

List of Figures

Figure. 1.1.	2° C trajectory curve for CO ₂ ppm scenario	12
Figure. 1.2.	Projected RE contribution for India's Energy in 2022	13
Figure. 1.3.	Emergence of three multidisciplinary research themes in ONGC .	14
Figure. 1.4.	Research Proposal Flow chart.....	15
Figure. 1.5.	Classifications of Solar Photovoltaic System	16
Figure. 1.6.	Global Energy Contributors resources-2016.....	19
Figure. 1.7.	Cognizance & Chronological of Sustainability	19
Figure. 1.8.	Investment in New renewable power capacity	20
Figure. 1.9.	Research statement for carbon mitigation research studies	25
Figure. 2.1.	Equivalent circuit of a real Solar PV cell	28
Figure. 2.2.	Current-Voltage Curves showing I _{SC} and V _{OC} of a Solar cell	28
Figure. 2.3.	Schematic diagram of '5' parameter block representation	29
Figure. 2.4.	Current and Power vs Voltage characteristic curve of solar cell ...	31
Figure. 2.5.	PV module's I-V Characteristics with the varying irradiance	32
Figure. 2.5.1	Variation of Voltage with respect to temperature.....	32
Figure. 2.6.	I-V curves dynamics with irradiance and temperature	33
Figure. 2.7.	Schematic on the concept of DC-DC converter	34
Figure. 2.8.	Circuit diagram of a Cuk converter.....	35
Figure. 2.9.	Sign of the ΔP and ΔV on the I-V characteristic curve	36
Figure. 2.10.	Flowchart of the P&O algorithm.....	37
Figure. 2.11.	Derivative of power with respect to voltage defines MPP (INC) ...	38
Figure. 2.12.	Flowchart of the incremental conductance algorithm.	38
Figure. 2.13.	Broad classifications of various MPPT techniques.....	39
Figure. 2.14.	Schematic single line diagram-PV array to grid	44
Figure. 2.15.	Emulsion classifications and its Photomicrographs	46
Figure. 3.1.	Schematic of Captive Power Plant(CPP) at location 1	49
Figure. 3.2.	Control system block diagram.	50
Figure. 3.3.	Sun position and the Solar Radiation components	51
Figure. 3.4.	Horizontal coordinate system	54
Figure. 3.5.	Experimental setup for estimation of sun angles at location 1 ...	55
Figure. 3.6.	Dependency of the PV panel power on the azimuth angle	56
Figure. 3.7.	PV power generation for the 19 th June 2017	56
Figure. 3.8.	Flowchart for the performance output of Solar Panel.....	57

Figure. 3.9.	Sun position angles and PV power generation	57
Figure. 3.10.	Comparison between real and estimated generation	58
Figure. 3.11.	Measured and estimated data in percent of P_{MAX}	59
Figure. 3.12.	Effect of clouds/sunset on measured and estimated values.....	59
Figure. 3.13.	Typical Gas Gathering System layout in oil sector	64
Figure. 3.14.	Cross section of Horizontal Heater Treater	65
Figure. 3.15.	Microalgae based co-products supply chain	67
Figure. 4.1.	Schematic of the hybrid prototype crude oil heating system	71
Figure. 4.2.	Snapshot of developed dish and associated system	72
Figure. 4.3.	Flow diagram for developing the Hybrid Prototype system	73
Figure. 4.4.	Proposed hybrid system for crude oil heating system.....	74
Figure. 4.5.	CO ₂ sequestration by algae experimental set up.	76
Figure. 4.6.	Components of experimental set up (a), (b) and (c).....	76
Figure. 5.1.	Discussion, Simulation and Results for the work	81
Figure. 5.2.	SIMULINK model for real industrial site location 1	83
Figure. 5.3.	3 phase V-I characteristics of SIMULINK model during start	84
Figure. 5.4.	Stabilising V-I characteristics of the SIMULINK model.....	84
Figure. 5.5.	Free power and power reserve estimated for the 19 th June.....	87
Figure. 5.6.	Solar deficit: Power reserve for the 19 th June.....	88
Figure. 5.7.	Power consumption at plant during the 19 th June	89
Figure. 5.8.	Solar panels power generation during the 19 th June.....	89
Figure. 5.9.	Solar panels generated power returned to the grid.....	90
Figure. 5.10.	Energy consumption by selected both group devices	91
Figure. 5.11.	Comparative consumption control with designed despatcher....	91
Figure. 5.12.	Solar beam radiation at location 2	92
Figure. 5.13.	Crude oil temperature variation with CSP system.....	93
Figure. 5.14.	Effect of crude oil production with solar irradiation.	93
Figure. 5.15.	Effect of cloudy days and irradiation on oil production.	94
Figure. 5.16.	Crude Oil treatment with CSP prototype.....	94
Figure. 5.17.	Growth studies of Chlorella at varying pH at location 3	95
Figure. 5.18.	CO ₂ absorption studies on industrial vent	96
Figure. 5.19.	(a) Algal growth at raceway pond (b) Dominant algae	96
Figure. 5.20.	Average cumulative biogas production during pilot study.....	97
Figure. 5.21.	Alternate options for crude oil heating.....	98
Figure. 5.22.	Comparison of required heat by NG, PV, Biogas Hybrid.....	101
