List of Abbreviations and Symbols.....	xvi
PREFACE	xviii
CHAPTER 1 General Introduction.....	1
1.1 Overview and Problem Statement.....	1
1.2 Synthetic Dyes: Sources and Major Consequences	2
1.2.1 Classification of Synthetic Dyes.....	3
1.2.2. The detrimental effect of textile dyes	5
1.3 Textile Wastewater Treatment Techniques	6
1.3.1 Physiochemical Techniques	6
1.3.2 Advanced oxidation processes (AOPs)	8
1.4 Sustainable (Green) approach for the synthesis of nanoparticles.....	10
1.4.1 Green synthesis of TiO ₂ nano-photocatalyst	11
1.4.2 Green reduction of Graphene oxide (GO) nano-adsorbent	12
1.4.3 Antibacterial activity analysis of green synthesized nanoparticles	13
1.4.4 Sustainable production of hydrochar from waste biomass.....	14
1.5 The broad objective of the present research.....	15
Chapter 2.....	17
Literature Review and Research Objective.....	17
Abstract.....	17

2.1 Literature review	17
2.1.1 Green synthesis of TiO ₂ NPs to use as a photocatalyst	17
2.1.2 Green synthesized nano-adsorbents used as nano-adsorbents for dye removal and antibacterial analysis.....	26
2.1.3 Sustainable conversion of biomass into adsorbents for dye removal from wastewater	34
2.2 Literature Summary and Research Gap	41
2.3 Objectives and Aims of Research.....	42
Chapter 3	43
Green synthesis of TiO ₂ nanoparticles using <i>Tinospora cordifolia</i> plant extract & its potential application for photocatalysis and antibacterial activity.....	43
Abstract.....	43
3.1 Introduction	45
3.2 Materials & methods	47
3.2.1 Materials	47
3.2.2 Preparation of Plant Extract.....	48
3.2.3 Green synthesis of TiO ₂ NPs	48
3.2.4 Characterization of Green synthesized TiO ₂ NPs.....	49
3.2.5 Photocatalytic degradation of Acid Blue 113 dye	50
3.2.6 Antibacterial activity of TiO ₂ NPs using agar well diffusion method.....	50
3.2.7 Statistical analysis.....	51
3.3. Results & Discussion	51
3.3.1 X-ray diffraction	51
3.3.2 UV-Vis spectrophotometer analysis and computation of energy band gap (E _g) of TiO ₂ NPs.....	53
3.3.3 Brunauer-Emmett-Teller (BET) surface area	55
3.3.4 FTIR spectral analysis	56
3.3.5 Zeta Potential and Particle Size Distribution of TiO ₂ NPs	57
3.3.6 SEM analysis	58
3.3.7 Photocatalytic activity of the synthesized photocatalyst	60
3.3.8 Kinetic Study	64
3.3.9 Antimicrobial activity.....	65
3.4 Conclusions	68

Chapter 4.....	69
Green synthesis of reduced graphene oxide using <i>Tinospora cordifolia</i> plant extract: Exploring its potential for methylene blue dye degradation and antibacterial activity	69
Abstract.....	69
4.1. Introduction	71
4.2. Materials and Methodology.....	74
4.2.1 Materials	74
4.2.2 Extract preparation of <i>T. cordifolia</i> plant stem.....	74
4.2.3 Preparation of GO.....	74
4.2.4 Green synthesis of rGO using <i>T. cordifolia</i> stem extract	75
4.2.5 Characterization of GO and G-rGO.....	76
4.2.6 Batch adsorption experiments	76
4.2.7 Adsorption kinetics.....	77
4.2.8 Antibacterial activity of G-rGO.....	78
4.2.9 Optimization of adsorption using Response Surface Methodology (RSM).....	78
4.3 Result and Discussions.....	81
4.3.1 Characterization of GO and G-rGO.....	81
4.3.2 Estimation of removal of MB dye using Response Surface Methodology (RSM)	87
4.3.3 Adsorption isotherm	97
4.3.4 Kinetic study.....	99
4.3.5 Recycling test of the adsorbent.....	100
4.3.6. Antibacterial activity of G-rGO.....	101
4.4. Conclusions	103
Chapter 5.....	104
Adsorption potential of hydrochar derived from hydrothermal carbonization of waste biomass towards the removal of methylene blue dye from wastewater	104
Abstract.....	104
5.1 Introduction	105
5.2 Materials and Methodology.....	107
5.2.1 Materials selection and preparation.....	107
5.2.2 HTC experiment	108
5.2.3 Characterization of hydrochar obtained from HTC and biomass.....	109
5.2.4 Batch adsorption removal of MB: Experimental method.....	110

5.3 Results and Discussions	111
5.3.1 Characterizations of both adsorbent hydrochar and biomass	111
5.3.2 Study of batch adsorption of MB onto hydrochar and biomass	118
5.3.3 Kinetics and Mass Transfer	124
5.3.4 Adsorption Isotherms Models	133
5.3.5 Thermodynamic parameters	138
5.4. Conclusions	141
Chapter 6	142
Summary, Conclusions, and Scope for Future Work	142
6.1 Summary of the Thesis	143
6.2 Conclusions	143
6.3 Scope for Future Work.....	144
References.....	145
