

# TABLE OF CONTENTS

## Contents

Acknowledgements.....	i-i
Preface.....	v-xi
Table of contents.....	xiii-xv
List of figures .....	xvii-xxii
List of tables .....	xxiii-xxiv
list of symbols and abbreviations.....	xxv
<b>Chapter 1 : Introduction .....</b>	<b>1</b>
1.1 Titanium and its importance.....	1
1.1.1 Properties of titanium.....	2
1.1.2 Alloys of titanium .....	5
1.1.3 Applications of titanium alloys .....	11
1.2 Welding process and its importance in fabrication .....	13
1.2.1 Fusion and solid-state welding processes.....	14
1.2.2 Gas tungsten arc welding (GTAW) process.....	15
1.3 Requirements of quality welding .....	23
1.4 Challenges in welding of titanium alloys.....	23
1.4.1 Atmospheric contamination .....	24
1.4.2 Porosity .....	24
1.4.3 Ferrite contamination .....	25
1.4.4 Grain growth in weld and HAZ.....	25
1.5 Requirement of dissimilar welding .....	25
1.5.1 Welding of dissimilar titanium alloys .....	26
<b>Chapter 2 : Literature Review .....</b>	<b>27</b>
2.1 Microstructure development and phase evolution in titanium alloys.....	27
2.1.1 Classification of the titanium alloys.....	27
2.1.2 Solid state phase transformation in ( $\alpha+\beta$ ) titanium alloys .....	30
2.1.3 Typical cooling rates and phase transformations in the ( $\alpha+\beta$ ) alloy .....	31
2.1.4 Effect of different cooling rates on microstructure of ( $\alpha+\beta$ ) alloy .....	34
2.1.5 Effect of microstructure development on mechanical properties.....	37
2.2 Early development in welding of titanium alloys .....	38
2.2.1 Solid-state welding of titanium alloys.....	39
2.2.2 Fusion welding of titanium alloys.....	41

2.3	Classification of typical GTAW weldment .....	42
2.3.1	Typical gas tungsten arc welded Ti-6Al-4V alloy weldment.....	43
2.3.2	Microstructures in different regions of Ti-6Al-4V weldment.....	44
2.4	Major challenges during welding of titanium alloys.....	45
2.4.1	Shielding arrangement from atmospheric contamination.....	46
2.4.2	Effect of current pulsing during GTAW on titanium alloys welds .....	48
2.4.3	Effect of electrode tip angle weld geometry.....	50
2.5	Dissimilar welding of titanium alloys .....	51
2.5.1	Dissimilar welding of CP-Ti and Ti-6Al-4V .....	52
2.6	Impression creep testing of titanium welds.....	54
2.7	Research gaps.....	56
2.8	Objectives for the research.....	58

### **Chapter 3 : Experimentation and Methodology ..... 59**

3.1	Material selection: .....	60
3.2	Welding setup: .....	61
3.2.1	GTAW power source .....	62
3.2.2	Electrode selection and preparation: .....	65
3.3	Effect of standoff distance.....	69
3.4	Effect of variation of pulse frequency .....	71
3.5	Shielding gas quality test.....	73
3.6	Development of shielding setup.....	74
3.7	Weld preparation.....	79
3.7.1	Cleaning and edge preparation.....	79
3.7.2	Bead on plate welding trials .....	80
3.7.3	Preparation of dissimilar weld.....	82
3.8	Characterization of welds.....	83
3.8.1	X-ray radiography .....	84
3.8.2	Sample extraction location from welded plates .....	85
3.8.3	Metallography of welded specimens .....	86
3.8.4	X-ray diffraction.....	88
3.8.5	Microhardness testing .....	89
3.8.6	Scanning electron microscopy and EDS analysis .....	90
3.8.7	Tensile testing .....	91
3.8.8	Charpy impact testing.....	93

3.8.9	Impression creep testing.....	94
<b>Chapter 4 : Results and Discussion .....</b>		<b>101</b>
4.1	Effect of current pulsing during GTAW on Ti-6Al-4V weld .....	101
4.1.1	Bead on plate welding.....	103
4.1.2	Microstructural analysis .....	103
4.1.3	Microhardness variation across the weld of Ti-6Al-4V alloy .....	108
4.2	Effect of electrode tip angle on weld characteristics.....	109
4.2.1	Effect of different electrode tip angle on weld bead appearance .....	112
4.2.2	Microstructure of different regions weldment at 60° tip angle .....	113
4.2.3	Effect of electrode tip angle on various weld geometric elements.....	115
4.2.4	Effect of electrode tip angle on weld distortion .....	117
4.2.5	Effect of electrode tip angle on microhardness variation.....	120
4.2.6	X-ray diffraction analysis of as-received CP-Ti and welded specimen .....	121
4.3	Effect of different current pulsing parameters on weld bead profile .....	122
4.3.1	Weld bead appearance at different pulse parameters .....	124
4.3.2	Weld bead profile measurement.....	126
4.4	Dissimilar welding of titanium alloys (CP-Ti/Ti-6Al-4V) using pulsed GTAW.	128
4.4.1	Weld prepared using conventional and pulsed GTAW at different frequencies	129
4.4.2	X-ray radiographic analysis dissimilar weld.....	131
4.4.3	Bead profile appearance at different pulse frequencies.....	132
4.4.4	Microstructure evolution .....	133
4.4.5	EDS analysis of weld region of dissimilar weld .....	142
4.4.6	X-ray diffraction analysis of as-received materials and dissimilar welds....	146
4.4.7	Mechanical testing .....	148
<b>Chapter 5 : Summary and Conclusions .....</b>		<b>182</b>
<b>Chapter 6 : Future Scopes .....</b>		<b>188</b>
