

## Table of Contents

List of Figures.....	VII
List of Tables.....	XV
Abbreviations.....	XVII
Symbols.....	XIX
Preface.....	XXI
<b>Chapter 1. Introduction.....</b>	<b>1</b>
1.1. Background.....	1
1.2. Motivation.....	3
1.3. Objective of the Thesis .....	4
1.4. Structure of thesis .....	5
<b>Chapter 2. Literature Review .....</b>	<b>9</b>
2.1 Introduction to biomaterials.....	9
2.2 Various modes of failure of orthopedic implant materials .....	9
2.2.1 Improper loading of the implant .....	9
2.2.2 Corrosion of implants .....	11
2.2.3 Friction and wear of implants .....	11
2.3 Metallic implant biomaterials .....	12
2.4 High entropy alloys.....	15
2.5 Core effects of high entropy alloys.....	17
2.5.1 High entropy effect .....	18
2.5.2 Severe lattice distortion effect .....	19
2.5.3 Sluggish Diffusion Effect .....	20

2.5.4 Cocktail effect .....	21
2.6 Design of HEAs/CCAs.....	22
2.6.1 Empirical model for predicting phase stability and phase evolution .....	23
2.6.2 Design of bio-CCAs .....	25
2.7 Synthesis and processing routes for bio-CCAs .....	26
2.8 Microstructural features in bio-HEAs/CCAs .....	28
2.8.1 As-cast microstructure.....	29
2.8.2 Annealed microstructure .....	31
2.8.3 HPT deformed microstructure.....	32
2.9 Mechanical properties of bio-HEAs/CCAs.....	33
2.9.1 Hardness and elastic modulus .....	34
2.9.2 Tensile and compressive properties .....	35
2.10 Tribological behavior of bio-HEAs/CCAs.....	39
2.11 Corrosion resistance .....	43
2.12 In-vitro biocompatibility .....	47
2.12.1 Factors affecting cell adhesion.....	51
2.12.1.1 Chemical composition.....	51
2.12.1.2 Surface Roughness and Topography.....	52
2.12.1.3 Surface Energy .....	52
2.12.1.4 Surface wettability.....	53
2.13. Scope of the present thesis .....	54
<b>Chapter 3. Materials and Methods .....</b>	<b>55</b>
3.1 Materials selection and alloy synthesis .....	55

3.2 Density measurement.....	56
3.3 High pressure torsion.....	57
3.4 Annealing treatment.....	57
3.5 Microstructural characterization.....	58
3.5.1 X-ray diffraction.....	58
3.5.2 Optical microscopy.....	60
3.5.3 Scanning electron microscopy.....	61
3.5.4 Transmission electron microscopy.....	62
3.6 Mechanical properties.....	62
3.6.1 Hardness and elastic modulus.....	62
3.6.2 Estimation of elastoplastic response.....	63
3.7 Electrochemical corrosion testing.....	65
3.7.1 Potentiodynamic polarization tests.....	66
3.7.2 Electrochemical impedance spectroscopy.....	66
3.8 Wear and friction studies.....	66
3.9 Biocompatibility tests.....	67
3.9.1 Wettability tests.....	67
3.9.2 In-vitro cell viability, adhesion, and proliferation tests.....	68
<b>Chapter 4. Development of the Ti-Nb-Mo-Fe-Cr based complex</b>	
<b>concentrated alloy.....</b>	<b>71</b>
4.1 Background.....	71
4.2 Results.....	71
4.2.1 Alloy design and phase stability of Ti-Nb-Mo-Cr-Fe CCA.....	71

