

Table of contents

Preface	xiii
List of figures	xxiii
List of tables	xxxiii
1 Introduction and literature review	1
1.1 Motivation of thesis	1
1.2 Physical hierarchy of some functional material	4
1.2.1 Dielectrics	5
1.2.2 Piezoelectrics	5
1.2.3 Pyroelectrics	7
1.2.4 Ferroelectrics	8
1.3 Perovskite structure	11
1.3.1 The Goldschmidt tolerance factor	12
1.4 Tilt crystallography in distorted perovskites	14
1.5 Symmetry mode analysis of distorted structure	17
1.6 Symmetry-mode analysis examples	18
1.6.1 Symmetry mode analysis of EuNiO_3	18
1.6.2 Symmetry mode analysis of RFeO_3 (R=Lanthanide)	21
1.7 Phase boundary engineering in perovskite-based solid-solutions	26

1.8	Relaxor ferroelectrics	29
1.9	Literature review	35
1.9.1	Sodium Niobate (NaNbO_3): most complex perovskite	35
1.9.2	Barium Titanate (BaTiO_3): first ferroelectric perovskite	37
1.9.3	Calcium Titanate (CaTiO_3)	40
1.9.4	$(\text{Ba,Ca})\text{TiO}_3$	40
1.9.5	$(1-x)\text{NaNbO}_3 - x\text{BaTiO}_3$	42
1.10	Organisation of the thesis	43
2	Experimental procedure and characterization techniques	45
2.1	Sample synthesis	45
2.1.1	Solid-state reaction method	46
2.2	Characterization techniques	47
2.2.1	X-ray diffraction method	48
2.2.2	Rietveld Refinement	50
2.2.3	Pair Distribution Function (PDF) analysis	53
2.2.4	Raman Spectroscopy	56
2.2.5	Dielectric Measurements	59
2.2.6	Polarization vs. Electric field (PE) hysteresis loop measurements .	61
2.2.7	Microstructural Measurement	64
2.3	Conclusion	66
3	Similarities and differences in the ordering at short and long ranges in a NaNbO₃ based Pb-free smart system: A key to functional properties	67
3.1	Introduction	67
3.2	Experimental	71
3.3	Results And Discussion	72

3.3.1	High-resolution X-ray diffraction, Dielectric and Raman analysis for $0.00 \leq x \leq 0.25$	72
3.3.2	Studies on NN- <i>x</i> BCT for $0.30 \leq x \leq 1.0$: High resolution diffrac- tion, Dielectric, and Raman spectroscopic analysis:	88
3.4	Conclusion	97
4	Multiscale structural analysis of polymorphic phase boundaries in doped antiferroelectric Sodium Niobate	99
4.1	Introduction	99
4.2	Experimental	102
4.3	Results And Discussion	103
4.3.1	Dielectric studies	103
4.3.2	Synchrotron X-ray diffraction Studies	105
4.3.3	Raman Spectroscopic Analysis	112
4.3.4	Pair Distribution Function analysis	117
4.3.5	Discussion	122
4.4	Conclusions	123
5	Nucleation and growth of antiferrodistorted Polar nano regions into a long- range ferroelectric matrix in a Sodium Niobate-based complex relaxor	125
5.1	Introduction	125
5.2	Experimental	127
5.3	Results And Discussion	129
5.3.1	Long-range structural analysis	129
5.3.2	Short-range structural analysis	138
5.4	Conclusion	147

6	Investigating anomalous thermal expansion and ferroelectrovolume effect in a Sodium Niobate based relaxor	149
6.1	Introduction	149
6.2	Experimental Section	152
6.3	Results and discussions	152
6.3.1	Dielectric studies	152
6.3.2	Synchrotron X-ray diffraction studies	155
6.3.3	Raman Analysis	161
6.3.4	Pair Distribution Function Analysis	164
6.4	Conclusion	168
7	Summary and future work suggestions	169
7.1	Summary	169
7.2	Future work suggestions	174
	References	177
