List of Figures	xvii
List of Tables	xxi
Preface	xxiii
1 Introduction	1
1.1 Background	1
1.2 Biological neurons	2
1.2.1 Biological model	5
1.3 Artificial neural network	10
1.3.1 Activation function	14
1.3.2 Key architectures of ANNs.	18
1.3.3 Architecture of a single-layer feedforward Network	19
1.3.4 Architectures of multi-layer feedforward networks	20
1.3.5 Architecture of recurrent or feedback networks	21
1.3.6 Mesh architectures	22
1.3.7 Basics of electrical circuit	24
1.3.8 Additive model	26
1.3.9 Hopfield neural network	28
1.3.10 Cohen-Grossberg neural network	32
1.4 A comprehensive exploration of mathematical concepts	35
1.4.1 Stability theory	35
1.4.2 Lyapunov stability	37
1.4.3 Lagrange stability	39
1.4.4 Finite and fixed time stability	40
1.4.5 Delay differential Equations	41
1.5 Synchronization	45
1.6 Hypercomplex neural networks	48
1.7 Fractional calculus	52
1.7.1 History	53

1.7.2	Mittag-Leffler function	57
1.7.3	Caputo fractional derivative	57
2	Quasi projective synchronization of time varying delayed complex valued Cohen-Grossberg neural networks	59
2.1	Introduction	59
2.2	Model description and preliminaries	61
2.3	Main results	63
2.4	Simulation examples	73
2.5	Conclusions	76
3	Quasi-Projective synchronization of non-identical time-varying delayed quaternion-valued neural networks with interaction terms: Direct method	77
3.1	Introduction	77
3.2	Model description and preliminaries	78
3.3	Main results	81
3.4	Simulation examples	94
3.5	Conclusions	101
4	Synchronization of hypercomplex neural networks with mixed time-varying delays	103
4.1	Introduction	103
4.2	The mathematical model	104
4.2.1	Definition and lemmas	110
4.3	Lyapunov functional method to achieve FTS	112
4.4	Numerical results	120
4.5	Conclusion	130
5	Lagrange stability criteria for hypercomplex neural networks with time varying delays	131
5.1	Introduction	131
5.2	Some preliminaries and problem formulation	132
5.2.1	Definition and lemmas	135
5.3	Main results	136
5.4	Numerical examples	148
5.5	Conclusion	154
6	Function projective Mittag-Leffler synchronization of non-identical fractional-order neural networks	155
6.1	Introduction	155
6.2	Fractional-order system	156
6.2.1	Problem formulation	159

6.3	Main results	163
6.4	Numerical example	167
6.5	Conclusion	173
7	Lagrange α-exponential synchronization of non-identical fractional-order complex-valued neural networks	175
7.1	Introduction	175
7.2	Mathematical model	176
7.3	Main results	181
7.4	Numerical simulation	189
7.5	Conclusion	192
8	Conclusions and future work	195
8.1	Conclusion	195
8.2	Future work	199
	Bibliography	201
	List of Publications	219

List of Figures

1.1	Schematic structure of a typical neuron.	3
1.2	Schematic illustration of a neuron and a network: Neuron u_i , with a potential $x_i(t)$ relative to equilibrium and transmits a signal S_{ij} along its axon to a target neuron u_j . This signal influences the target neuron with a coupling strength Z_{ij} . The signal can have an excitatory effect ($Z_{ij} > 0$) or an inhibitory effect ($Z_{ij} < 0$). The external inputs I_i are stimuli for the neuron model.	6
1.3	Fundamental diagram of an artificial neuron of the network.	11
1.4	(a) Sigmoidal function, (b) tanh function, (c) Piecewise activation function, (d) Threshold function, (e) RELU function	18
1.5	Single-layer feedforward network	20
1.6	Multi-layer feedforward network	21
1.7	Recurrent feedforward network	22
1.8	Structure of a Mesh network	23
1.9	RC-circuit with a source of voltage.	25
1.10	Additive model of a neuron.	27
1.11	An architecture of Hopfield neural network consisting of $n = 4$ neurons.	29
1.12	Encoding-Decoding illustration between the space of fundamental memories ξ_μ and the space of stored vectors x_μ	30
1.13	Phase portrait for stable and unstable equilibrium point	39
2.1	Synchronization error vs. t for case 1.	74
2.2	Synchronization error vs. t for case 2.	74
2.3	Synchronization error vs. t for case 3 for two identical CGNNs.	75
3.1	Trajectories of real and imaginary components of (3.1) and (3.2) for $\vartheta = 1$	96
3.2	Trajectories of real and imaginary components of (3.1) and (3.2) for $\vartheta = 2$	97
3.3	QPS of error system (3.3).	97
3.4	QS of error system (3.14).	97
3.5	The error of drive (3.25) and response (3.26) systems with interaction terms.	98

