LIST OF TABLES	xviii
ABSTRACT	xx
CHAPTER 1 INTRODUCTION	1
1.1 History of Engineering Materials	1
1.2 Evolution of Biomaterials.....	2
1.3 Waste Eggshells.....	3
1.4 What is Hydroxyapatite?	4
1.4.1 Applications of Hydroxyapatite	7
1.5 Silver-Doped Hydroxyapatite	9
1.6 Advantages of Eggshell-derived Silver-doped Hydroxyapatite.....	9
1.7 What is PMMA (poly methyl methacrylate)?.....	10
1.8 PMMA –HAp coating on Ti6Al4V alloy	10
1.9 Tribology of biomaterials	10
CHAPTER 2 LITERATURE REVIEW	13
2.1 Synthesis of Hydroxyapatite.....	13
2.1.1 Bibliometric Analysis on “Synthesis of Hydroxyapatite”	13
2.2 Literature review related to synthesis of Hydroxyapatite	17
2.3 Doping in Hydroxyapatite	29
2.4 Coating of Hydroxyapatite.....	32
2.4.1 Advantages of PMMA/ HAPAg coating on Ti6Al4V substrate	35
2.5 Fabrication of HAp reinforced PMMA composite	36
2.6 Research Gaps identified from the current literature	41
2.7 Objectives of the study	42
2.8 Flowchart related to current work.....	43
CHAPTER 3 MATERIALS AND METHODS.....	45
3.1 Materials	45
3.2 Synthesis of Eggshell-derived Hydroxyapatite.....	47

3.3	Synthesis of Eggshell-derived Silver-doped Hydroxyapatite	49
3.4	Compact HAPAg Sample Preparation.....	51
3.5	Fabrication of PMMA/ Hydroxyapatite composite	52
3.6	Preparation of Ti6Al4V Substrate	53
3.7	Preparation of PMMA / Ag-Doped HAp Sol	53
3.8	Deposition of PMMA/ Ag-Doped HAp on Ti6Al4V	54
3.9	Characterizations	55
3.10	Flowability Analysis.....	57
3.10.1	Bulk Density and Tap Density	57
3.10.2	Hausner's Ratio and Carr's Ratio	58
3.10.3	Angle of Repose.....	59
3.11	Physical Analysis.....	60
3.11.1	Experimental Density.....	60
3.11.2	Relative Density.....	60
3.11.3	Porosity Percentage.....	61
3.12	Mechanical Behaviour	61
3.12.1	Vicker's Microhardness.....	61
3.12.2	Compressive Strength	61
3.12.3	Adhesion Strength.....	62
3.13	Wettability Analysis	62
3.13.1	Water Absorption Test.....	62
3.13.2	Contact Angle	63
3.13.3	Surface Free Energy (SFE)	63
3.14	Thermal Analysis.....	64
3.15	Antibacterial Analysis	64
3.16	Morphological Analysis.....	65
3.16.1	Field emission scanning electron microscopy.....	65
3.16.2	X-ray diffraction (XRD)	66
3.16.3	Optical Microscope	66
3.16.4	Stereo Zoom Microscope	66
3.16.5	Profilometer	66
3.16.6	Atomic force microscopy (AFM)	66
3.16.7	Energy-dispersive X-ray spectroscopy (EDS)	67
3.17	Chemical Analysis.....	67
3.17.1	Fourier transform infrared Spectroscopy (FTIR).....	67
3.17.2	Inductively Coupled Plasma Mass Spectroscopy (ICPMS).....	67
3.17.3	X-ray photoelectron spectroscopy (XPS)	68

3.18	Tribological Analysis.....	68
3.18.1	Coefficient of Friction.....	68
3.18.2	Wear Rate.....	69
CHAPTER 4 SYNTHESIS AND CHARACTERIZATION OF EGGSHELL-DERIVED HYDROXYAPATITE		71
4.1	Synthesis of Eggshell-derived HAp.....	71
4.2	Results and Discussions.....	76
4.2.1	XRD Analysis for multistage calcination.....	76
4.2.2	Flow property of HAp Powder.....	78
4.2.3	Morphology Characterization.....	81
4.2.4	Wettability Analysis.....	89
4.2.5	Mechanical Characterization.....	93
4.2.6	Thermal Analysis.....	96
CHAPTER 5 PHYSIOMECHANICAL, FLOWABILITY AND ANTIBACTERIAL CHARACTERIZATION OF SILVER-DOPED EGGSHELL-DERIVED HYDROXYAPATITE FOR BIOMEDICAL APPLICATIONS.....		99
5.1	Results and discussion.....	100
5.1.1	Flowability Analysis.....	100
5.1.2	Mechanical Characterization.....	102
5.1.3	Morphology Analysis.....	106
5.1.4	FTIR Analysis.....	109
5.1.5	X-ray diffraction Analysis.....	112
5.1.6	Antibacterial Characterization.....	114
5.1.7	Wettability Analysis.....	116
5.1.8	Thermal Analysis.....	120
CHAPTER 6 SYNTHESIS AND CHARACTERIZATION OF PMMA/HAPAG COATING ON Ti6Al4V SUBSTRATE		123
6.1	Results and discussion.....	123
6.1.1	FTIR Analysis.....	124
6.1.2	XRD Analysis.....	125
6.1.3	Adhesion Strength.....	127
6.1.4	Wettability Analysis.....	130
6.1.5	Topographical Analysis.....	133
6.1.6	Well Diffusion Analysis.....	137
CHAPTER 7 TRIBOLOGICAL BEHAVIOR OF PMMA/ HAPAG COMPOSITE		139
7.1	Results and Discussions.....	139

7.1.1	Fourier Transform Infrared Spectroscopy of PMMA-HAPAg composites ...	139
7.1.2	Elemental analysis using X-ray photoelectron spectroscopy	140
7.1.3	Wettability Analysis of PMMA-HAPAg Composite	142
7.1.4	Porosity percentage and Vickers microhardness	143
7.1.5	Effect of normal load on the coefficient of friction.....	145
7.1.6	Effect of particle reinforcement on the COF and wear rate	146
7.1.7	Preliminary visual inspection of worn surfaces.....	149
7.1.8	Transverse wear area analysis using a profilometer	150
7.1.9	Morphological analysis of worn surface	152
CHAPTER 8 CONCLUSIONS AND FUTURE SCOPE.....		159
8.1	Conclusions	159
8.1.1	Conclusion: Synthesis and characterization of HAp	159
8.1.2	Conclusion: Synthesis and characterization of HAPAg	161
8.1.3	Conclusion: Synthesis and characterization of PMMA/HAPAg coating on Ti6Al4V substrate	163
8.1.4	Conclusion: Synthesis and characterization of PMMA/ HAPAg composite .	164
8.2	Future Scope	165
