Roll No. 17031504

2023

INDIAN INSTITUTE OF TECHNOLOGY
(BANARAS HINDU UNIVERSITY),
VARANASI-221005

CERTIFICATE

This is to certify that the work contained in the thesis titled "*SYNTHESIS AND THERMO-MECHANICAL CHARACTERIZATION OF POROUS CERAMIC AND CERAMIC FOAM COMPOSITE*" by "*VAIBHAV PANDEY*" has been carried out under my/our supervision and that this work has not been submitted elsewhere for a degree.

It is further certified that the student has fulfilled all the requirements of Comprehensive Examination, Candidacy and SOTA for the award of Ph.D. Degree.

Co-Supervisor

Prof. V. K. Singh

DECLARATION BY THE CANDIDATE

I "*Vaibhav Pandey*", certify that the work embodied in this thesis is my own bona fide work and carried out by me under the supervision of "*Prof. S. K. Panda*" from "*DECEMEBR 2017 to JULY 2023*", at the "*DEPARTMENT OF MECHANICAL ENGINEERING*", Indian Institute of Technology (BHU), Varanasi. The matter embodied in this thesis has not been submitted for the award of any other degree/diploma.

I declare that I have faithfully acknowledged and given credits to the research workers wherever their works have been cited in my work in this thesis. I further declare that I have not willfully copied any other's work, paragraphs, text, data, results, *etc.*, reported in journals, books, magazines, reports dissertations, theses, *etc.*, or available at websites and have not included them in this thesis and have not cited as my own work.

Date: *12/07/2023*

Place: *IIT BHU Varanasi*

Acknowledgement

I take immense joy in conveying my heartfelt appreciation to Prof. Saroja Kanta Panda, my Supervisor from the Department of Mechanical Engineering at IIT(BHU). I am profoundly grateful for his unwavering guidance, continuous encouragement, and his genuine teaching approach, which have played a pivotal role at every step of my journey. Without his support, my accomplishments would have been impossible.

Furthermore, I extend my sincere thanks to Prof. Vinay Kumar Singh, my co-supervisor from the Department of Ceramic Engineering at IIT(BHU). His profound knowledge of Ceramics and provision of state-of-the-art experimental facilities have been invaluable assets to me. I would also like to express my gratitude to Dr. Kalyani Mohanta for her mentorship and for introducing me to the captivating realm of "Voids" in "Ceramic." Her contributions have paved the way for my research in the field of "Porous Ceramic," and I am eternally grateful.

My heartfelt appreciation also goes to all the members of the RPEC (Research Project Evaluation Committee) for their continuous suggestions, which have been instrumental in enhancing my work. Their valuable inputs have significantly contributed to the overall improvement of my research. I extend my sincere thanks to the entire technical staff of the Department of Ceramic and Mechanical Engineering for granting me access to the departmental lab facilities, as well as to CIFC for their unwavering support in providing instrumentation facilities.

I am deeply indebted to my batchmate, Mr. Ashutosh Gupta, a Research Scholar in the Department of Ceramic Engineering, for his unwavering support. Without his constant assistance, completing this journey would have been an arduous task. I also extend special thanks to my junior, Mr. Mayank Kumar Yadav, whose brotherly approach and helpful nature have been a tremendous support whenever I needed it.

I would like to express my appreciation to Dr. Ajay Kumar, Dr. Jyoti Kuntail, Dr. Praveen Kumar Singh, Dr. Ashish Singh Pareta, Mr. Anupam Tiwari, Mr. Satyendra Kumar Singh, Mr. Ashwani Gautam, Mr. Vivek Kumar Singh, Mr. Vaibhav Singh, Mr. Anand Gupta, Mr. Deepak Sachan, Mr. Ashish Chauksi, Mr. Uttam Kumar, Mr. Sujeet Pimple, Mr. Ishwari, Mr. Harsh Jain and all my other friends, seniors, and juniors at IIT BHU for accompanying me throughout this journey and making it a truly memorable experience.

I am also grateful to my lifelong friends, Akshay Saxsena, Anurag Kumar, Mayank Sonkar, Abhishek Mani, Vaibhav Harale, Keshav Jha, Sachin Shahi, whose support and well wishes have always been with me, even in their absence, providing me with strength.

