| <b>NOTATION .....</b>                                                                                                                                          | <b>xxxiv</b>  |
| <b>CHAPTER 1 . Introduction and Literature Review.....</b>                                                                                                     | <b>1</b>      |
| 1.1 Introduction.....                                                                                                                                          | 1             |
| 1.2 Machines for Ballast Cleaning & Handling .....                                                                                                             | 5             |
| 1.3 The main components of a typical Ballast Cleaning Machines .....                                                                                           | 6             |
| 1.4 Classification of BCM on Indian Railways tracks .....                                                                                                      | 7             |
| 1.5 Working Principle and Capabilities of BCM .....                                                                                                            | 8             |
| 1.6 Trial of En19 & En24 Steel for certain Parts of Indigenized maintenance<br>Machines .....                                                                  | 14            |
| 1.7 Challenges with German Standard part in India.....                                                                                                         | 15            |
| 1.8 En19 & its desirable properties in Railways .....                                                                                                          | 17            |
| 1.9 En24 & its Application in Indian Railway Maintenance Machines .....                                                                                        | 19            |
| 1.10 Inferences drawn from Literature Review.....                                                                                                              | 23            |
| 1.11 Objectives of the Thesis.....                                                                                                                             | 30            |
| <b>CHAPTER 2. Investigating microstructure and wear characteristics of alloy<br/>steels used as wear plates in ballast cleaning operation in railways.....</b> | <b>31</b>     |
| 2.1 Introduction.....                                                                                                                                          | 32            |
| 2.2 Materials and Methods used in Investigation .....                                                                                                          | 35            |
| 2.3 Pin-on-Disk Tribology for Wear Analysis .....                                                                                                              | 36            |
| 2.4 Wear Rate Calculations .....                                                                                                                               | 38            |

|       |                                            |    |
|-------|--------------------------------------------|----|
| 2.5   | Coefficient of Friction Calculations ..... | 39 |
| 2.6.1 | X-ray Diffraction (XRD) Analysis .....     | 40 |
| 2.6.2 | Optical Microstructure Analysis.....       | 41 |
| 2.6.3 | SEM Analysis .....                         | 43 |
| 2.7   | EBSD Analysis .....                        | 43 |
| 2.8   | Wear Rate and Hardness Evaluation .....    | 45 |
| 2.9   | Discussion.....                            | 49 |
| 2.10  | Conclusions .....                          | 50 |

### **CHAPTER 3. Mechanical & fracture behavior of Plasser & RDSO wear plate samples & their Comparative Analysis.....52**

|       |                                                          |    |
|-------|----------------------------------------------------------|----|
| 3.1   | Introduction.....                                        | 53 |
| 3.2   | Materials & Method .....                                 | 56 |
| 3.3   | Material Characterization .....                          | 57 |
| 3.4   | Tensile Properties .....                                 | 61 |
| 3.5   | FCGR (Fatigue Crack Growth Rate).....                    | 62 |
| 3.6   | J1C Test (Plane Stress Fracture Toughness) .....         | 63 |
| 3.7   | Load Point Displacement Curve.....                       | 64 |
| 3.8   | Fractography.....                                        | 64 |
| 3.9.1 | Effect of Alloying Element on Mechanical Properties..... | 66 |
| 3.9.2 | Fractography.....                                        | 67 |
| 3.10  | Conclusions .....                                        | 68 |

### **CHAPTER 4. Microstructural and Mechanical Properties of Boron Carbide (B4C) Coated RDSO Wear Plate Sample.....70**

|     |                                                                            |    |
|-----|----------------------------------------------------------------------------|----|
| 4.1 | Introduction.....                                                          | 71 |
| 4.2 | Boron Carbide (B4C) Powder Preparation.....                                | 72 |
| 4.3 | Processing of High Velocity Oxygen Fuel Coating of B4C on RDSO sample..... | 73 |
| 4.4 | Microstructural Properties of B4C Coated RDSO sample .....                 | 77 |
| 4.5 | Mechanical Behavior of B4C Coated RDSO & Uncoated RDSO sample....          | 80 |
| 4.6 | Conclusions .....                                                          | 84 |

|                                                                                                |            |
|------------------------------------------------------------------------------------------------|------------|
| <b>CHAPTER 5. AI Based Railway Track Detection system .....</b>                                | <b>86</b>  |
| 5.1 Introduction.....                                                                          | 87         |
| 5.2 Development of Track Monitoring & Inspection .....                                         | 90         |
| 5.3 System Architecture and Implementation Methodology .....                                   | 93         |
| 5.4 Data Collection and Processing Methodology .....                                           | 95         |
| 5.5 Neural Network Architecture and Training Methodology .....                                 | 96         |
| 5.6 Experimental Validation and Testing Procedures .....                                       | 101        |
| 5.7 System Performance Analysis .....                                                          | 101        |
| 5.8 Economic Impact and Operational Efficiency .....                                           | 106        |
| 5.9 Long-term Performance Analysis and System Reliability .....                                | 108        |
| 5.10 Comparative Analysis with Existing Technologies .....                                     | 109        |
| 5.11 Environmental Adaptability and Robustness .....                                           | 110        |
| 5.12 Future Implications and Development Potential .....                                       | 110        |
| 5.13 Conclusions .....                                                                         | 111        |
| <b>CHAPTER 6. Summary &amp; Future Scope .....</b>                                             | <b>114</b> |
| 6.1 Summary of the Thesis .....                                                                | 115        |
| 6.2 Future scope of Indian Railway Track Maintenance Machines & Track<br>Detection System..... | 119        |
| <b>REFERENCES .....</b>                                                                        | <b>122</b> |
| <b>LIST OF PUBLICATIONS .....</b>                                                              | <b>136</b> |
| <b>CONFERENCES AND WORKSHOPS ATTENDED.....</b>                                                 | <b>137</b> |