4.2.2 Microstructural characterization as-cast $Ti_{10}Nb_{30}Mo_{20}Cr_{20}Fe_{20}$ CCA .....	75
4.2.3 Microstructural characterization of annealed $Ti_{10}Nb_{30}Mo_{20}Cr_{20}Fe_{20}$ CCA.....	79
4.2.4 Instrumented micro-indentation behaviour of $Ti_{10}Nb_{30}Mo_{20}Cr_{20}Fe_{20}$ CCA .....	84
4.2.5 Potentiodynamic Polarization of $Ti_{10}Nb_{30}Mo_{20}Cr_{20}Fe_{20}$ CCA .....	85
4.2.6 Electrochemical impedance spectroscopy of $Ti_{10}Nb_{30}Mo_{20}Cr_{20}Fe_{20}$ CCA .....	89
4.3 Discussion .....	92
4.3.1 Validity of empirical model for phase formation prediction.....	93
4.3.2 Strengthening mechanisms of $Ti_{10}Nb_{30}Mo_{20}Cr_{20}Fe_{20}$ CCA .....	96
4.3.3 Grain Growth Kinetics .....	98
4.3.4 Corrosion behaviour .....	100
4.4 Summary .....	102
<b>Chapter 5. Microstructure, mechanical, and tribological behaviour of a</b>	
<b>Ti-Zr-Nb-Mo-Fe-Cr based bio-CCA .....</b>	<b>105</b>
5.1 Background .....	105
5.2 Results .....	106
5.2.1 Alloy design and microstructural characterization of as-cast bio-CCA.....	106
5.2.2 Microstructural characterization of annealed bio-CCA .....	110
5.2.3 Mechanical behaviour of the $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ CCA .....	114
5.2.3.1 Instrumented micro-indentation test of $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ CCA .....	114
5.2.3.2 Elastoplastic characteristics of the $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ CCA .....	115
5.2.4 Tribological behaviour of $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ CCA.....	117
5.3 Discussion .....	124

5.3.1 Applicability of the empirical model for predicting phase stability and phase evolution of the $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ CCA .....	124
5.3.2 Mechanical properties of $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ CCA.....	127
5.3.2.1 Strengthening mechanisms of $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ CCA.....	127
5.3.2.2 Mechanical properties of the present CCA compared to other reported implant biomaterials.....	128
5.3.3 Wear resistance of $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ CCA.....	129
5.3.4 Cost analysis of the present $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ CCA .....	130
5.4 Summary .....	131
<b>Chapter 6. Corrosion and biocompatibility of the Ti-Zr-Nb-Mo-Fe-Cr based bio-CCA.....</b>	<b>133</b>
6.1 Background.....	133
6.2 Results.....	134
6.2.1 Potentiodynamic polarization of $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ bio-CCA .....	134
6.2.2 Electrochemical impedance spectroscopy analysis of $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ bio-CCA .....	138
6.2.3 Contact angle measurement .....	143
6.2.4 In-vitro cytocompatibility evaluation of the $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ bio-CCA....	144
6.3 Discussion.....	152
6.3.1 Corrosion resistance of $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ CCA .....	153
6.3.2 In-vitro biocompatibility of $Ti_{35}Zr_{35}Nb_{15}Mo_5Fe_5Cr_5$ CCA .....	154
6.4 Summary .....	155

<b>Chapter 7. Crystallographic texture dependence of biocompatibility of the Ti-Zr-Nb-Mo-Fe-Cr based bio-CCA.....</b>	<b>157</b>
7.1 Background .....	157
7.2 Results .....	158
7.3 Discussion .....	163
7.4 Summary .....	166
<b>Chapter 8. High pressure torsion of the Ti-Zr-Nb-Mo-Fe-Cr based bio-CCA.....</b>	<b>167</b>
8.1 Background .....	167
8.2 Results .....	168
8.2.1 Microstructural characterization of the HPT-deformed bio-CCA .....	168
8.2.2 Mechanical response of the HPT-deformed bio-CCA .....	172
8.2.3 Corrosion behaviour of the HPT-deformed bio-CCA .....	174
8.2.4 Wetting behaviour of the HPT-deformed bio-CCA .....	178
8.2.5 In-vitro biocompatibility of the HPT-deformed bio-CCA .....	180
8.3 Discussion .....	185
8.4 Summary .....	189
<b>Chapter 9. Conclusions and Future Scope.....</b>	<b>191</b>
9.1 Conclusions .....	191
9.2 Future Scope.....	195
<b>References .....</b>	<b>197</b>
<b>List of Publications and conferences .....</b>	<b>230-231</b>
