

## LIST OF TABLES

---

Table No.	Description	Page No.
2.1	Specifications of bistatic Scatterometer system	43
3.1	Coefficient of determination ( $R^2$ ) between the bistatic specular scattering coefficients at $40^\circ$ incidence angle at X-, C-, and L- bands for HH-, VV-, and HV-polarizations with the rice crop growth parameters	67
3.2	The optimum values of various parameters of S-FIS algorithm at X-band for HH-polarization	71
4.1	Coefficient of determination ( $R^2$ ) between bistatic specular scattering coefficients and wheat crop growth parameters for X- and C-bands at $40^\circ$ incidence angle and for L-band at $50^\circ$ incidence angle for HH- and VV- polarization	86
4.2	The optimum values of various parameters of G-FIS algorithm at C-band for HH-Polarization	98
5.1	The values of coefficients of determination ( $R^2$ ) between bistatic specular scattering coefficient and crop growth parameters	103
5.2	Comparison of RMSE of S-FIS and S-ANFIS algorithm for different crop growth parameters	106
6.1	Coefficient of determination ( $R^2$ ) between $P$ (dB) and soil moisture content at different angle of incidence	119
6.2	The optimum values of various parameters of G-ANFIS algorithm	124
