

List of Figures

1.1	Block diagram of a basic watermarking model.	2
2.1	Different watermark techniques.	18
3.1	Block diagram for watermark embedding procedure.	45
3.2	Block Diagram for Authentication bit A_{b1} Generation.	47
3.3	Block diagram for watermark extraction and image restoration procedure.	50
3.4	Test images used in our experiments (a) Lena (b) Cameraman (c) Baboon (d) Own Photo (e) Group Photo (f) Number Plate (g) House (h) Boat (i) Pepper.	53
3.5	Watermarked images (a) Lena (b) Cameraman (c) Baboon (d) Own Photo (e) Group Photo (f) Number Plate (g) House (h) Boat (i) Pepper.	54
3.6	Tampered detection and restoration of Group Photo.	55
3.7	Tampered detection and recovery of Group Photo at tampering rate 50 %.	56
3.8	Tampered detection and restoration of Color Boat.	57
3.9	PSNR of restored content with respect to the tampering rates.	58
3.10	Reconstruction PSNR for Lena image under varying tampering rates.	58
4.1	Block diagram of watermark embedding procedure of a block	66
4.2	Block diagram of recovery bits generation procedure	68
4.3	Block diagram of first authentication bit A_{b1} generation procedure	69
4.4	Block diagram of second authentication bit A_{b2} generation procedure	72
4.5	Block diagram of 12 bits watermark that will embed in each block of cover image to generate watermarked image	73
4.6	Block diagram of content recovery procedures of a block	74
4.7	Test images used in our experiments (a) Lena (b) Cameraman (c) Woman (d) Baboon (e) Lena_RGB (f) House_RGB (g) Photo_RGB (h) Boat_RGB.	78
4.8	Watermarked image of (a) Lena (b) Cameraman (c) Woman (d) Baboon (e) Lena_RGB (f) House_RGB (g) Photo_RGB (h) Boat_RGB.	79

4.9	(a)Watermarked image of Cameraman image (b) Object addition attack (c) tampered detected area (d) Recovered image.	79
4.10	(a)Watermarked image of Photo_RGB image (b) Object addition attack (c) tampered detected area (d) Recovered image.	79
4.11	(a)Watermarked image of Cameraman image (b) Object removal attacks (c) tampered detected area (d) Recovered image.	80
4.12	(a)Watermarked image of Boat_RGB image (b) Object removal attacks (c) tampered detected area (d) Recovered image.	80
4.13	(a)Watermarked image of Group Photo image (b) Cropping (50 %) attack (c) tampered detected area (d) Recovered image.	81
4.14	(a)Watermarked image of Group Photo_RGB image (b) Cropping (50 %) attack (c) tampered detected area (d) Recovered image.	81
4.15	Tampered images at various tampering rates.	82
4.16	Tampered detected areas of image listed in figure 15.	83
4.17	Recovered images after tampering at various tampering rates.	83
4.18	PSNR of restored content with respect to the tampering rates $\in [5\ 50]$	84
4.19	PSNR values comparison of content recovery with the host image Lena.	85
4.20	PSNR values comparison of content recovery with the host image Baboon.	85
4.21	PSNR values comparison of content recovery with the host image Cameraman.	86
5.1	Block diagram for watermark embedding procedure.	94
5.2	Block Diagram for twelve bit vector V with watermark value.	96
5.3	Block Diagram for Authentication bit A_{b1} Generation.	98
5.4	Block Diagram for Authentication bit A_{b2} Generation.	99
5.5	Block diagram for watermark extraction and image restoration procedure.	101
5.6	Set 1. Test images used in our experiments (a) Lena (b) Cameraman (c) Baboon (d) Own Photo (e) Group Photo (f) Number Plate.	104
5.7	Tampered detection and restoration of Group Photo.	105
5.8	Forgery detection and restoration of a Number Plate.	106
5.9	PSNR of restored content with respect to the tampering rates.	109
5.10	Set 2. Test images (a) Color Lena (b) Color Boat (c) Color Woman (d) Color Baboon (d) Color House (e) Color Pepper.	110
5.11	Watermarked images of Set 2 test images as given in Fig 5.10.	110
5.12	Tampered detection and restoration of Color Boat.	111
5.13	Tampered detection and restoration of Color House.	112
5.14	Reconstruction PSNR for Lena image under varying tampering rates.	113
5.15	Reconstruction PSNR for Baboon image under varying tampering rates.	114
6.1	Block diagram of watermark embedding procedure.	122
6.2	Block diagram of first authentication bit A_{b1} generation.	125

