CONTENTS	PAGE NO.
LIST OF FIGURES	xvii-xxii
LIST OF TABLES	xxiii
LIST OF ABBREVIATIONS/SYMBOLS	xxv-xxvii
PREFACE	xxix-xxxii
CHAPTER 1: INTRODUCTION	
1 INTRODUCTION	1
1.1 AISI D2 tool steel	1
1.2 Grinding process	3
1.3 The role of cutting fluids and coolants in grinding process.....	9
1.4 Background of the present research work.....	14
1.5 Brief overview of the present research work	17
1.6 Outline of the thesis	18
CHAPTER 2: LITERATURE REVIEW	
2 LITERATURE REVIEW	23
2.1 Conventional cutting fluids.....	23
2.1.1 Application of conventional cutting fluids in grinding process.....	23
2.1.2 Behaviour of conventional cutting fluids in the grinding zone.....	25
2.1.3 Boundary layer effects of conventional cutting fluids.....	27
2.1.4 Ecological issues of conventional cutting fluids.....	31
2.2 Sustainable technique alternatives to conventional cutting fluids	33
2.2.1 Dry machining	35
2.2.2 Minimum Quantity Lubrication (MQL) machining	38
2.2.3 Cryogenic machining	43

2.2.3.1	Review of application of cryogenic cooling in grinding operation.....	46
2.2.4	Hybrid Cryo-MQL machining	53
2.2.4.1	Review of application of the Cryo-MQL in grinding operation	55
2.3	Vegetable oil-based MQL in grinding	58
2.3.1	Application of vegetable oils in grinding.....	59
2.4	Nanofluid-based MQL in grinding	61
2.4.1	Application of nanofluids in grinding.....	63
2.5	Magnetic Barkhausen noise technique.....	67
2.5.1	Literature related to application of magnetic Barkhausen noise in grinding	70
2.6	Research gap	73
2.7	Objectives of the present work	73

CHAPTER 3: MATERIALS AND METHODS

3	MATERIALS AND METHODS	75
3.1	Material selection.....	75
3.2	Grinding wheel.....	76
3.3	Experimental setup and conditions	77
3.3.1	Cryogenic grinding system	77
3.3.2	Cryo-MQL grinding system.....	80
3.3.3	Magnetic Barkhausen noise analyzer.....	82
3.4	Grinding environments	84
3.4.1	Dry grinding.....	84
3.4.2	Wet grinding	84
3.4.3	Cryogenic grinding	84
3.4.4	MQL and Cryo-MQL grinding	85
3.5	Observations regarding the grindability and surface integrity indices	85
3.5.1	Grinding forces and specific grinding energy.....	85

3.5.2	Grinding temperature	87
3.5.3	Surface roughness	88
3.5.4	Surface modifications	89
3.5.5	Metallographic and microhardness analyses	90

CHAPTER 4: RESULTS AND DISCUSSION

4	RESULTS AND DISCUSSION.....	93
4.1	Performance analysis of grinding parameters under grinding environment for ground AISI D2 tool steel.....	93
4.1.1	Grinding environment on grinding force	93
4.1.2	Grinding environment on specific grinding energy	97
4.1.3	Grinding environment on grinding temperature	99
4.1.4	Grinding environment on force ratio	100
4.1.5	Grinding environment on surface roughness	101
4.1.6	Grinding environment on ground surface characteristics	104
4.1.6.1	Surface morphology	104
4.1.6.2	Surface topography	107
4.1.6.3	Bearing area curve analysis.....	108
4.1.7	Grinding environment on chip morphology	111
4.1.8	Grinding environment on microstructural analysis.....	113
4.1.9	Effect of cryogenic coolant delivery pressure on grindability indices	114
4.1.9.1	Grinding forces and specific grinding energy	115
4.1.9.2	Surface roughness	116
4.1.10	Grinding environment on change in table feed rate for grindability indices	117
4.1.10.1	Grinding force.....	117
4.1.10.2	2D and 3D surface roughness.....	118
4.1.10.3	Bearing area curve analysis	121

4.1.10.4	Grinding temperature.....	124
4.1.10.5	Microhardness	125
4.2	Performance analysis of grinding parameters under Cryo-MQL environment for ground AISI D2 tool steel.....	127
4.2.1	Lubricants selection	127
4.2.2	Preparation of vegetable oil-based deionized water emulsion and Al ₂ O ₃ NFs	130
4.2.2.1	Apparent friction coefficient	132
4.2.2.2	Thermo-physical properties of vegetable oil-based deionized water emulsion and Al ₂ O ₃ NFs.....	133
4.2.2.2.1	Thermal conductivity.....	133
4.2.2.2.2	Dynamic viscosity	134
4.2.2.2.3	Surface tension	136
4.2.2.2.4	Density.....	137
4.2.2.2.5	pH value.....	138
4.2.2.2.6	Wettability analysis	140
4.2.3	Effect of Cryo-MQL environment on grinding force	143
4.2.4	Effect of Cryo-MQL environment on specific grinding energy	144
4.2.5	Effect of Cryo-MQL environment on surface roughness	146
4.2.6	Effect of Cryo-MQL environment on ground surface topography	150
4.2.7	Effect of Cryo-MQL environment on chip morphology.....	153
4.2.8	Effect of Cryo-MQL environment on grinding temperature	155
4.2.9	Sustainability Assessment: Pugh Matrix Approach.....	157
4.3	Performance analysis of magnetic BN and HL parameters under various environments for ground AISI D2 tool steel.....	161
4.3.1	Effect of thermal damage on ground surface under different environments	161

4.3.2	Effect of thermal damage on microhardness under different environments	163
4.3.3	Analysis of ground sample by magnetic BN parameters under different environments.....	165
4.3.4	Analysis of ground sample by magnetic HL parameters under different environments.....	169
 CHAPTER 5: CONCLUSIONS AND SCOPE FOR FUTURE WORK		
5	CONCLUSIONS AND SCOPE FOR FUTURE WORK.....	177
5.1	Conclusions.....	177
5.1.1	Effect of process parameters on the grindability of AISI D2 tool steel under cryogenic cooling.....	177
5.1.2	Effect of process parameters on the grindability of AISI D2 tool steel under Cryo-MQL environment	179
5.1.3	Study on ground sample of AISI D2 tool steel work material through magnetic Barkhausen noise technique	181
5.2	Future work.....	183
