List of Figures	xii
List of Tables	xiii
Symbols	xv
1 Introduction	1
1.1 Brief Literature Survey	1
1.2 Important Definitions and Notations	6
1.2.1 Modulus of continuity and Peetre's K -functionals	6
1.2.2 Ditzian-Totik modulus of smoothness	8
1.2.3 Weighted spaces and a Weighed modulus of continuity	9
1.2.4 Definitions for functions of bounded variation	10
1.2.5 Lipschitz class of functions	11
1.2.6 Other important definitions	12
1.3 Motivation and Objective	13
1.4 Organisation of this Thesis	14
2 Approximation by Bernstein type operators	17
2.1 Modified Bernstein-Kantorovich Operators	17
2.1.1 Introduction	17
2.1.2 Preliminary Results	19
2.1.3 Local and Global Approximation Results	20
2.1.4 Voronovskaja-type Asymptotic Results	27
2.1.5 Graphical Examples	32
2.2 Blending type approximation by λ -Bernstein-Beta type operators	33
2.2.1 Introduction	33
2.2.2 Auxiliary Results	36
2.2.3 Local and Global Approximation Results	39
2.2.4 Voronovskaja-type Asymptotic Results	40
2.2.5 A direct Estimation	43

3	Approximation properties of a modified Jain operator	51
3.1	Introduction	51
3.2	Auxiliary Results	53
3.3	Voronovskaja-type Asymptotic Formula	57
3.4	Weighted Approximation	58
3.5	Quantitative Estimation	61
3.6	Rate of Convergence	64
3.7	Graphical Examples	68
4	An intermediate Voronovskaja type theorem for new α-Bernstein Kantorovich type operators	71
4.1	Introduction	71
4.2	A new modification and Auxiliary results	73
4.3	A Voronovskaja-type result	77
4.4	Rate of Convergence	80
4.5	Direct estimation	83
5	Convergence analysis of new complex Durrmeyer operators	91
5.1	Introduction	91
5.2	Recurrence relation	93
5.3	Quantitative upper estimation	97
5.4	Voronovskaja type result	103
6	Numerical solution of Volterra integral equation using λ- Bernstein operators	107
6.1	Introduction	107
6.2	Discretization and Algorithms	109
6.2.1	Algorithm to solve the 2ndVIEs	109
6.2.2	Algorithm to solve the 1stVIEs	111
6.3	Error analysis	113
6.3.1	Error estimation for 2ndVIEs	113
6.3.2	Error estimation 1stVIEs	116
6.4	Numerical Illustrations	119
6.4.1	Test problems	119
6.4.2	Comparision with Bernstein approximation technique	121
7	Conclusions and Future Remarks	125
7.1	Conclusion	125
7.2	Some Future Directions	127
