List of Figures	xi
Symbols	xiii
1 Introduction	1
1.1 What is Fractal?	1
1.2 Fractal Dimension	4
1.3 Fractal Interpolation Functions	6
1.3.1 Univariate Fractal Interpolation Functions	8
1.3.2 Univariate α -Fractal Functions	11
1.3.3 Multivariate Fractal Interpolation Functions	12
1.3.4 Multivariate α -Fractal Functions	16
1.4 Fractional Integral	18
1.4.1 Riemann-Liouville Fractional Integral	19
1.4.2 Katugampola Fractional Integral	19
1.5 Set-Valued Maps	20
1.6 Invariant Measures and Fractal Transformations	22
1.6.1 Invariant Measures	22
1.6.2 Fractal Transformations	23
1.7 Motivation and Objective of this Thesis	25
1.8 Delineation of this Thesis	26
2 Fractal Dimension of Univariate Vector-Valued Functions	29
2.1 Introduction	29
2.1.1 Variation of a Vector-Valued Function	30
2.1.2 Delineation	31
2.2 Dimension of the Graph of a Vector-Valued Function	32
2.3 Fractal Dimension and Katugampola Fractional Integral	35
2.4 Conclusion	45
3 Multivariate α-Fractal Functions: Dimension and Fractional Integral	47

3.1	Introduction	47
3.1.1	Delineation	48
3.2	Box Dimension of the Graph of Multivariate Fractal Function	48
3.2.1	Restrictions of α -Fractal Function on Axis	59
3.3	Mixed Riemann-Liouville Fractional Integral	61
3.4	Conclusion	65
4	Approximation Aspects of Multivariate FIF	67
4.1	Introduction	67
4.1.1	Delineation	69
4.2	Fundamental Results	70
4.2.1	One-Sided Approximation	78
4.3	Fractal Dimension of Multivariate α -Fractal Function	80
4.4	Some Approximation Aspects	87
4.5	Conclusion	92
5	Set-Valued Fractal Functions and Dimensions	93
5.1	Introduction	93
5.1.1	Delineation	94
5.2	Fractal Functions in $C(I, \mathcal{K}(\mathbb{R}))$	95
5.3	Approximation of Set-Valued Functions	105
5.3.1	Constrained Approximation	108
5.4	Dimensional Results	110
5.5	Conclusion	123
6	Invariant Measures and Fractal Transformations on Graphs of FIF	125
6.1	Introduction	125
6.1.1	Delineation	126
6.2	Measure-Theoretic Aspects of FIFs	127
6.3	Fractal Transformation Between Two FIFs	134
6.4	Fractal Functions in Different Spaces	137
6.4.1	$L^p(I)$ -Space with Respect to Invariant Measures	137
6.4.2	Smooth Dimensional Space	141
6.4.3	Smooth Convex-Lipschitz Space	145
6.5	Conclusion	148
7	Conclusions and Future Remarks	149
7.1	Conclusion	149
7.2	Some Future Directions	150
