<i>PREFACE</i>	<i>xxiii</i>
1 INTRODUCTION	1
1.1 Background	1
1.2 Statement of problem	8
1.3 Research objectives	9
1.4 Scope and methodology	10
1.4.1 Scope of work	10
1.4.2 Work plan.....	10
1.5 Organisation of thesis	11
2 LITERATURE REVIEW	13
2.1 Introduction	13
2.2 Surface Miner	14
2.2.1 Types.....	14
2.2.2 Design and constructional features	18
2.2.3 Cutting mechanism	19
2.2.4 Operating methods	21
2.2.5 Rated production capacity.....	23
2.3 Production and productivity	24
2.4 Energy productivity	26
2.4.1 Mechanics of coal cutting	26
2.4.2 Assessment of cutting force	28
2.4.3 Energy productivity models – a review	34
2.5 Machine productivity	35
2.5.1 Machine productivity models – a review.....	35
2.5.2 Summary of machine productivity models.....	43
2.5.3 Identification of factors influencing machine productivity	45
2.6 Factors influencing key productivity indicators of surface miner	46
2.6.1 Factors related to coal parameter	47
2.6.2 Factors related to machine parameter	50

2.6.3	Factors related to operational parameter.....	50
2.7	Total factor productivity	52
2.7.1	Total factor productivity models – a review	54
2.7.2	Production functions to measure total factor productivity.....	56
2.7.3	Owning and operating costs of excavators	59
2.8	Summary of literature review	64
2.8.1	Research gaps.....	64
2.8.2	Novelty of research work.....	65
3	<i>FIELD AND LABORATORY INVESTIGATIONS</i>	67
3.1	Introduction	67
3.2	Field study.....	68
3.2.1	Nigahi opencast coal mine	69
3.2.2	Jayant opencast coal mine.....	73
3.2.3	Bhubaneswari opencast coal mine	76
3.2.4	Rajmahal opencast coal mine.....	80
3.2.5	Parsa East and Kanta Basan opencast coal mine	83
3.2.6	Samaleswari opencast coal mine	85
3.2.7	Lakhanpur opencast coal mine.....	88
3.2.8	Gevra opencast coal mine	91
3.3	Laboratory investigations for coal parameter.....	94
3.3.1	Uniaxial compressive strength.....	94
3.3.2	Tensile strength.....	95
3.3.3	Moisture content	96
3.3.4	Ash content	98
3.4	Field investigations for machine parameter	100
3.4.1	Cutting width	100
3.4.2	Rated power for cutting drum	100
3.4.3	Cutting depth.....	101
3.4.4	Cutting area.....	102
3.4.5	Cutting speed	103
3.4.6	Drum speed	103
3.5	Field investigations for operational parameter	104
3.5.1	Face length	104
3.5.2	Machine utilisation.....	104
3.5.3	Machine shift time	105
3.6	Field investigations for key productivity indicators of surface miner.....	106
3.6.1	Machine productivity	106
3.6.2	Pick and diesel consumptions	107
3.6.3	Machine shift cost.....	107
3.7	Summary of Investigations.....	112
3.8	Observations	117
3.8.1	Outliers.....	119

4	<i>OPTIMISATION AND PREDICTION TECHNIQUES</i>	123
4.1	Introduction	123
4.2	Optimisation techniques	123
4.2.1	Taguchi method	123
4.2.2	Orthogonal array	124
4.2.3	Analysis of signal-to-noise ratio	125
4.2.4	Analysis of variance.....	126
4.3	Prediction techniques	127
4.3.1	Correlation coefficient analysis	128
4.3.2	Principal component analysis	129
4.3.3	Multivariate linear regression	131
4.3.4	Artificial neural network.....	132
5	<i>INVESTIGATIONS INTO ENERGY PRODUCTIVITY TO OPTIMISE CONTROL FACTORS OF SURFACE MINER</i>	137
5.1	Introduction	137
5.2	Design of experiment	138
5.3	Energy productivity of surface miner	139
5.4	Results and Discussion	142
5.4.1	Analysis of signal-to-noise ratio using Taguchi method	145
5.4.2	Effect of control factors on energy productivity.....	149
5.4.3	Optimisation of control factors	151
5.4.4	Estimation of optimum energy productivity	154
5.5	Development of energy productivity prediction models	158
5.5.1	Multiple linear regression	158
5.5.2	Artificial neural network.....	159
5.5.3	Confirmation test	161
5.6	Analysis of variance for energy productivity	161
5.7	Development of cutting speed prediction model	162
5.8	Conclusions	165
5.8.1	Conclusions.....	165
5.8.2	Suggestion for future work	166
6	<i>EVALUATION OF KEY PRODUCTIVITY INDICATORS OF SURFACE MINER IN OPENCAST COAL MINES</i>	167
6.1	Introduction	167
6.2	Design of experiment	168
6.3	Result and discussion	171
6.3.1	Correlation coefficient analysis	171
6.3.2	Principal component analysis for machine productivity.....	173
6.3.3	Machine productivity MLR model	175
6.3.4	Principal component analysis for pick and diesel consumptions.....	178

6.3.5	Pick consumption MLR model	180
6.3.6	Diesel consumption MLR model	182
6.4	Development of surface miner productivity index for coal (SMPI_C)	185
6.4.1	Machine productivity model based on SMPI _C	189
6.4.2	Pick and diesel consumption models based on SMPI _C	189
6.4.3	Validation of SMPI _C based key productivity indicators prediction model	191
6.5	Verification of statistical models using ANN approach.....	193
6.5.1	Machine productivity MLP-ANN model.....	193
6.5.2	Pick consumption MLP-ANN model.....	196
6.5.3	Diesel consumption MLP-ANN model	198
6.6	Confirmation test for key productivity indicators prediction models.....	200
6.7	Conclusions	203
6.7.1	Conclusions.....	203
6.7.2	Suggestion for future work	204
7	<i>SURFACE MINER TOTAL FACTOR PRODUCTIVITY.....</i>	205
7.1	Introduction	205
7.2	Production functions	208
7.3	Research data.....	210
7.4	Results and discussion.....	211
7.4.1	SM productivity using MST-based BEPF model	211
7.4.2	SM productivity using MSK-based BEPF model.....	213
7.4.3	SM total factor productivity using CDPF	215
7.5	Conclusions	219
7.5.1	Conclusions.....	219
7.5.2	Suggestion for future work	220
8	<i>CONCLUSION.....</i>	221
8.1	Conclusions	221
8.1.1	Investigations into energy productivity to optimise control factors of SM	221
8.1.2	Evaluation of key productivity indicators of SM in opencast coal mines .	222
8.1.3	Surface miner total factor productivity	223
8.2	Limitations of the study	224
8.3	Future scope of research.....	225
