# List of figures

|     |  |    |
|-----|--|----|
| 1.1 | Size comparison of particulate matters. Source: US EPA (United States Environmental Protection Agency). . . . .  | 4  |
| 2.1 | Factors considered in various PM exposure studies around the world. . . .  | 14 |
| 2.2 | Schematic diagram of continuous pollution monitoring process. . . . .  | 26 |
| 2.3 | Schematic diagram of on-road pollution monitoring process. . . . .   | 29 |
| 3.1 | PM data collection on routes and traffic intersections in Varanasi, India. .   | 33 |
| 3.2 | Land use details of the study area . . . . .   | 34 |
| 3.3 | Instrumentation setup: (a) DustTrak aerosol monitor for collecting PM concentration data; (b) Garmin device for GPS coordinates; (c) HTC data logger for RH and AT logging; (d) an action video camera (e) backpack with aerosol monitor, GPS receiver, and RH & AT data logger; (f) motorcycle fitted with action camera. . . . . | 35 |
| 3.4 | Number of trips made on routes in different seasons. . . . .   | 37 |
| 3.5 | Overall flowchart of analysis, results, discussion, and findings of the four objectives of the study. . . . .  | 39 |
| 4.1 | Monitoring locations of air pollutants inside and outside the university campus. . . . .   | 44 |
| 4.2 | Process of mapping on-road pollution exposure. . . . .   | 47 |
| 4.3 | Ratio of PM exposure outside to inside campus. . . . .   | 53 |
| 4.4 | Comparison of inside and outside PM ( $\mu\text{g m}^{-3}$ ) exposure during weekdays and weekends. . . . .  | 54 |

---

|      |  |    |
|------|--|----|
| 4.5  | Comparison of the effect of day of the week on trips to outside university locations. . . . .  | 55 |
| 4.6  | Comparison of PM levels at different hours of the day. . . . .   | 57 |
| 4.7  | Inside and outside PM <sub>2.5</sub> and PM <sub>10</sub> exposure maps of the university campus.  | 58 |
| 4.8  | Linear relationship between exposure to particulate matter inside and outside the campus. . . . .  | 59 |
| 5.1  | Speed distribution on routes in different seasons. . . . .   | 67 |
| 5.2  | AT distribution on routes in different seasons. . . . .  | 68 |
| 5.3  | RH distribution on routes in different seasons. . . . .  | 68 |
| 5.4  | On-road (a) PM <sub>2.5</sub> and (b) PM <sub>10</sub> exposure on routes in different seasons. .  | 70 |
| 5.5  | On-road (a) PM <sub>2.5</sub> and (b) PM <sub>10</sub> exposure during different seasons and hours of the day. . . . .   | 73 |
| 5.6  | PM exposure during different day of week and seasons. . . . .  | 76 |
| 5.7  | Weekdays vs weekend PM exposure during different seasons. . . . .  | 77 |
| 5.8  | Spatial variability of (a) PM <sub>2.5</sub> and (b) PM <sub>10</sub> on different routes during the study period. . . . .   | 79 |
| 5.9  | Ratio of fine and coarse PM for on-road and reference locations. . . . .   | 81 |
| 5.10 | Comparison of on-road and reference (a) PM <sub>2.5</sub> and (b) PM <sub>10</sub> exposure on different routes during different seasons and hours of the day. . . . . | 83 |
| 5.11 | Correlation among on-road and reference PM concentration, traffic speed, and meteorological parameters. . . . .  | 84 |
| 5.12 | Quantification of on-road PM concentrations during (a) winter, (b) spring, (c) summer using reference PM concentrations. . . . .                                       | 86 |
| 5.13 | PM inhaled dose per trip on routes during different seasons. . . . .   | 88 |
| 5.14 | PM inhaled dose per km on routes during different seasons. . . . .   | 89 |

