LIST OF ABBREVIATIONS & SYMBOLS	xxiii
PREFACE	xxv
ABSTRACT	xxix
CHAPTER 1: INTRODUCTION	1
1.1 Biomedical implant	1
1.2 Classification of biomedical implants	2
1.2.1 Based on application	3
1.2.2 Based on material	5
1.3 Load bearing implants	7
1.3.1 Dental implants	7
1.3.2 Orthopedic implants	8
1.4 Physiological conditions for load bearing implants	10
1.5 Desirable characteristics of a load bearing implants	12
1.6 Economic perspective of biomedical implants	13
1.7 Aim of the study	15
CHAPTER 2: LITERATURE REVIEW	17
2.1 Historical perspective of biomedical implants	17

2.1.1 Historical perspective of orthopedic implants	17
2.1.2 Historical perspective of dental implants	19
2.2 Conventional metallic materials for biomedical implants and their limitations	21
2.3 Titanium and its alloys: An overview and advancements	22
2.3.1 Binary Ti alloys	25
2.3.2 Ternary Ti alloys	30
2.3.3 High entropy Ti alloys	36
2.4 Processing techniques for Ti alloys	41
2.4.1 Casting	41
2.4.2 Additive manufacturing (3D printing)	42
2.4.3 Hot isostatic pressing (HIP)	42
2.4.4 Powder metallurgy	43
2.5 Corrosion in titanium implants	45
2.5.1 Types of corrosion in titanium implants	45
2.5.2 Factors influencing corrosion in titanium implants	47
2.5.3 Impacts of corrosion on biocompatibility	49
2.6 Tribology in titanium implants	49
2.6.1 Frictional behavior of titanium implants	50
2.6.2 Wear in titanium implants	50
2.6.3 Strategies for wear reduction	51
2.7 Tribo-corrosion in titanium implants	51
2.8 Summary of research gaps and research objectives	52
2.8.1 Summary of research progress and available research gap	52
2.8.2 Research objectives of the present study	55
CHAPTER 3: MATERIALS AND METHODOLOGY	57
3.1 Materials	57
3.2 Powder metallurgy processing of binary, ternary, and high entropy alloys	59
3.2.1 Development of binary and ternary alloys	59
3.2.2 Development of high entropy alloys	61
3.2.2.1 Design of high entropy alloys	61
3.2.2.2 Sample preparation	65
3.3 Phase composition and microstructure	67
3.3.1 X-ray diffraction analysis for phase composition	67
3.3.2 Microstructural analysis by scanning electron microscopy	68

3.4 Density and porosity	68
3.5 Mechanical properties	69
3.5.1 Hardness	69
3.5.2 Elastic modulus	70
3.6 Electrochemical corrosion test	71
3.7 Tribological testing	73
3.8 Tribo-corrosion testing	75
CHAPTER 4: RESULTS AND DISCUSSION	
PHASE COMPOSITION, MICROSTRUCTURE, PHYSICAL AND MECHANICAL PROPERTIES	77
4.1 Phase composition	77
4.1.1 X-ray diffraction analysis of ball-milled powders	77
4.1.1.1 XRD analysis of binary alloys powders	77
4.1.1.2 XRD analysis of ternary alloys powders	79
4.1.1.3 XRD analysis of high entropy alloys powders	80
4.1.2 X-ray diffraction analysis of cpTi, Ti-6Al-4V, and sintered alloys	83
4.1.2.1 XRD analysis of cpTi and Ti-6Al-4V	83
4.1.2.2 XRD analysis of sintered binary alloys	84
4.1.2.3 XRD analysis of sintered ternary alloys	86
4.1.2.4 XRD analysis of sintered high entropy alloys	87
4.2 Microstructural analysis	88
4.2.1 Microstructural analysis of cpTi and Ti-6Al-4V	88
4.2.2 Microstructural analysis of sintered binary alloys	89
4.2.3 Microstructural analysis of sintered ternary alloys	95
4.2.4 Microstructural analysis of sintered high entropy alloys	97
4.3 Density and porosity	101
4.3.1 Density and porosity of cpTi and Ti-6Al-4V	101
4.3.2 Density and porosity of sintered binary alloys	101
4.3.3 Density and porosity of sintered ternary alloys	103
4.3.4 Density and porosity of sintered high entropy alloys	103
4.4 Mechanical properties	104
4.4.1 Hardness	104
4.4.1.1 Hardness of cpTi and Ti-6Al-4V	104

4.4.1.2 Hardness of sintered binary alloys	105
4.4.1.3 Hardness of sintered ternary alloys	107
4.4.1.4 Hardness of sintered high entropy alloys	108
4.4.2 Elastic modulus	109
4.4.2.1 Elastic modulus of cpTi and Ti-6Al-4V	109
4.4.2.2 Elastic modulus of sintered binary alloys	110
4.4.2.3 Elastic modulus of sintered ternary alloys	113
4.4.2.4 Elastic modulus of sintered high entropy alloys	114

CHAPTER 5: RESULTS AND DISCUSSIONS

ELECTROCHEMICAL CORROSION AND WEAR BEHAVIOUR 119

5.1 Electrochemical corrosion behaviour	119
5.1.1 Corrosion behaviour of cpTi and Ti-6Al-4V	119
5.1.2 Corrosion behaviour of sintered binary alloys	122
5.1.3 Corrosion behaviour of sintered ternary alloys	130
5.1.4 Corrosion behaviour of sintered high entropy alloys	133
5.1.5 Corroded surface study	135
5.2 Tribological behaviour	144
5.2.1 Frictional behaviour	144
5.2.1.1 Frictional behaviour of cpTi and Ti-6Al-4V	144
5.2.1.2 Frictional behaviour of sintered binary alloys	145
5.2.1.3 Frictional behaviour of sintered ternary alloys	147
5.2.1.4 Frictional behaviour of sintered high entropy alloys	148
5.2.2 Wear behaviour	150
5.2.2.1 Wear behaviour of cpTi and Ti-6Al-4V	150
5.2.2.2 Wear behaviour of sintered binary alloys	152
5.2.2.3 Wear behaviour of sintered ternary alloys	161
5.2.2.4 Wear behaviour of sintered high entropy alloys	165
5.2.3 Worn surface study	166

CHAPTER 6: RESULTS AND DISCUSSIONS

TRIBO-CORROSION BEHAVIOUR 183

6.1 Tribocorrosion behaviour of cpTi and Ti-6Al-4V	183
6.2 Tribocorrosion behaviour of sintered binary alloys	186

6.3 Tribocorrosion behaviour of sintered ternary alloys	192
6.4 Tribocorrosion behaviour of sintered high entropy alloys	195
6.5 Worn surface analysis of worn surfaces after tribocorrosion	198
CHAPTER 7: RESULTS AND DISCUSSIONS	
CONCLUSIONS AND FUTURE WORK	207
7.1 Conclusions	207
7.2 Future scope	216
LIST OF PUBLICATION	219
CONFERENCES	221
WORKSHOP/STTP/SEMINAR/FDP/COURSES	222
