Declaration by the candidate	ii
Copyright transfer certificate	iii
Acknowledgement	v-vi
Table of Contents	vii-xii
List of Figures	xiii-xvii
List of Tables	xviii-xix
List of Symbols	xx-xxii
Abstract	xxiii-xxvi

Chapter-1 Introduction.....1-20

1.1 General	1
1.2 Steel bridges.....	6
1.3 Summary of railway and roadway bridges in India	8
1.4 Failure of metallic bridges	10
1.5 Motivation.....	17
1.6 Objective and scope	18
1.7 Organization of thesis	20

Chapter-2 Literature Review21-36

2.1 General	21
2.2 Fatigue life assessment.....	22
2.2.1 Fatigue history	22
2.2.2 Codes for fatigue.....	24
2.2.3 Literature related to fatigue life assessment	24
2.3 Deep learning based Crack detection.....	28
2.4 Fuzzy based bridge rating	32
2.5 Research gap	35

Chapter-3	Methods of Fatigue Analysis and A Case Study	37-80
3.1	General	37
3.2	Indian railways bridges	38
3.3	Fatigue	40
3.3.1	Factors affecting life of structures	40
3.3.2	Fatigue design criteria	41
3.3.2.1	Infinite life design	41
3.3.2.2	Safe life design	41
3.3.2.3	Fail safe design	42
3.3.2.4	Damage tolerant design	42
3.3.3	Methods of fatigue analysis	42
3.3.3.1	Stress life method	42
3.3.3.2	Strain life method	45
3.3.3.3	Linear Elastic Fracture Mechanics based approach	46
3.3.4	Standard provisions for fatigue assessment	48
3.3.4.1	Eurocode EN 1993-1-9	49
3.3.4.2	British code BS 5400: Part10	52
3.3.4.3	Indian code IS 800	57
3.3.4.4	American manual AREMA	60
3.4	Case study	62
3.4.1	Bridge details and loading	62
3.4.2	Remaining life assessment	69
3.4.2.1	Remaining life using stress life method	69
3.4.2.2	Remaining life using LEFM approach	76
3.4.2.3	Comparison of life using stress-life method and LEFM approach	77
3.5	Concluding remarks	79

Chapter-4 Fatigue-Induced Damage and Bridge Life for Different Stress Bands of an Existing Rail-Cum-Roadway Bridge.....81-134

4.1	General	81
4.2	Bridge description	82
4.3	Loading & Traffic details.....	85
4.3.1	Indian railway loading	85
4.3.2	Bridge traffic details	85
4.4	Material characterization.....	94
4.5	FEM modelling	95
4.5.1	Minor span	96
4.5.2	Major span	99
4.6	Model validation by deflection check.....	101
4.7	Methodology	103
4.7.1	Stress life method.....	103
4.7.2	Basic procedure.....	104
4.7.3	Application of different stress bands	105
4.8	Discussion	107
4.8.1	Minor span	108
4.8.1.1	Per vehicle passage damage (PVPD).....	108
4.8.1.2	Remaining life	110
4.8.1.3	Different stress bands	115
4.8.2	Major span	120
4.8.2.1	Per vehicle passage damage (PVPD).....	120
4.8.2.2	Remaining life	122
4.8.2.3	Different stress bands	126
4.9	Concluding remarks	131

4.9.1	Summary of minor span.....	131
4.9.2	Summary of major span.....	132
4.9.3	conclusion	133

Chapter-5 Semantic Segmentation of Cracks on Masonry Surfaces Using Deep Learning (DL) Techniques135-170

5.1	General.....	135
5.2	Methods of crack detection.....	136
5.2.1	Traditional Methods.....	136
5.2.2	Machine learning (ML) based Methods.....	138
5.2.3	Deep learning (DL) based Methods.....	139
5.3	Semantic Segmentation (SS) of cracked images	139
5.3.1	Segmentation Models	140
5.3.1.1	U-Net	141
5.3.1.2	FPN (Feature Pyramid Network).....	143
5.3.1.3	DeepLabV3+	144
5.3.1.4	PSPNet (Pyramid Scene Parsing Network)	145
5.3.2	Training Configuration	147
5.3.3	Performance metrics	147
5.4	Discussion of results	149
5.4.1	Performance metrics of all networks on training dataset.....	151
5.4.2	Epoch wise dice coefficient, IoU, and F1 score	154
5.4.3	Segmentation model wise performance metrics	156
5.4.4	Training time and validation loss.....	157
5.4.5	Performance metrics of selected networks on training, validation, and testing dataset.....	159
5.4.6	Semantically segmented images	162

5.5	Case study	166
5.6	Concluding remarks	169
5.6.1	Study summary	169
5.6.2	Conclusion	170
Chapter-6 Fuzzy Based Bridge Rating System (FBRS) for Rating of Existing Railway Bridges		171-196
6.1	General	171
6.2	Railway bridge components.....	172
6.3	Fuzzy logic and fuzzy weighted geometric mean.....	173
6.4	Methodology	175
6.4.1	Basic methodology	175
6.4.2	Flow chart	177
6.5	Condition rating scale	178
6.5.1	Existing rating scale.....	178
6.5.2	Proposed fuzzy rating scale	178
6.6	Application.....	183
6.6.1	Case study-1.....	184
6.6.2	Case study-2.....	185
6.6.3	Case study-3.....	185
6.6.4	Details of case study-3's component: T&P works	186
6.7	Concluding remarks	187
6.8	Appendix-A.....	189
6.9	Appendix-B.....	192
Chapter-7 Conclusions and Recommendations		197-202
7.1	General	197

7.2	Fatigue analysis of railway bridge	198
7.3	Remaining life assessment, stress band study of rail-cum-roadway bridge .	198
7.4	DL-based crack detection on masonry surfaces	199
7.5	Fuzzy based bridge rating	200
7.6	Future scope of study	201
