List of Schemes

Scheme No.	Scheme Caption	Page No.
Scheme 1.1	Organic synthesis in aqueous phase condition	8
Scheme 1.2	Organic synthesis in the presence of biocatalyst	9
Scheme 1.3	Organic synthesis in solvent-free condition	9
Scheme 1.4	Synthesis of coumarin by Wittig reaction.	14
Scheme 1.5	Synthesis of coumarin by Perkin reaction	14
Scheme 1.6	Synthesis of coumarin by Baylis-Hillmann reaction	15
Scheme 1.7	Synthesis of coumarin by Pechmann condensation	15
Scheme 1.8	Synthesis of coumarin by Knoevenagel condensation	16
Scheme 1.9	Different approaches for the synthesis of imidazo[1,2-a] pyridines utilizing different types of starting materials.	20
Scheme 1.10	Imidazo[1,2-a] pyridines synthesised using a multicomponent approach	21
Scheme 1.11	Tandem process to synthesize imidazo[1,2-a] pyridines	22
Scheme 1.12	Synthesis of 6,7-dihydrobenzofuran-4(5H)-one by multicomponent approach	24
Scheme 1.13	Synthesis of 6,7-dihydrobenzofuran-4(5H)-ones by Knoevenagel reaction	24
Scheme 1.14	Synthesis of trisubstituted thiazole using different approaches.	26
Scheme 1.15	Synthesis of trisubstituted thiazole by Michael addition reaction	26
Scheme 2.1	Different organic transformation using β -Cyclodextrin	44-45
Scheme 2.2	Various previous and present methods for the synthesis of coumarin	47
Scheme 2.3	Model reaction for the synthesis of coumarin	48
Scheme 2.4	Synthesis of 3-Functionalized coumarins derivatives in the presence of aqueous ethanol and β -Cyclodextrin	48

Scheme 2.5	Controlled experiments	55
Scheme 2.6	A plausible mechanism for the synthesis of 3-functionalized coumarins derivatives	56
Scheme 3.1	Few lipases catalysed reactions	81-82
Scheme 3.2	Previous and Present methods synthesis of 2-phenyl imidazo[1, 2-a] pyridine	86
Scheme 3.3	Substrate scopes for synthesizing aryl series of imidazopyridines	91
Scheme 3.4	Substrate scopes for one-pot conversion of 2-Bromoacetophenone and 2- aminopyrimidine into corresponding imidazopyridines	92
Scheme 3.5	Substrate scopes for synthesizing alkyl series of imidazopyridines	93
Scheme 3.6	Control experiment with TEMPO	93
Scheme 3.7	A plausible mechanism for the synthesis of 2-phenyl imidazo [1, 2-a] pyridine derivatives	94
Scheme 3.8	Gram scale synthesis of imidazo [1,2-a] pyridine	95
Scheme 4.1	Few FeCl ₃ catalysed reactions in organic synthesis (a-c)	134
Scheme 4.2	An illustration of the previous and present reports for the synthesis of 6,7-dihydrobenzofuran-4(5H)-ones derivatives.	137
Scheme 4.3	Model reaction for the synthesis of benzofuran-4(5H)-ones.	138
Scheme 4.4	Control experiment for mechanistic investigation	145
Scheme 4.5	Plausible mechanism for the synthesis of Benzofuran-4(5H)-one's derivatives 4a-4	146
Scheme 4.6	Gram-scale synthesis of Benzofuran-4(5H)-one's.	147
Scheme 5.1	Previous & present method for the synthesis of trisubstituted thiazole.	172
Scheme 5.2	Model reaction for the synthesis of trisubstituted thiazole	173
Scheme 5.3	Control experiment using TEMPO as radical trapping agents	179
Scheme 5.4	Plausible reaction mechanism for the formation of trisubstituted thiazole.	181
Scheme 5.5	Gram-scale synthesis of trisubstituted thiazole	182

List of Titles

Chapter-1	Overview of Some Main Class of Nitrogen, Oxygen and Sulphur Containing Heterocyclic Compounds	1– 40
1.	Introduction	1-10
1.2.	Coumarin	11
1.2.1	Wittig reaction	14
1.2.2	Perkin reaction	14
1.2.3	Baylis-Hilman reaction	14
1.2.4	Pechmann condensation	15
1.2.5	Knoevenagel condensation	15
1.3	Imidazo[1,2-a] pyridine	16
1.3.1	Multicomponent approach	20
1.3.2	Tandem reaction	21
1.4	Polyfunctionalized Benzofuran	21-23
1.4.1	Knoevenagel condensation reaction	24
1.5	Thiazole	24
1.5.1	Multiple approach	25-26
1.5.2	Michael addition reaction	26
1.6	Objective of the thesis work	27
1.7	References	28
Chapter – 2	A Sustainable and Greener Approach for the Synthesis of 3-Functionalized Coumarins derivatives catalyzed by Beta cyclodextrin.	41-80
2.1	Introduction	41- 47
2.2	Result and discussion	48
2.2.1	Optimization of reaction conditions	48-56
2.2.2	Substrates scope for 3-functionalized coumarins derivatives	54
2.3	Mechanistic studies and control experiment	55
2.3.1	Plausible reaction mechanism	56-57

