List of Figures	xiv
List of Tables	xv
List of Symbols	xix
List of Abbreviations	xx
1 Introduction	1
1.1 Interval Analysis	2
1.2 Interval-Valued Function and Interval Optimization Problem	3
1.3 Set-Valued Analysis	7
1.4 Set-Valued Function	8
1.5 Set-Valued Optimization Problem	8
1.6 Literature Survey	10
1.6.1 Literature on Interval Analysis and Calculus of Interval-Valued Functions	10
1.6.2 Literature on Interval Optimization	12
1.6.3 Literature on Set-Valued Analysis and Set Optimization	13
1.7 Preliminaries	16
1.7.1 Interval Arithmetic and Some Basic Properties on Intervals	16
1.7.2 Sequence of Intervals	20
1.7.3 Fundamental Results on Interval-Valued Functions	21
1.7.4 Preliminaries of Set-Valued Functions	29
1.8 Optimality Conditions on Set-Valued Maps	32
1.9 Objective of the Thesis	35
1.10 Organization of the Thesis	36
Preface	1

2	Generalized-Hukuhara Subdifferential Analysis and Its Application in Nonconvex Composite Interval Optimization Problems	39
2.1	Introduction	39
2.2	Motivation and Contribution	40
2.3	gH -Subdifferential	40
2.4	Application of gH -Subdifferentials in Nonconvex Composite Optimization	61
2.5	Conclusion	67
3	Interval-Valued Value Function and Its Application in Interval Optimization Problems	69
3.1	Introduction	69
3.2	Motivation and Contribution	70
3.3	Interval-Valued Lagrangian Function	70
3.4	Interval-Valued Value Function	81
3.5	Application of gH -Subdifferential of Interval-Valued Value Function . .	90
3.6	Conclusion	96
4	Generalized-Hukuhara Dini Hadamard ϵ-Subdifferential and H_ϵ-Subgradient and Their Applications on Interval Optimization	99
4.1	Introduction	99
4.2	Motivation and Contribution	100
4.3	gH -Dini Hadamard ϵ -Subdifferentiability	101
4.4	H_ϵ -Subgradient	112
4.5	Optimality Conditions on Nonsmooth Interval Optimization	119
4.6	Conclusion	128
5	Newton Method for Set Optimization Problems with Set-Valued Mapping Being Finitely Many Vector-Valued Functions	129
5.1	Introduction	129
5.2	Motivation and Contribution	130
5.3	Optimality Conditions for Set-Valued Mappings	131
5.4	Newton Method and Its Convergence Analysis	140
	5.4.1 Convergence Analysis	142
5.5	Numerical Demonstrations and Execution of Results	158
5.6	Conclusion	172

6	Quasi-Newton Method for Set Optimization Problems with Set-Valued Mapping Given by Finitely Many Vector-Valued Functions	175
6.1	Introduction	175
6.2	Motivation and Contribution	176
6.3	Optimality Conditions for Set-Valued Mappings	177
6.3.1	Hessian Approximation and Necessary Condition for Weakly Minimal Solutions of (SOP)	177
6.4	Quasi-Newton Method for (SOP)	182
6.4.1	Properties of Φ	182
6.4.2	Quasi-Newton Method for (SOP)	186
6.5	Convergence Analysis of Quasi-Newton Method	193
6.6	Numerical Demonstrations and Execution of Results	203
6.7	Conclusion	216
7	Conclusions and Future Directions	219
7.1	General Conclusion	219
7.2	Contribution of the Thesis	220
7.3	Future Scopes of Studies	223
A	Appendix A	225
A.1	Proof of Lemma 1.4	225
A.2	Proof of Lemma 1.7	226
B	Appendix B	227
B.1	Proof of Lemma 2.1	227
B.2	Proof of Lemma 2.2	229
	References	231
