LIST OF FIGURES	x
LIST OF TABLES.....	xv
LIST OF ABBREVIATIONS.....	xvi
PREFACE.....	xvii
Chapter 1 Introduction and Literature review.....	1
1.1 Diabetic wound: Silent Killer?.....	1
1.2 Wound Healing Mechanism.....	2
1.3 Diabetic Wound healing.....	5
1.4 Existing Solutions for Diabetic Wound Healing.....	6
1.5 Hydrogel as an Emerging Solution	8
1.6 Hydrogel: Basic Concept and Working	9
1.6.1 Features of Hydrogels.....	11
1.6.2 Applications of Hydrogels.....	12
1.6.3 Protein-based hydrogels	18
1.6.4 Amyloid Fibrils: Therapeutic Opportunity?.....	20

1.7 Scope of the thesis.....	22
Chapter 2 Methodology and Instrumentations.....	24
2.1 Methods and Materials.....	24
2.1.1 Materials used for Synthesis and other experiments of Hydrogels	24
2.1.2 Synthesis of Hydrogels.....	24
2.2 Physiochemical Characterization Techniques.....	26
2.2.1 Rheology.....	26
2.2.2 Scanning Electron Microscope (SEM).....	28
2.2.3 Fourier Transform Infra-Red Spectroscopy	30
2.2.4 Texture Analyser for Mechanical properties	32
2.2.5 Dynamic Light Scattering and Zeta Potential	34
2.2.7 UV Visible and Photoluminescence Spectroscopy	36
2.2.8 NMR Spectroscopy	37
2.2.9 Transmission Electron Microscopy	38
2.2.10 Bioprinter.....	40
2.2.11 Thermogravimetric Analysis	42
2.2.12 Swelling, degradation, and Water vapor transmission rate (WVTR) studies.....	43
2.2In vitro studies.....	45
2.3.1 MTT Assay.....	45
2.3.2 FDA/PI Assay.....	47
2.3.3 Hemolysis assay	48
2.3.4 Scratch assay	49
2.3.5 Antioxidant and antibacterial studies	50
2.3In vivo Studies	52
2.4.1 Diabetic Rat Model.....	52
2.4.2 Histopathological analysis.....	53
2.4.3 RNA extraction and real-time qPCR analysis	54
2.4.4 Biochemical Assay	55
2.4.5 Photoacoustic Imaging	56
2.5 Software	58
2.4 Statistical analysis	58

Chapter 3.....	59
3D Printable, injectable Amyloid-based composite Hydrogel of Bovine Serum Albumin-Aloe Vera for Rapid Diabetic Wound Healing	59
3.1 INTRODUCTION	60
3.2 RESULTS AND DISCUSSION	62
3.2.1 Morphology and Porosity	65
3.2.2 Rheological analysis.....	67
3.2.3 Chemical and Thermal Characterization	69
3.2.4 Mechanical strength.....	73
3.2.5 Fabrication and study of 3 D printed scaffold	74
3.2.6 Antioxidant and antibacterial properties	76
3.2.7 In vitro biocompatibility and wound healing assay.....	79
3.2.8 In vivo study	81
3.3 Conclusion	87
Chapter 4.....	89
Self-assembled Bioactive Protein-based amyloidogenic nanohydrogel dressing for rapid diabetic wound healing via enhanced angiogenesis and anti-inflammation.....	89
4.1 Introduction.....	90
4.2 Results and discussion	93
4.2.1 Formation of hydrogels	93
4.2.2 Gelation mechanism	94
4.2.3 Characterization of hydrogels.....	97
4.2.4 Rheological and Mechanical properties	100
4.2.5 3D printing of hydrogel	103
4.2.6 Antibacterial studies	103
4.2.7 <i>In vitro</i> studies	105
4.2.8 <i>In vivo</i> studies	108
4.2.9 Real-Time qRT-PCR analysis	110
4.2.10 Immunohistochemical staining analysis.....	111

4.3 Conclusion	113
Chapter 5.....	115
Conductive Hybrid Hydrogel of Carbon Nanotubes-Protein-Cellulose: In vivo Treatment of Diabetic Wound via Photothermal Therapy and Tracking Real-Time Wound Assessment via Photoacoustic Imaging.....	115
5.1 Introduction	116
5.2 Results and discussion	120
5.2.1 Characterization of CNT	120
5.2.2 Formation of hydrogels	120
5.2.3 Characterizations of hydrogels	121
5.2.4 Photothermal property, photothermal antibacterial and antioxidant activity	127
5.2.5 In vitro studies	130
5.2.6 In vivo study	132
5.2.7 Real time tracking via Photoacoustic imaging	135
5.2.8 Immunohistochemistry	136
5.3 Conclusion	139
Chapter 6.....	140
Conclusion and Future Scope	140
References.....	142
List of Publications	168
2.5 Conference/Workshop Attended during PhD.	170
