Title	Page No.
<b>Thesis certificate</b>	<b>ii-iv</b>
<b>Acknowledgements</b>	<b>v-vii</b>
<b>Table of Contents</b>	<b>viii-xiv</b>
<b>List of Figures</b>	<b>xv-xvii</b>
<b>List of Tables</b>	<b>xviii-xix</b>
<b>List of abbreviation and symbols</b>	<b>xx-xxiii</b>
<b>Preface</b>	<b>xxiv-xxvi</b>
<b>CHAPTER 1 Introduction</b>	<b>1-16</b>
1.1 Current energy scenario	1
1.2 Biomass: a renewable source of energy	4
1.2.1 Properties of biomass	5
1.2.1.1 Proximate analysis	5
1.2.1.2 Ultimate analysis	6
1.2.1.3 Heating value	6
1.2.2 Composition of biomass	7
1.2.2.1 Hemicellulose	8

---

1.2.2.2	Cellulose	9
1.2.2.3	Lignin	9
1.3	Pathways for conversion of biomass into bio-energy	9
1.3.1	Biochemical conversion processes	10
1.3.1.1	Anaerobic digestion	11
1.3.1.2	Fermentation	11
1.3.2	Thermochemical conversion processes	12
1.3.2.1	Combustion	12
1.3.2.2	Gasification	12
1.3.2.3	Liquefaction	13
1.3.2.4	Pyrolysis	14
1.3.2.4.1	Catalytic pyrolysis	16
<b>CHAPTER 2</b>	<b>Literature review and objectives</b>	<b>17-34</b>
2.1	Literature review	17
2.1.1	Literature review on physicochemical properties of biomass	17
2.1.2	Literature review on kinetics of thermal degradation of various biomass	20
2.1.3	Literature review on influence of process parameter	25

---

---

	variation on pyrolysis of various biomass	
2.1.4	Literature review on different types of catalysts used for pyrolysis	29
2.2	Research gap	33
2.3	Objectives of this study	34
<b>CHAPTER 3</b>	<b>Thermo-kinetic analysis, thermodynamic parameters and comprehensive pyrolysis index of <i>Melia azedarach</i> sawdust as a genesis of bioenergy</b>	<b>35-70</b>
	<b>Abstract</b>	<b>35</b>
3.1	Introduction	36
3.2	Material and methods	40
3.2.1	Raw material	40
3.2.2	Analysis of physicochemical properties of MAS	40
3.2.3	Thermogravimetric experiments	41
3.2.4	Kinetic analysis	41
3.2.4.1	Kissinger-Akahira-Sunose Method	44
3.2.4.2	Flynn–Wall–Ozawa method	44
3.2.4.3	Starink method	44
3.2.5	Determination of reaction model	45

---

---

3.2.6	Thermodynamic assessment	47
3.2.7	Analysis of pyrolysis performance	48
3.3	Results and discussion	48
3.3.1	Physicochemical properties of MAS	48
3.3.2	Thermogravimetric analysis	50
3.3.3	Kinetic studies	54
3.3.4	Determination of the reaction mechanism by using the master-plot	60
3.3.5	Thermodynamic assessment	61
3.3.6	Pyrolysis performance analysis	66
3.4	Future outlook	67
3.5	Conclusions	69
<b>CHAPTER 4</b>	<b>Process parameter variation of <i>Melia azedarach</i> Sawdust pyrolysis for fuel properties, physicochemical characterization and in-depth speciation analysis</b>	<b>71-102</b>
	Abstract	71
4.1	Introduction	72
4.2	Material and methods	75

---

---

4.2.1	Collection and preparation of sample material	75
4.2.2	Pyrolysis experimental segment	75
4.2.3	Characterization techniques used for MAS, bio-char and bio-oil	78
4.2.3.1	Characterization of MAS and bio-char	78
4.2.3.2	Characterization of bio-oil	79
4.3	Results and discussion	80
4.3.1	Effect of process conditions on pyrolytic products' yield distribution	80
4.3.1.1	Effect of temperature variation	80
4.3.1.2	Effect of sweeping gas flow rate variation	81
4.3.1.3	Effect of bed height variation	83
4.3.1.4	Effect of particle size variation	84
4.3.1.5	Effect of heating rate variation	85
4.3.1.6	Effect of pyrolysis time variation	85
4.3.2	Characterization of biomass and pyrolytic products	86
4.3.2.1	Physicochemical characterization of MAS and bio-char	86
4.3.2.2	Morphological study of MAS and bio-char	89
4.3.2.3	XRD analysis of MAS and bio-char	90

---

---

4.3.2.4	FTIR analysis of MAS and biochar	93
4.3.2.5	NMR study of bio-oil	94
4.3.2.6	FTIR analysis of bio-oil	96
4.3.2.7	GC-MS analysis of bio-oil	97
4.3.2.8	Physicochemical characteristics of bio-oil	99
4.4	Conclusions	101
<b>CHAPTER 5</b>	<b>Comparison of non-catalytic and in-situ catalytic pyrolysis of <i>Melia azedarach</i> sawdust</b>	<b>103-142</b>
	Abstract	103
5.1	Introduction	104
5.2	Material and methods	106
5.2.1	Collection of raw material and its preparation	106
5.2.2	Catalyst and sample preparation	107
5.2.3	Pyrolysis experiments and characterization techniques	107
5.3	Results and discussion	107
5.3.1	Optimization of operating process parameters	107
5.3.2	Effect of biomass to catalyst ratio on pyrolytic products' yield	111
5.3.3	Effect of temperature on catalytic pyrolysis	112

---

---

5.3.4	Characterization of biomass and bio-char	114
5.3.5	TG/DTG analysis of MAS-C and MAS-N	116
5.3.6	BET analysis of biomass and bio-char	120
5.3.7	XRD analysis of MAS-N, MAS-C and bio-char	121
5.3.8	FTIR analysis of MAS-N, MAS-C and bio-char	123
5.3.9	SEM-EDX analysis of MAS-N, MAS-C and bio-chars	125
5.3.10	FTIR analysis of non-catalytic and catalytic bio-oil	127
5.3.11	<sup>13</sup> C NMR study of bio-oil	129
5.3.12	GC–MS analysis of catalytic and non-catalytic bio-oils	132
5.4	Conclusions	141
<b>CHAPTER 6</b>	<b>Overall conclusions and future recommendations</b>	<b>143-146</b>
6.1	Main conclusions of this study	143
6.2	Recommendations for future studies	146
	<b>References</b>	
	<b>List of publications and conferences</b>