I would also like to express my deepest gratitude to my sister, Mrs. Alka Dubey. Her elderly presence and blessings have not only doubled my energy and determination but have also brought immense joy and positivity to my journey. Furthermore, I want to acknowledge the guidance and life lessons provided by my Jija, Mr. Shankarsan Dubey. His wisdom and insights have been instrumental in shaping my perspective and approach, and I am thankful for his valuable contributions to my personal and academic growth.

I would also like to mention my niece and nephew, Mr. Atharav Dubey and Ms. Akshita Dubey. Their presence has added a lightness and joy to even the most stressful situations, and I am grateful to have them as a part of my life.

Additionally, I extend my heartfelt appreciation to my wife Mrs. Niharika Pandey. Her unconditional love, support, sacrifices, and prayers have been instrumental in making this thesis a reality. Her unwavering belief in me has been a constant source of inspiration, and I am forever grateful for her presence in my life.

Last but certainly not least, I would like to express my deepest gratitude to my parents for their unconditional love, unwavering belief in my abilities, and constant encouragement throughout my academic journey. Their sacrifices and guidance have been the bedrock of my success, and I will forever be grateful for their unwavering support.

Finally, I want to acknowledge the blessings, strength, and guidance bestowed upon me by the Almighty God. His presence has instilled hope in me and the determination to overcome challenges along the way. A special thanks to the deities "Shree Kashi Vishwanath," "Maa Annapurna," and "Baba Kaal Bhairav" for granting me the opportunity and strength to complete this journey in the beautiful and eternal city of "Varanasi."

FIG. 7.9 SEM MICROSTRUCTURE OF SiC FOAM (A) 5 WT% SUCROSE, (B) 10 WT% SUCROSE, (C) 5 WT% MW-5 WT% SUCROSE, (D) 20 WT% MW-5 WT% SUCROSE, (E) 5 WT% ALUMINA-10 WT% MW-5 WT% SUCROSE, (F) 10 WT% ALUMINA-10 WT% MW-5 WT% SUCROSE, (E) 5	

WT% ALUMINA-40 WT% MW-5 WT% SUCROSE, (F) 10 WT% ALUMINA-40 WT% MW-5 WT% SUCROSE	137
FIG. 7.10 SEM IMAGE OF SiC FOAM TREATED WITH 5 WT% SUCROSE, 10 WT% MW, 10 WT% ALUMINA AND SINTERED AT 1400°C, SHOWING DEVELOPMENT OF MULLITE RODS	138
FIG. 8.1 (A) XRD OF RAW RM, (B) TGA OF RH.....	144
FIG. 8.2 VARIATION OF APPARENT POROSITY OF FIRED BRICKS WITH RH CONTENT PREPARED WITH DIFFERENT PARTICLE SIZE OF RH AND MW AND SINTERED AT DIFFERENT TEMPERATURES (A)- 1000°C (B)- 1100°C (C)- 1200°C (D)- 1300°C (E)- 1400°C (F)- 1500°C	147
FIG. 8.3 VARIATION OF APPARENT POROSITY OF FIRED BRICKS WITH RH CONTENT PREPARED WITH DIFFERENT PARTICLE SIZE OF RH AND MW AND SINTERED AT DIFFERENT TEMPERATURES (A)- 1000°C (B)- 1100°C (C)- 1200°C (D)- 1300°C (E)- 1400°C (F)- 1500°C	149
FIG. 8.4 VARIATION OF CCS OF FIRED BRICKS WITH RH CONTENT PREPARED WITH DIFFERENT PARTICLE SIZE OF RH AND MW AND SINTERED AT DIFFERENT TEMPERATURES (A)- 1000°C (B)- 1100°C (C)- 1200°C (D)- 1300°C (E)- 1400°C (F)- 1500°C	151
FIG. 8.5 THERMAL CONDUCTIVITY VARIATION OF FIRED REFRACTORY WITH SINTERING TEMPERATURE.....	152
FIG. 8.6 (A) PICTORIAL REPRESENTATION OF PORE FORMATION MECHANISM AND EFFECT OF MW AND RH SIZE ON POROSITY, (B) PHYSICAL PROPERTIES VARIATION OF FIRED REFRACTORIES OF VARIOUS COMPOSITIONS	154
FIG. 8.7 (A) XRD PATTERN OF FIRED REFRACTORY SINTERED AT DIFFERENT TEMPERATURES, (B) SEM IMAGE OF INNER CROSS-SECTION OF FIRED REFRACTORY SHOWING CLOSED AND OPEN PORES, (C) EDS ANALYSIS SHOWING ELEMENTAL PROPORTIONS IN THE FIRED REFRACTORY WITH SEM IMAGE SHOWING EXISTENCE OF MULLITE RODS.....	156
FIG. 8.8 (A) XRD PATTERN OF FIRED BRICK WITH VARYING RM COMPOSITION	159
FIG. 8.9 EFFECT OF VARYING MW:RM WEIGHT RATIO OF FIRED BRICKS ON BULK DENSITY ...	160
FIG. 8.10 EFFECT OF VARYING MW:RM WEIGHT RATIO OF FIRED BRICKS ON APPARENT POROSITY.....	160
FIG. 8.11 EFFECT OF VARYING MW:RM WEIGHT RATIO OF FIRED BRICKS ON COLD CRUSHING STRENGTH.....	161
FIG. 8.12 EFFECT OF VARYING MW:RM WEIGHT RATIO OF FIRED BRICKS ON THERMAL CONDUCTIVITY	161
FIG. 9.1 APPLICATION ACCORDING TO POROSITY OBTAINED THROUGH VARIOUS METHODS	168

