List of Figures	xi
List of Tables	xiii
Preface	xv
1 Introduction	1
1.1 Diffusion process	1
1.2 Reaction-advection-diffusion equation	2
1.3 Fractional calculus	5
1.4 Special functions	9
1.4.1 Euler's Gamma function	9
1.4.2 Mittag-Leffler function	9
1.4.3 Wright function	10
1.4.4 Error function and complementary error function	11
1.5 Fractional order reaction-advection-diffusion equation	11
1.6 Basic definitions of fractional calculus	12
1.6.1 Riemann-Liouville fractional integral	13
1.6.2 Riemann-Liouville fractional derivative	13
1.6.3 Caputo derivative	14
1.7 Mathematical preliminaries	15
1.7.1 Lucas polynomials	15
1.7.2 Vieta-Fibonacci polynomials	16
1.7.3 Shifted Vieta-Fibonacci polynomials	17
1.7.4 Kronecker product	18
1.8 Challenges and motivation	19
2 Numerical solution of two-dimensional nonlinear fractional order reaction-advection-diffusion equation by using collocation method	21
2.1 Introduction	21

2.1.1	Approximation of function	24
2.2	OM of derivative in terms of Lucas polynomials	24
2.3	Numerical method to solve two-dimensional fractional order diffusion model	26
2.4	Numerical examples	29
2.5	Solution of the problem	36
2.6	Conclusion	38
3	Novel operational matrix method for the numerical solution of non-linear reaction-advection-diffusion equation of fractional order	39
3.1	Introduction	39
3.1.1	Function approximation	43
3.2	Formation of shifted Vieta-Fibonacci operational matrix	44
3.3	Application of the proposed method	47
3.4	Convergence analysis	49
3.5	Numerical applications	52
3.6	Solution of the problem	55
3.7	Conclusion	58
4	An innovative Vieta-Fibonacci wavelet collocation method for the numerical solution of three-component Brusselator reaction diffusion system of fractional order	61
4.1	Introduction	61
4.2	Vieta-Fibonacci wavelets	65
4.2.1	Vieta-Fibonacci wavelets	66
4.3	Derivation of VF wavelet OM	67
4.3.1	OM of integer order derivative	68
4.3.2	OM of fractional order derivative	69
4.4	Existence, uniqueness, and stability results	72
4.4.1	Existence and uniqueness	73
4.4.2	Ulam-Hyers stability	83
4.5	Implementation of the approach	87
4.6	Error bound analysis	90
4.7	Numerical results	94
4.8	Conclusion	102
5	Numerical solution of nonlinear reaction-advection-diffusion equation in sense of Caputo-Fabrizio derivative with finite difference and collocation method	103
5.1	Introduction	103
5.2	Preliminary definitions	105
5.2.1	C-F derivative and integral	105

5.2.2	Shifted Legendre polynomials	106
5.3	C-F approximation	107
5.4	Numerical technique	109
5.5	Error analysis	112
5.6	Numerical results and discussion	116
5.7	Conclusion	126
6	Conclusion and future work	127
6.1	Future work	128
	Bibliography	131