3.6	The error of drive (3.25) and response (3.26) systems without interaction terms.	98
3.7	Plot of synchronization error for two identical QVNNs.	98
3.8	Original colour image of pattern “ F ”.	98
3.9	Simulation of retrieving image “ F ” with random initials values of time t	99
4.1	Plots of trajectories of $\omega_1^{(0)}(\mathbf{t})$ and $z_1^{(0)}(\mathbf{t})$, $\omega_1^{(1)}(\mathbf{t})$ and $z_1^{(1)}(\mathbf{t})$, for the master-response systems (4.1) and (4.5) without controllers.	121
4.2	Plots of trajectories of $\omega_1^{(0)}(\mathbf{t})$ and $z_1^{(0)}(\mathbf{t})$, $\omega_1^{(1)}(\mathbf{t})$ and $z_1^{(1)}(\mathbf{t})$, for the master-response systems (4.1) and (4.5) with controllers.	122
4.3	Plots of synchronization errors of CVNNs.	122
4.4	Plots of trajectories of $\omega_1^{(0)}(\mathbf{t})$ and $z_1^{(0)}(\mathbf{t})$, $\omega_1^{(1)}(\mathbf{t})$ and $z_1^{(1)}(\mathbf{t})$, $\omega_1^{(2)}(\mathbf{t})$ and $z_1^{(2)}(\mathbf{t})$, $\omega_1^{(3)}(\mathbf{t})$ and $z_1^{(3)}(\mathbf{t})$ for the master-response systems (4.1) and (4.5) without controllers.	123
4.5	Plots of trajectories of $\omega_1^{(0)}(\mathbf{t})$ and $z_1^{(0)}(\mathbf{t})$, $\omega_1^{(1)}(\mathbf{t})$ and $z_1^{(1)}(\mathbf{t})$, $\omega_1^{(2)}(\mathbf{t})$ and $z_1^{(2)}(\mathbf{t})$, $\omega_1^{(3)}(\mathbf{t})$ and $z_1^{(3)}(\mathbf{t})$ for the master-response systems (4.1) and (4.5) with controllers.	124
4.6	Plots of synchronization errors of QVNNs.	124
4.7	Plots of trajectories of $\omega_1^{(\rho)}(\mathbf{t})$ and $z_1^{(\rho)}(\mathbf{t})$ where $\rho = 0, 1, 2, 3, 4, 5, 6, 7$, for the master-response systems (4.1) and (4.5) without controllers.	126
4.8	Plots of trajectories of $\omega_1^{(\rho)}(\mathbf{t})$ and $z_1^{(\rho)}(\mathbf{t})$ where $\rho = 0, 1, 2, 3, 4, 5, 6, 7$, for the master-response systems (4.1) and (4.5) with controllers.	127
4.9	Plots of synchronization errors of OVNNs.	128
5.1	Plots of real component trajectories $s_1^{(0)}(t)$, $s_2^{(0)}(t)$, and imaginary component trajectories $s_1^{(1)}(t)$, $s_2^{(1)}(t)$ for the system (5.1).	149
5.2	Plots of stability of CVNNs in (a) Lagrange and (b) Lyapunov sense.	150
5.3	Plots of trajectories of $s_j^{(i)}(t)$, $j = 1, 2$ and $i = 0, 1, 2, 3$ for the QVNN system (5.1).	151
5.4	Plots of stability of QVNNs in (a) Lagrange sense and (b) Lyapunov sense.	151
5.5	Plots of trajectories of $s_1^{(i)}(t)$ where $i = 0, 1, 2, 3, 4, 5, 6, 7$, for the system (5.1).	153
5.6	Plots of stability of OVNNs in (a) Lagrange sense and (b) Lyapunov sense.	153
6.1	Phase portraits of FONNs with master (6.28) and response (6.29) systems	168
6.2	Plots of the state trajectories of master and response systems (6.28) and (6.29) with $k_1(t) = 0.05\cos(0.02\chi_1(t))+0.01$, $k_2(t) = 0.02\cos(0.01\chi_2(t))+0.02$, and $k_3(t) = 0.01\cos(0.03\chi_3(t)) + 0.04$ at $q = 0.97$	168
6.3	Plots of the state trajectories of master and response systems (6.28) and (6.29) with $k_1 = 1.9$, $k_2 = 2$, $k_3 = 1.8$ at $q = 0.97$	170

6.4	Plots of the state trajectories of the systems (6.28) and (6.29) with $k_{\hbar} = 1, \hbar = 1, 2, 3$ at $q = 0.97$	171
6.5	Plots of the state trajectories of the systems (6.28) and (6.29) with $k_{\hbar} = -1, \hbar = 1, 2, 3$ at $q = 0.97$	172
7.1	Plots of 2- D state trajectories of the drive and response systems.	190
7.2	Plots of synchronization error of non-identical FOCVNNs in Lagrange sense.	190
7.3	Plots of synchronization error of non-identical FOCVNNs in Lyapunov sense.	190
7.4	Plots of state trajectories of real components of the systems (7.18) and (7.19) with respect to time.	191
7.5	Plots of state trajectories of imaginary components of the systems (7.18) and (7.19) with respect to time.	191

List of Tables

1.1	Comparison between artificial and biological neural network.	11
1.2	Complex Numbers	51
1.3	Hyperbolic numbers	51
1.4	Dual Numbers	51
1.5	Quaternions	51
1.6	Octonions	51
