

TABLE OF CONTENTS

<i>List of Symbols & abbreviations</i>	<i>15</i>
<i>List of Figures</i>	<i>16</i>
<i>Synopsis</i>	<i>25</i>

1. Introduction **35-76**

1.1. Brief history of materials and its design

1.2. Metallic alloys and compounds

1.2.1. Traditional multicomponent alloys

1.2.2. Bulk metallic glasses

1.2.3. Mult principal elemental alloys

1.3. High Entropy Oxides

1.3.1. Thermodynamics

1.3.2. Structure

1.3.3. Properties

1.3.3.1. Mechanical properties

1.3.3.2. Functional properties

1.3.4. Fields of application

1.4. Objectives of the thesis

1.5. Reference

2. Materials and Methods **77-97**

2.1. Precursor metal oxides

- 2.2. Solid-state synthesis
- 2.3. X-Ray Diffraction
- 2.4. Scanning Electron Microscopy
- 2.5. Transmission Electron Microscopy
- 2.6. Electrocatalysis
- 2.7. Structure modelling and simulation
- 2.8. Reference

3. Composition modulation, strain minimization and oriented growth of phases in equimolar (CaCoFeMgNi) oxide **99-141**

- 3.1. Introduction
- 3.2. Materials and methods
- 3.3. Results
- 3.4. Discussion
 - 3.4.1. Phase, microstructure evolution and its stability
 - 3.4.2. Strain minimization and oriented intergrowth of phases
 - 3.4.3 Trade-off for free energy minimization
- 3.5. Conclusion
- 3.6. Reference

4. Local composition modulation and oriented inter-growth induced strain minimization in entropy stabilized (CoCuMgNiZn) oxide **143-179**

- 4.1. Introduction
- 4.2. Materials and methods

4.3. Results

4.4. Discussion

4.4.1. Single phase and uniform chemistry of (CoCuMgNiZn) ESO

4.4.2. Structural modulation and strain minimization

4.4.3. Thermodynamic implications and stability

4.5. Conclusion

4.6. Reference

**5. Structural modulation and oriented growth of rocksalt 181-213
and spinel phases in equimolar multicomponent
{Co(Cr/Mg)FeMnNi}-oxide and its derivatives**

5.1. Introduction

5.2. Materials and methods

5.3. Results

5.4. Discussion

5.4.1. Phase evolution, structural correlation between spinel and rocksalt

5.4.2. Oriented growth of spinel, rocksalt phases and its interface structure

5.4.3. Stabilization through energy minimization

5.5. Conclusion

5.6. Reference

**6. Structure-activity relationship for electrocatalysis in 215-233
rocksalt and spinel-based multicomponent oxides and
its derivatives**

6.1. Introduction

6.2. Experimental setup and sample preparation	
6.3. Results and discussion	
6.4. Conclusion	
6.5. Reference	
7. A unified picture	235-241
7.1. Thesis conclusion	
7.2. Scope for further research	
<i>Appendix-I: Simulated spot electron diffraction patterns</i>	243
<i>Appendix-II: Python code for XRD pattern simulation</i>	245
<i>List of publications</i>	249
<i>List of conference presentations</i>	251