---

|      |   |     |
|------|---|-----|
| 6.1  | Computation of zone of influence (ZoI) and extraction of intersection PM data. . . . .                              | 99  |
| 6.2  | Identification of the Zone of Influence (ZoI) at an Intersection. . . . .   | 100 |
| 6.3  | Threshold stability plot for $PM_{2.5}$ observed during (a) Summer, (b) Spring and (c) Winter season. . . . .       | 109 |
| 6.4  | Posterior distribution of parameters for (a) $PM_{2.5}$ and (b) $PM_{10}$ during different seasons. . . . .         | 110 |
| 6.5  | Monthly return levels of (a) $PM_{2.5}$ and (b) $PM_{10}$ during different seasons. . . . .                         | 112 |
| 6.6  | The probability of observing severe PM levels in Delhi's smog event. . . . .  | 113 |
| 6.7  | Trace plot for model checking for (a) $PM_{2.5}$ and (b) $PM_{10}$ . . . . .  | 114 |
| 6.8  | Posterior predictive check for (a) $PM_{2.5}$ and (b) $PM_{10}$ . . . . .   | 115 |
| 6.9  | Sensitivity analysis of (a) $PM_{2.5}$ and (b) $PM_{10}$ return levels with different thresholds. . . . .           | 115 |
| 6.10 | Average (a) $PM_{2.5}$ and (b) $PM_{10}$ extreme pollution hotspots at traffic intersections during winter. . . . . | 117 |
| 7.1  | Representation of study routes in terms of various sections. . . . .  | 121 |
| 7.2  | Steps for manual vehicle counting. . . . .  | 122 |
| 7.3  | Example of an extracted raw image using Python. . . . .   | 123 |
| 7.4  | Performance evaluation YOLOv5 by confusion matrix. . . . .  | 124 |
| 7.5  | Performance evaluation of YOLOv5 by Precision-Recall Curve. . . . .   | 125 |
| 7.6  | Vehicle classification by YOLOv5. . . . .   | 126 |
| 7.7  | Steps involved in automated vehicle counting. . . . .   | 126 |
| 7.8  | Average (a) $PM_{2.5}$ and (b) $PM_{10}$ exposure along different sections of the study routes. . . . .             | 131 |

# List of tables

|     |  |    |
|-----|--|----|
| 2.1 | List of air pollution regulatory and control boards across different countries.  | 23 |
| 2.2 | List of major pollutants' satellite monitoring instruments and their spatiotemporal resolutions (Adopted from: AbdelSattar, 2019). | 24 |
| 2.3 | Working principles and pollutants monitored by various CAAQMS.   | 26 |
| 2.4 | Specification of instruments used for in-vehicle pollution monitoring (Adopted from: Kumar et al., 2011).                          | 28 |
| 3.1 | Specification of instruments used during the field study.  | 35 |
| 4.1 | Summary of studies on PM exposure in various outdoor environments of university campuses.  | 42 |
| 4.2 | Average (SD) PM exposure for trips from the campus to key locations.   | 50 |
| 4.3 | Comparison of PM exposure ( $\mu\text{g m}^{-3}$ ) between trip portions outside and inside the campus.                            | 51 |
| 4.4 | Ratio and percentage share of aggregate concentrations for trip portions inside and outside the campus.                            | 52 |
| 4.5 | PM dose ( $\mu\text{g}$ ) inhaled during Weekday (Weekend) trips to destinations outside the campus.                               | 60 |
| 4.6 | Difference in PM doses between trip portions inside and outside the university campus.   | 61 |
| 5.1 | List of PM exposure studies carried out on motorcycles around the world.   | 65 |
| 5.2 | Summary of the trip and trip-related information.  | 69 |
| 5.3 | Summary of on-road PM <sub>2.5</sub> ( $\mu\text{g m}^{-3}$ ) concentrations during different seasons.                             | 71 |
| 5.4 | Summary of on-road PM <sub>10</sub> ( $\mu\text{g m}^{-3}$ ) concentrations during different seasons.                              | 72 |

---

|     |  |     |
|-----|--|-----|
| 5.5 | One-way ANOVA between season-wise PM <sub>2.5</sub> concentrations. . . . .  | 73  |
| 5.6 | One-way ANOVA between season-wise PM <sub>10</sub> concentrations. . . . .   | 74  |
| 5.7 | PM ratio (Fine/coarse ratio or PM <sub>2.5</sub> /PM <sub>10</sub> ratio during various seasons. . .                                       | 81  |
| 5.8 | Summary of inhaled doses by the motorcyclists in Varanasi. . . . .   | 87  |
| 6.1 | Summary of PM extreme value analyses conducted at various cities around<br>the world. . . . .  | 95  |
| 6.2 | Seasonal PM <sub>2.5</sub> concentration ( $\mu\text{g m}^{-3}$ ) at traffic intersections and mid-<br>block sections in Varanasi. . . . . | 106 |
| 6.3 | Seasonal PM <sub>10</sub> concentration ( $\mu\text{g m}^{-3}$ ) at traffic intersections and mid-<br>block sections in Varanasi. . . . .  | 106 |
| 6.4 | Thresholds to segregate extreme PM concentrations ( $\mu\text{g m}^{-3}$ ) observed in<br>various seasons. . . . .                         | 109 |
| 6.5 | Estimate of model parameters for PM <sub>2.5</sub> ( $\mu\text{g m}^{-3}$ ) by hierarchical modeling<br>for different seasons. . . . .     | 110 |
| 6.6 | Estimate of model parameters for PM <sub>10</sub> ( $\mu\text{g m}^{-3}$ ) by hierarchical modeling<br>for different seasons. . . . .      | 111 |
| 7.1 | Summary of on-road PM <sub>2.5</sub> concentration across all route sections ( $\mu\text{g m}^{-3}$ ).129                                  |     |