2.3.2	Recovery of the catalyst	57
2.4	Gram-scale synthesis of 3-functionalized coumarin derivatives	57-58
2.5	Advantages of the present method	58
2.6	Experimental section	58
2.7	Analytical data	59-64
2.8	Some spectrum of Ethyl 2-oxo-2 <i>H</i> -chromene-3-carboxylate derivatives of ¹ HNMR, ¹³ C NMR and HRMS.	65
2.9	References	71
Chapter-3	Synthesis of Imidazole-fused nitrogen-bridgehead heterocycles catalysed by lipase and their antifungal and anti-microbial bioactivity.	81- 132
3.1	Introduction	81
3.1A & 3.1B	Previous and present methods	85-86
3.2	Result and discussion	86
3.2.1	Plausible reaction mechanism	93
3.2.2	Scalability of the protocol	95
3.2.3	Reusability of the PPL Lipase	95
3.3	Antimicrobial activity of (3ha, 3ka, 3fa, 3hc, 3eb) compounds	96
3.3.1	Material and methods	96
3.3.2	Microbial strains and growth conditions	97
3.3.3	Inoculum preparation	97
3.3.4	Antifungal susceptibility test by well diffusion	98
3.3.5	Minimal inhibitory concentration determination of synthesized compounds.	99
3.3.6	Results	100
3.3.7	Antimicrobial activity by well diffusion method	100
3.3.8	Determination of MIC of synthesized compounds (3ha, 3ka, 3fa, 3hc, 3eb)	101
3.3.9	MIC against gram-positive and gram-negative bacteria	102
3.3.10	Discussion	104
3.4	Experimental section	105
3.4.1	General procedure for the synthesis of products	105

3.4.2	Procedure for gram-scale synthesis	105
3.4.3	Conclusions	106
3.5	Analytical data	106
3.6	References	122
Chapter-4	Green and Efficient Iron-Catalysed Synthesis of Polyfunctionalized Benzofuran-4(5H)-one Derivatives via Cross-Dehydrogenative Coupling	133-167
4.1	Introduction	133
4.1A & 4.1B	Previous methods and present methods	137
4.2	Results and discussion	138
4.2.1	Optimization of reaction conditions	138
4.2.2	Substrates scope for benzofuran-4(5H)-ones	141
4.2.3	Mechanistic study and controlled experiments	143
4.2.4	Plausible reaction mechanism	145
4.3	Gram-scale synthesis of benzofuran-4(5H)-one's derivatives	147
4.4	Experimental section	147
4.4.1	Materials and methods	147
4.4.2	Typical procedure for the synthesis of benzofuran-4(5H)-one's derivatives.	148
4.5	Analytical data	148
4.6	Some spectrum of intermediate and Benzofuran-4(5H)-one's derivatives of ¹ HNMR, ¹³ CNMR and HRMS.	156
4.7	References	161
Chapter-5	Efficient one-pot synthesis of substituted diphenyl 1, 3-thiazole through multicomponent reaction by using green and efficient Iron-catalyst via crass dehydrogenative coupling (CDC)	168-201
5.1	Introduction	168
5.1A & 5.1B	Previous and present methods	172
5.2	Result Discussion	173
5.2.1	Optimization of Reaction conditions	173
5.2.2	Controlled experiments and mechanistic studies	177

5.2.3	Plausible reaction mechanism	179
5.3	Gram-scale synthesis of trisubstituted thiazole derivatives	182
5.4	Experimental section	182
5.4.1	General Procedure for the synthesis of trisubstituted thiazole derivative (3a-3l)	182
5.4.2	Procedure for the synthesis of 1,3-trisubstituted thiazole derivative (4a-4s)	183
5.5	Analytical data	183
5.6	Some spectrum of 1,3-trisubstituted thiazole derivatives of ^1H NMR, ^{13}C NMR and HRMS.	172
5.7	References	195
Chapter 6.	Summary and Conclusions	202
	List of research publication	206
