CHAPTER 1	1
INTRODUCTION	1
1.1 Background	1
1.2 Thermal decomposition of methane	2
1.3 Types of pyrolytic carbon and their importance	4
1.4 Various manufacturing processes of pyrocarbon	6
1.5 Advantages of CVD over another manufacturing process	10
1.6 CVD of pyrocarbon (PyC)	11
1.6.1. A sequence of events during CVD of PyC	12
1.6.2. Types of CVD	13
1.6.3. Critical components in CVD	18
1.6.4. Advantage of vertical over horizontal CVD reactor	19
1.7 Importance of CFD in designing CVD reactor:	20
1.8 Techniques used for optimisation of CVD	21
1.9 Machine learning	23
1.10 Support vector machines (SVM)	24
1.11 Objectives of the thesis	25
1.12 Thesis organisation	26
CHAPTER 2	33
LITERATURE REVIEW	33
2.1 History of the CVD processes	33
2.2 Modelling approaches in CVD	33
2.3 Literature based on pyrolysis of methane in CVD reactor	36
2.4 Use of machine learning (ML) in chemical processes	40
CHAPTER 3	46
CFD MODEL AND OPTIMISATION METHODOLOGY	46
3.1 Basic equation, assumptions, and properties estimation	46
3.2 Gas and surface reaction models	49
3.3 Boundary condition and solution procedure	51
3.3 Machine learning model for prediction of PyC deposition	54
3.4 Nelder-Mead algorithm	56
3.6 Objective function	58
CHAPTER 4	62
RESULTS AND DISCUSSION	62
4.1 Validation of simulation results	62
4.2 Effect of reactor temperature	62
4.3 Effect of operating pressure	66
4.4 Effect of total flow rate	69
4.5 Effect of CH ₄ mole fraction	71
4.6 Optimisation of the CVD reactor	74
CHAPTER 5	80

CONCLUSIONS AND FUTURE SCOPE	80
5.1 <i>Conclusions</i>	80
5.2 <i>Future Scope</i>	80
APPENDIX A.....	83
APPENDIX B.....	88
APPENDIX C.....	96
APPENDIX D.....	97
GLOSSARY	98
