
1.3.4	Literature review on time fractional Black-Scholes model governing the European option	20
1.4	Mathematical preliminaries	21
1.4.1	Lagrangian polynomials	21
1.4.2	Newton interpolating polynomials	22
1.4.3	Legendre polynomials	22
1.5	Numerical methods	23
1.5.1	Operational matrices	23
1.5.1.1	Kronecker Product	25
1.5.2	Finite difference method	26
1.5.2.1	Construction of the method	27
1.5.2.2	Finite difference approximation of derivatives	27
1.6	Challenges and motivations	28
1.7	Problem statement and thesis objectives	29
2	A high order numerical method for the variable- order time-fractional reaction-subdiffusion equation	31
2.1	Introduction	32
2.1.1	Formulation of the problem	32
2.1.2	Formulation of L-123 approximation for the variable-order Caputo derivative	35
2.2	Construction of numerical scheme for variable-order time-fractional reaction-subdiffusion equation	43
2.3	Stability of the numerical scheme	45
2.4	Numerical results	50
2.4.1	Numerical examples for the VO-TFRSDE	50
2.5	Conclusion	58
3	Higher-order stable numerical algorithm for the variable-order time-fractional subdiffusion equation	61
3.1	Introduction	62
3.1.1	Formulation of the problem	62
3.1.2	L-123 approximation for the variable-order Caputo derivative	65
3.2	Numerical algorithm for the variable-order time-fractional subdiffusion equation (VOTFSDE)	67
3.3	Stability of the numerical scheme	69
3.4	Numerical results and discussion	73
3.4.1	Numerical examples for the VOTFSDE	73
3.5	Conclusion	85
4	Numerical algorithm for the multi-term time-fractional electromagnetic wave model arising in dielectric medium	87

4.1	Introduction	88
4.2	Time discretization	89
4.2.1	L3 approximation of the Caputo derivative of order α and $\beta \in (1, 2)$	89
4.3	Numerical scheme for multi-term time-fractional electromagnetic wave model (MTTFEMWM)	91
4.4	Numerical Results and discussion	95
4.4.1	Numerical examples for the MTTFEMWM	95
4.5	Conclusion	109
5	Semi-discrete scheme for the time-fractional Black-Scholes model governing European options	111
5.1	Introduction	111
5.1.1	The time-fractional Black-Scholes model	112
5.1.2	Main contribution of this chapter	114
5.2	Time discretization	115
5.2.1	L-123 approximation of the Caputo derivatives	115
5.3	Basis function and operational matrices	116
5.3.1	Shifted Legendre polynomials	116
5.3.2	Function approximation	117
5.3.3	The operational matrix	118
5.3.4	Approximation for spatial terms	119
5.4	Derivation of numerical scheme for TFBSM	121
5.5	Numerical results and discussion	125
5.5.1	Numerical examples for the time-fractional Black-Scholes model	125
5.6	Conclusion	127
	Bibliography	129
	List of Publications	151
