Material Characterization.....	122
7.2.2.	Finite Element Method (FEM) Analysis	123
7.2.3.	Result and Discussion (Settlement analysis of the Foundation).....	124
7.3.	Pavement Thickness Analysis while using MSWF in Subgrade.....	127
7.3.1.	Pavement Design for MSWF Retrieved from Varying Depths.....	128
7.3.2.	Pavement Design from Treated MSWF with XG and AG	131

7.4. Potential Risks and Mitigation Strategies	134
7.5. Key Takeaways and Way forward.....	134
Chapter 8: Sustainability Analysis of Study	137
8.1. Introduction to the Chapter	137
8.2. Material and Method	138
8.3. Result and Discussion.....	140
8.3.1. Carbon footprint analysis	140
8.3.2. Financial Analysis.....	143
8.3.3. Financial Analysis in Terms of "Carbon Credit ‘CCT’ & Offsetting"	144
8.3.4. ESG Analysis- Aligned to the Global Reporting Initiative (GRI) Framework 145	
8.3.5. Resiliency cum Suitability Analysis of Stabilizers	147
8.3.6. SDG Goal Alignment Analysis of Study (of Sustainability Initiatives)	149
8.4. Key takeaways and Way forward	151
Chapter 9: Conclusions & Future-Research Scope.....	153
References	159
Abstract.....	171
List of Publications form thesis.....	172
Other collaborative work during PhD.....	173
About the Author	174