List of Figures

2.1	Plots of solute profile vs. x and y for non-conservative system with sink term ($k = -1$) for various values of α	37
2.2	Plots of solute profile vs. x and y for conservative and non-conservative systems for $\alpha=1$ at $t=0.5$	37
3.1	Behaviour of exact and numerical solutions for $n = 8$ at $\alpha = 0.5$ for Example 3.1.	53
3.2	Behaviour of exact and numerical solutions for $n = 3$ at $\alpha = 0.7$ for Example 3.2	55
3.3	Variations of $u(x, 0.5)$ vs. x for various values of α for $\lambda_1 = 0.5$, $\lambda_2 = 1$ at $t = 0.5$	56
3.4	Variations of $u(x, 0.5)$ vs. x for various values of α for $\lambda_1 = 0.5$, $\lambda_2 = 0$ at $t = 0.5$	56
3.5	Variations of $u(x, 0.5)$ vs. x for various values of α for $\lambda_1 = 0.5$, $\lambda_2 = -1$ at $t = 0.5$	57
3.6	Variations of $u(x, 0.5)$ vs. x for various values of λ_2 for $\alpha = 1$, $\lambda_1 = 0.5$ at $t = 0.5$	57
3.7	Variations of $u(x, 0.5)$ vs. x for various values of λ_1 for $\alpha = 1$ and $\lambda_2 = 1$ at $t = 0.5$	58
4.1	Behaviour of exact solutions and their corresponding Error graph at $t = 0.5$ for Example 4.1 at $\hat{m} = 9$	96
4.2	Graph for the variation in concentrations for different values of α at $t = 0.1$ for Example 4.1 at $\hat{m} = 8$	97
4.3	Behaviour of exact solutions and their corresponding Error graphs at $t = 0.5$ for Example 4.2 at $\hat{m} = 12$	99
4.4	Graph for the variation in concentrations for different values of α at $t = 0.1$ for Example 4.2 at $\hat{m} = 8$	100
4.5	Variations in errors for different values of \hat{m} at $t = 0.5$ and $\alpha = 0.70$ for Example 4.3.	101
5.1	Plot of $u(x, t)$ versus x for Example 5.1 in case of Exact and Numerical solution.	117
5.2	Plot of $u(x, t)$ versus x for Example 5.2 in case of Exact and Numerical solution.	119

5.3	Plot of $u(x, t)$ versus x for Example 3 in case of Exact and Numerical solution.	120
5.4	Plot of $u(x, t)$ versus x for Example 4 in case of Exact and Numerical solution.	122
5.5	Plot between $u(x, 0.5)$ versus x for Example 5.5 at $\beta = 1.5$ for various values of α	124
5.6	Plot between $u(x, 0.5)$ versus x for Example 5.5 at $\beta = 1.9$ for various values of α	124
5.7	Plot between $u(x, 0.5)$ versus x for Example 5.5 at $\alpha = 0.5$ for various values of β	125
5.8	Plot between $u(x, 0.5)$ versus x for Example 5.5 at $\alpha = 0.9$ for various values of β	125

List of Tables

2.1	The absolute errors for $n = 8$ and $n = 10$ with $\alpha = 0.4$ at $t = 0.5$ for Example 2.1	31
2.2	The absolute errors for $n = 8$ and $n = 10$ with $\alpha = 0.8$ at $t = 0.5$ for Example 2.1	31
2.3	The absolute errors for $n = 8$ and $n = 10$ at $t = 0.5$ for Example 2.2 .	32
2.4	The absolute errors for $n = 8$ and $n = 10$ at $t = 0.5$ for Example 2.3 .	33
2.5	The absolute errors for $n = 8$ and $n = 10$ at $t = 0.5$ for Example 2.4 .	34
2.6	The absolute errors for $n = 8$ and $n = 10$ at $t = 0.5$ for Example 2.5 .	35
3.1	The maximum absolute errors at $t = 1$ for different values of α for Example 3.1	53
3.2	The maximum absolute errors at $t = 0.5$ for $n = 6$ for Example 3.2 . .	54
4.1	Tabular presentation of absolute errors for different values of α at $t = 0.5$ and $\hat{m} = 12$ for Example 4.1	95
4.2	Tabular presentation of absolute errors for different values of \hat{m} at $\alpha = 0.73$ and $t = 0.5$ for Example 4.2	98
4.3	Comparison of exact and numerical solution at $\alpha = 0.70$ and $t = 0.4$ for Example 4.3	101
5.1	variations of absolute errors at $x = 0.5$ and for different values of h for Example 5.1	118
5.2	variations of absolute errors at $x = 0.5$ and for different values of h for Example 5.2	119
5.3	variations of absolute errors at $x = 0.5$ and for different values of h for Example 5.3	121
5.4	Comparison of absolute errors at $h = \frac{1}{512}$ and for different values of x for Example 5.4	122
