PREFACE.....	xxi

Chapter 1

Introduction

1.1. Brief History	2
1.2. Synthesis	5
1.3. Characterization of Graphitic Carbon Nitride	8
1.4. Modifications of Graphitic Carbon Nitride	9
1.4.1. Exfoliation:.....	10
1.4.2. Metal/Non-metal Doping:	11
1.4.3. Composites, Co-Polymerization and Heterojunction formation.....	12
1.5. Importance of Graphitic Carbon Nitride as Electrocatalyst.....	13
1.6. Immobilization of Electro-catalyst on Conductive Surfaces	15
1.6.1 Previously reported Immobilization strategies of gCN.....	15
1.6.2. Drop-cast method	19
1.6.3. Electrodeposition/Potentiodynamic Method.....	20
1.7. Electroanalytical Methods	21
1.7.1. Cyclic Voltammetry (CV).....	21
1.7.2. Square Wave Voltammetry	23
1.8. Targeted Parameters for investigating the electrocatalytic ability of modified gCN	24
1.9. Purpose and layout of the Thesis	25
1.10. References.....	26

Chapter 2

Electrodeposition of Graphitic Carbon Nitride (gCN) & gCN.MnO₂ Composite for investigating Electrocatalytic Dopamine oxidation

First Part

2.1.1. Introduction.....	51
2.1.2. Experimental.....	54
2.1.2.1. Materials.....	54
2.1.2.2. Synthesis of gCN.....	54
2.1.2.3 Characterization details.....	55
2.1.2.4. Electrochemical measurements.....	56
2.1.2.4.1 Electrodeposition of gCN, MnO ₂ and gCN.MnO ₂ composite.....	56
2.1.2.4.2 Electroanalytical technique and sample preparation.....	57
2.1.3. Results and Discussion.....	58
2.1.3.1 Physico-chemical characterization of the synthesised and ball-milled gCN ..	58
2.1.3.2 gCN Electrodeposition and In-Situ Decoration with MnO ₂ Nanostructure: ...	62
2.1.3.2.1 Mechanistic Understanding.....	62
2.1.3.2.2 Protocol Optimization.....	65
2.1.3.2.3 Surface Characterization.....	66
2.1.3.3 Voltammetric Sensing of Dopamine as the Test Case.....	71
2.1.3.4 Stability and Reproducibility Studies.....	77
2.1.4. Conclusions.....	78
2.1.5. References:.....	79

Second Part

2.2 Introduction.....	93
2.2.2. Experimental.....	96
2.2.2.1. Materials.....	96
2.2.2.2. Synthesis of gCN.Mn _x O _y composites.....	96
2.2.2.3 Characterization details.....	97
2.2.2.4. Electrochemical measurements.....	97
2.2.2.4.1 Electrodeposition of gCN.MnO ₂ composite.....	98
2.2.2.4.2 Electroanalytical technique and sample preparation.....	98
2.2.2.4.3 Real sample preparation and validation:.....	99
2.2.3. Result's and Discussion.....	100
2.2.3.1 Material Characterization: Examining the two gCN.Mn _x O _y composites.....	100
2.2.3.2 gCN.MnO ₂ electrodeposition and unveiling the underlying mechanism:.....	106

2.2.3.2.1 Protocol Optimization	107
2.2.3.2.2 Surface Characterization	109
2.2.3.3 Analytical performance of modified electrode: Sensing of Dopamine.....	116
2.2.3.4 Real Sample Study	122
2.2.3.5 Reliability Studies	126
2.2.4. Conclusions.....	128
2.2.5. References:.....	129

Chapter 3

In-situ Growth of CuO Nanoflakes on Graphitic Carbon Nitride Sheets: An Electro-active Interface for Electrocatalytic Oxidation of Riboflavin.

3.1 Introduction:.....	145
3.2. Experimental:.....	147
3.2.1 Chemicals	147
3.2.2 Synthesis Protocols	147
3.2.3 Characterization details	147
3.2.4 Electrochemical Set-up	148
3.2.5 Surface modified Electrode: Electrochemical synthesis of CuO nanoflakes decorated gCN.....	148
3.2.6 Electroanalytical Method	149
3.2.7 Real sample preparation:	149
3.3. Results and Discussion	151
3.3.1 Material Characterization: Examining the gCN.CuO composites	151
3.3.2 gCN.CuO electrodeposition and unveiling the underlying mechanism:	154
3.3.2.1 Protocol Optimization	155
3.3.2.2 Surface Characterization	157
3.3.3 Analytical performance of modified electrode: Sensing of Riboflavin	160
3.3.4 Interference Study	163
3.3.5 Real Sample Study	164
3.3.6 Reliability Studies	166
3.4. Conclusions.....	168
3.5. References:.....	169

Chapter 4

Electrodeposited Phosphorous Doped Graphitic Carbon Nitride for Electrocatalytic Oxidation of Tryptophan

4.1. Introduction.....	179
4.2. Experimental:.....	182

4.2.1. Materials.....	182
4.2.2. Material Preparation.....	183
4.2.2.1. Synthesis of gCN.....	183
4.2.2.2. Synthesis of P-doped gCN.....	183
4.2.3 Characterization details.....	183
4.2.4. Electrochemical measurements.....	184
4.2.4.1 Electrodeposition of p-doped gCN Composite.....	184
4.2.4.2 Electroanalytical technique and sample preparation.....	185
4.3. Results and Discussion.....	188
4.3.1 Material Characterization: Examining the gCN and P-doped gCN composites.....	188
4.3.2 P-doped gCN electrodeposition and understanding the fundamental process:	192
4.3.2.1 Protocol Optimization.....	194
4.3.2.2 Surface Characterization.....	195
4.3.3. Assessment of the modified electrode's analytical performance: Tryptophan sensing.....	200
4.3.4 Interference Study.....	203
4.3.5 Real Sample Study.....	203
4.3.6 Stability, Repeatability and Reproducibility.....	206
4.4. Conclusions.....	208
4.5. References:.....	209

Chapter 5

Conclusion, Summary and Future Outlook

5.1. Major findings of each chapter.....	223
5.2. Comparative Evaluation:.....	228
5.2.1. Effect of substrate:.....	228
5.2.2. Comparison of modification strategies:.....	229
5.3. Future Perspective:.....	230
LIST OF PUBLICATIONS.....	232