FIG. 9.2 APPLICATION ACCORDING TO PORE SIZE OBTAINED THROUGH VARIOUS METHODS 170

List of Tables

TABLE 3.1 DIFFERENT MIXTURE COMPOSITIONS, THE CORRESPONDING MICROSTRUCTURAL PROPERTIES OF SINTERED POROUS ALUMINA FABRICATED VIA ALUMINA DISSOLUTION PROCESS IN ACIDIFIED AQUEOUS MEDIA	47
TABLE 3.2 THERMO-MECHANICAL PROPERTIES OF SINTERED POROUS ALUMINA FABRICATED VIA ALUMINA DISSOLUTION PROCESS IN ACIDIFIED AQUEOUS MEDIA	49
TABLE 4.1 SILICA AND SILICA BASED POROUS COMPOSITES WITH PROPOSED APPLICATION.	62
TABLE 4.2 DIFFERENT MIXTURE COMPOSITIONS, THE CORRESPONDING MICROSTRUCTURAL PROPERTIES OF POROUS SILICA SAMPLES FABRICATED USING SUCROSE DEHYDRATION PROCESS	72
TABLE 4.3 PHYSICAL AND MECHANICAL PROPERTIES OF SILICA FOAM/ SILICA FOAM COMPOSITES PROCESSED THROUGH VARIOUS ROUTE.	78
TABLE 4.4 COST ANALYSIS OF THE PREPARED SILICA FOAM.....	79
TABLE 5.1 PHYSICAL, CHEMICAL, AND MINERALOGICAL COMPOSITIONS OF COAL MINE OVERBURDEN WASTE (MW)	87
TABLE 5.2 DIFFERENT MIXTURE COMPOSITIONS, THE CORRESPONDING MICROSTRUCTURAL PROPERTIES OF PAC FABRICATED USING ALUMINA DISSOLUTION PROCESS	102
TABLE 6.1 ENVIRONMENTAL AND DURABILITY PROPERTIES OF SELECTED MG-MS FOAM (TCLP TEST).....	116
TABLE 6.2 DIFFERENT MIXTURE COMPOSITIONS, THE CORRESPONDING MICROSTRUCTURAL PROPERTIES OF FG-MS FOAMS FABRICATED USING SUCROSE DEHYDRATION PROCESS.	121
TABLE 6.3 COST ANALYSIS OF THE DEVELOPED MW DERIVED FG-MS FOAM.....	123
TABLE 8.1 XRF ANALYSIS OF RM.....	145
TABLE 8.2 PHYSICAL PROPERTIES OF INSULATING BRICKS (IS 2042: 2006).....	145
TABLE 8.3 ENVIRONMENTAL AND DURABILITY PROPERTIES OF SELECTED FIRED INSULATING BRICK (TCLP TEST).	157
