

TABLE OF CONTENTS

Chapters	Title	Page No.
	<i>Certificate</i>	ii-iv
	<i>Acknowledgments</i>	v-vi
	<i>Table of Contents</i>	vii-x
	<i>List of Figures</i>	xi-xv
	<i>List of Tables</i>	xvi-xviii
	<i>List of Abbreviations and Symbols</i>	xix-xx
	<i>Abstract</i>	xxi-xxvi
Chapter 1	Introduction	1-26
	1.1 Geophysical Inverse Problems and Genetic Algorithm (GA)	1
	1.1.1 Geophysical Inverse Problem	1
	1.1.2 Genetic Algorithm (GA)	2
	1.2 Global Water Scenario	4
	1.3 Groundwater Occurrence	6
	1.4 Groundwater Scenario of India.	8
	1.5 Groundwater Scenario of Singrauli District	12
	1.6 Controlling factors of groundwater	16
	1.6.1 Precipitation	16
	1.6.2 Evapotranspiration	16
	1.6.3 Geological units	16
	1.6.4 Hydrogeomorphological units	17
	1.7 Role of Specific investigations methods for Groundwater Exploration	18
	1.7.1 Detailed field investigation	18
	1.7.2 Geophysical investigation	18
	1.7.3 Subsurface investigation	21
	1.8 Scope of the present study and problem identification	22
	1.9 Objective of Present Study	25
	1.10 Organization of Thesis	25
Chapter 2	Literature Review	27-59
	2.1 Studies on the Implementation of Genetic Algorithms(GA)	27
	2.2 Study on Assessment of groundwater level	36

2.3	Studies on identification of subsurface lithology and to locate groundwater potential zones using Electrical resistivity method	47
2.4	Studies on characterization of aquifer using Electrical resistivity method	55
Chapter 3	Study area	60-78
3.1	Introduction	60
3.2	Description of the study area	60
3.3	Geology and Tectonic setting	63
3.3.1	Moher sub-basin	65
3.3.2	Moher main basin	66
3.4	Stratigraphic description	66
3.4.1	Precambrian Basement	66
3.4.2	Talchir Formation	67
3.4.3	Barakar Formation	67
3.4.4	Barren Measures	69
3.4.5	Raniganj Formation	69
3.4.6	Panchet Formation	70
3.4.7	Mahadeva Formation	70
3.4.8	Igneous intrusive bodies	71
3.5	Field Description	71
3.6	Geomorphology	72
3.7	Drainage	72
3.8	Hydrology	74
3.9	Soil	76
3.9.1	Jungail soil	76
3.9.2	Clay loam soil	76
3.9.3	Aundhi Clay	77
3.9.4	Carboniferous soil	77
3.9.5	Kachani-Mayar soil	77
3.10	Flora and Fauna	77
3.10.1	Dry sal-bearing forests	77
3.10.2	Dry mixed deciduous forests	78
3.10.3	Dry deciduous scrub forest	78
Chapter 4	Geospatial Technique	79-112
4.1	Review of literature related to remote sensing	79

technique	
4.2 Basic principle of the remote sensing technique	79
4.3 Material and Methods	81
4.3.1 Data collection	81
4.3.2 Satellite data analysis and spatial database building	82
4.4 Generation of thematic maps	82
4.4.1 Geomorphology map	83
4.4.2 Slope Map	86
4.4.3 Digital elevation model (DEM)	87
4.4.4 Drainage map	89
4.4.5 Lineament and Lineament density	90
4.4.6 Land Use and land cover map	93
4.5 Evaluation of groundwater level fluctuation	95
4.5.1 Methodology adopted for evaluation of groundwater level fluctuation	96
4.5.2 Results and Discussion	100
Chapter 5 Implementation of genetic algorithm	113-197
5.1 Geoelectrical Sounding	113
5.2 Use of Genetic Algorithm (GA)	115
5.2.1 Main features of the developed program	117
5.2.2 Parameters of SGAs	132
5.3 Result and Discussion	132
5.3.1 Validation of developed Simple Genetic Algorithm program	132
5.3.2 Inversion of study area VES data	140
Chapter 6 Electrical Resistivity Method	198-273
6.1 Introduction	198
6.1.1 Definition of Resistivity	198
6.2 Theoretical background of the resistivity method	200
6.2.1 General introduction	200
6.2.2 Potential distribution over a stratified earth caused by a point current source	202
6.2.3 Resistivity Kernel Functions and Recurrence Relations	206
6.2.4 Computation of Theoretical Curves	208
6.2.5 The Principles of Resistivity Method and field	209

procedures	
6.2.6 Dar-Zarrouk Parameters for Aquifer Characterization	213
6.3 Method for Interpreting Geoelectrical Data	216
6.3.1 Direct Method of Interpretation	217
6.3.2 Indirect Method of Interpretation	217
6.3.3 Computer-assisted interpretation technique	219
6.4 Delectability and ambiguity problems in the interpretation of VES data	219
6.4.1 Problems of Equivalence	220
6.4.2 Problems of Suppression	220
6.5 Conduction of electricity through rocks	221
6.6 Resistivity Survey in the study area	222
6.6.1 Instrument and accessories	222
6.6.2 Data Acquisition in the field survey	225
6.6.3 Vertical electrical sounding (VES)	227
6.7 Result and Discussion	231
6.7.1 Vertical electrical sounding	231
Chapter 7 Summary and Conclusions	274-281
7.1 Summary	274
7.2 Conclusions	277
7.3 Suggestions for future studies/ works	281
References	282-301
Appendices