6.3	Block diagram of second authentication bit A_{b2} generation.	126
6.4	Block diagram for watermark extraction and image restoration procedure.	129
6.5	Set 1. Gray scale test images (a) Horse (b)Nature (c) Lena (d) Cameraman (e) Baboon (f) Group Photo 1 (g)Building 1 (h) Building 2	134
6.6	Watermarked images of Set 1. gray scale images of Fig. 6.5	134
6.7	Set 2. Color images (a) Color Lena (b)Color House (c) Color Couple (d) Color Boat (e) Color Aircraft (f) Color Peppers (g)Color Baboon (h)Color Group Photo	135
6.8	Watermarked images of Set 2. Test images of Fig. 6.7	135
6.9	Object removal attacks and restored image of gray scale image “Horse” (a) Watermarked Image (b)Object removal attacks (c) Level-1 tampered detection (d) Levels -1,-2 tampered detection (e) Levels-1,-2, -3 tampered detection (f) Restored image	137
6.10	Object removal attacks and restored image of color image “Boat” (a) Watermarked Image (b)Object removal attacks (c) Level-1 tampered detection (d) Levels -1,-2 tampered detection (e) Levels-1,-2, -3 tampered detection (f) Restored image	137
6.11	Object addition attacks and restored image of gray scale image “Cameraman” (a) Watermarked Image (b)Object addition attacks (c) Level-1 tampered detection (d) Levels -1,-2 tampered detection (e) Levels-1,-2, -3 tampered detection (f) Restored image	138
6.12	Object addition attacks and restored image of color image “House” (a) Watermarked Image (b)Object addition attacks (c) Level-1 tampered detection (d) Levels -1,-2 tampered detection (e) Levels-1,-2, -3 tampered detection (f) Restored image	138
6.13	Cropping attacks and restored image of gray scale image “Group photo” (a) Watermarked Image (b)Cropping(50 %) attacks (c) Level-1 tampered detection (d) Levels -1,-2 tampered detection (e) Levels-1,-2, -3 tampered detection (f) Restored image	139
6.14	Cropping attacks and restored image of color image “Color group photo” (a) Watermarked Image (b)Cropping(50 %) attacks (c) Level-1 tampered detection (d) Levels -1,-2 tampered detection (e) Levels-1,-2, -3 tampered detection (f) Restored image	139
6.15	(a) PSNR of restored content with respect to the tampering rates of the gray images. (b)NCC of restored content with respect to the tampering rates of the gray images.	140
6.16	(a) PSNR of restored content with respect to the tampering rates of the color images. (b)NCC of restored content with respect to the tampering rates of the color images.	141
6.17	PSNR(dB) of restored “Lena” image under varying tampering rates. .	142

6.18	PSNR(dB) of restored “Cameraman” image under varying tampering rates.	142
6.19	PSNR(dB) of restored “Baboon” image under varying tampering rates.	143
7.1	Block diagram of proposed watermark embedding procedure.	152
7.2	Block diagram of proposed watermark extraction procedure.	152
7.3	(a,e,i,m,q,s) Cover Images, (b,f,j,n,r,v) Original Watermark, (c,g,k,o,s,w) Watermarked Images, (d,h,l,p,t,x) Extracted Watermark images. . .	157
7.4	(a, c) Watermarked of <i>Photo</i> and <i>Lena</i> Images after adding additive Salt & Pepper noise of density 1.0; (b, d) Extracted watermarks . . .	158
7.5	(a, c) Watermarked of <i>Photo</i> and <i>Lena</i> Images after adding additive Gaussian noise of density 0.1; (b, d) Extracted watermarks	159
7.6	(a, c) Watermarked of <i>Photo</i> and <i>Lena</i> Images after adding Speckle noise of density 0.1; (b, d) Extracted watermarks	159
7.7	(a, c) Watermarked of <i>Photo</i> and <i>Lena</i> Images after resizing attack(1024 → 512 → 1024); (b, d) Extracted watermarks	160
7.8	(a, c) Watermarked of <i>Photo</i> and <i>Lena</i> Images after cropping attack; (b, d) Extracted watermarks	160
7.9	(a, c) Watermarked of <i>Photo</i> and <i>Lena</i> Images after Histogram Equalization; (b, d) Extracted watermarks	162
7.10	(a, c) Watermarked of <i>Photo</i> and <i>Lena</i> Images after JPEG Compression(Q=30)(b, d) Extracted watermarks	162
7.11	(a, c) Watermarked of <i>Photo</i> and <i>Lena</i> Images after Motion Blur; (b, d) Extracted watermarks	163
7.12	(a, c) Watermarked of <i>Photo</i> and <i>Lena</i> Images after Median Filtering 9×9 ; (b, d) Extracted watermarks	163
7.13	(a, c) Watermarked of <i>Photo</i> and <i>Lena</i> Images after Average Filtering 13×13 ; (b, d) Extracted watermarks	164
7.14	(a, c) Watermarked of <i>Photo</i> and <i>Lena</i> Images after Gamma Correction($\gamma = 0.6$); (b, d) Extracted watermarks	164
7.15	(a, c) Watermarked of <i>Photo</i> and <i>Lena</i> Images after Log Transformation(b, d) Extracted watermarks	164
7.16	(a, c) Watermarked of <i>Photo</i> and <i>Lena</i> Images after Sharpen Attack; (b, d) Extracted watermarks	165
7.17	(a)Watermarked Image; (b) Watermark Image; (c) Extracted watermark with entering valid Keys and parameters of Arnold Cat Map; (d) Extracted watermark with entering fake Keys and parameters of Arnold Cat Map	165
