## Table of Contents

---

---

Preface .....	i
Acknowledgements.....	v
List of Tables.....	vii
List of Figures .....	viii
<b>INTRODUCTION.....</b>	<b>(1-17)</b>
1.1 Introduction .....	2
1.2 Arc Welding Processes.....	3
1.3 Heat Affected Zone generation in welding .....	4
1.4 Arc Welding Process Variables.....	6
1.4.1 Primary Variables.....	7
1.4.2 Secondary Variables.....	8
1.5 Optimization of Process Parameters of Welded Joints .....	9
1.6 GMAW application for welding Steels.....	10
1.7 Characteristics of A572 and Stainless Steels .....	13
1.8 Differences between A572 gr. 50 steel and 316L Stainless steel: .....	15
1.9 Motivation/ Need for the research work .....	15
<b>LITERATURE REVIEW.....</b>	<b>(18-60)</b>
2.1 Introduction .....	19
2.2 Gas Metal Arc Welding (GMAW).....	20
2.2.1 GMAW Basic Welding Circuit .....	20
2.2.2 GMAW Welding Process parameters .....	21
a) Welding Current (I).....	22
b) Arc Voltage (V).....	23
c) Weld Speed/ Arc Travel Speed (s).....	24

d)	Shielding Gas and its flow rate (f) .....	27
e)	Heat Input (HI).....	32
2.2.3	Metal transfer in GMAW .....	38
a)	Short-Circuit Metal Transfer.....	38
b)	Globular metal transfer.....	39
c)	Spray Transfer.....	39
d)	Pulsed Current transfer.....	40
2.2.4	Heat Transfer and Metallurgical Changes in GMAW .....	41
2.2.5	Weld Metal and Heat Affected Zone .....	45
a)	Weld Metal (WM).....	46
b)	Heat Affected Zone (HAZ) .....	48
2.2.6	Heat treatment of Welded joints.....	53
2.2.7	Optimization in welding.....	56
2.2.8	Observation from literature review/ Research gap.....	59
2.2.9	Aim and Objectives of the present work.....	60
<b>MATERIALS AND METHOD.....</b>		<b>(61-74)</b>
3.1	Introduction .....	62
3.2	Research Methodology.....	62
3.3	Material Selection for Base Materials, Filler Wire and Shielding Gas.....	64
3.3.1	Base Materials A572 grade 50 .....	65
3.3.2	Base Materials 316L Stainless Steel .....	66
3.3.3	Filler Material.....	66
3.3.4	Shielding Gas .....	67
3.4	Fabrication of A572 grade 50 and 316L Stainless Steel .....	67
3.4.1	Finding the limits of the experiment through trial runs. ....	70

3.4.2	Finding the Levels of Experimentation .....	70
3.5	Characterization .....	72
3.5.1	Optical Metallography.....	72
3.5.2	Microhardness .....	73
3.5.3	Tensile Test .....	73
3.5.4	Scanning Electron Microscopy (SEM) .....	74
<b>RESULTS AND DISCUSSION.....</b>		<b>(75-153)</b>
4.1	Optimization of Process Parameters for A572 gr. 50.....	76
4.1.1	Evaluation of Signal to Noise (S/N) Ratio .....	78
4.1.2	Analysis of Variance (ANOVA).....	82
4.2	Heat Input effect on Welded joint of A572 gr. 50 .....	85
4.3	Macrostructural evaluations of A572 gr. 50.....	86
4.4	Microstructural evolution of A572 gr. 50 .....	90
4.4.1	Effect of Heat input .....	97
4.4.2	Effect of Welding current.....	103
4.4.3	Effect of Shielding Gas flow rate .....	104
4.4.4	Effect of welding speed.....	106
4.5	Mechanical Properties of A572 gr. 50 Weld joint .....	107
4.5.1	Hardness Distribution in HAZ and WB for A572 gr. 50 .....	107
4.5.2	Tensile Properties of A572 gr. 50 Weld joint .....	111
4.6	Optimization of 316L SS Weld joint using Taguchi's approach .....	116
4.6.1	Evaluation of Signal to Noise (S/N) Ratio .....	117
4.6.2	Analysis of Variance (ANOVA).....	121
4.7	Effect of Heat Input on 316L SS Weld joint.....	124
4.8	Macrostructural evaluations of 316L SS Weld joint.....	125

4.9	Microstructural evolution of 316L SS Weld joint.....	128
4.9.1	Effect of Heat input .....	132
4.9.2	Effect of Welding current.....	137
4.9.3	Effect of Shielding Gas flow rate .....	139
4.9.4	Effect of welding speed.....	141
4.10	Mechanical Properties of 316L SS Weld joint.....	142
4.10.1	Hardness Distribution in HAZ and WB for 316L SS.....	142
4.10.2	Tensile Properties of 316L SS Weld joint.....	147
	Summary.....	153
	<b>SUMMARY AND CONCLUSIONS.....</b>	<b>(154-160)</b>
5.1	Summary of thesis .....	155
5.2	Future Perspectives .....	159
