List of Figures	xiii
List of Tables	xix
Symbols and Abbreviations	xxi
Preface	xxiii
1 Introduction	1
1.1 Background	1
1.2 Overview	4
1.2.1 Linear Elastic Fracture Mechanics	6
1.2.2 Stress	9
1.2.3 Strain	10
1.2.4 Stress Intensity Factor	12
1.2.5 Modes of fracture	13
1.2.6 Crack Opening Displacements (COD)	15
1.2.7 Heat Flux Intensity Factor (HFIF)	15
1.3 Literature survey	16
1.4 Objectives	18
1.5 Procedure	19
1.6 Preliminaries	22
1.6.1 Fourier Integral Transform	23
1.6.2 Inverse Fourier Transform	24
1.6.3 Chebyshev Polynomial of the First kind	25
1.6.4 Jacobi Polynomials	26
1.6.5 Bessel Function	27
1.6.6 Integral Equations	27
1.6.6.1 Classification of Integral Equations	28
1.6.7 Singular Integral Equations	29

1.7	Methodology	30
1.7.1	An Expansion–Collocation Approach to the Numerical Solution of Singular Integral Equations	30
1.7.1.1	Chebyshev Polynomials [1]	31
1.7.1.2	Collocation points and approximate solution	31
1.7.2	Schmidt method	32
1.7.2.1	Procedure	33
1.7.3	Wiener-Hopf method	36
1.8	Thesis organisation	39
2	Interaction among offset cracks in orthotropic medium under thermo-mechanical loadings	43
2.1	Introduction	43
2.1.1	Background	43
2.1.2	Literature survey and Research gaps	44
2.1.3	Chapter organisation	45
2.2	Problem Formulation	46
2.2.1	Temperature Field	47
2.2.2	Displacements and Thermal Stresses	50
2.3	Solution Procedure	54
2.4	Integral Equations	57
2.5	Numerical Method	59
2.6	Results and Discussion	60
2.7	Conclusion	62
3	Interaction among cracks in composite materials under the anti-plane shear loading	65
3.1	Introduction	65
3.1.1	Background and Motivation	65
3.1.2	Literature survey	66
3.1.3	Chapter organisation	68
3.2	Formulation of problem	69
3.2.1	Governing equations	70
3.2.2	Boundary and continuity conditions	71
3.3	Solution of the problem	72
3.4	Stress intensity factors	76
3.5	Numerical results and discussion	77
3.6	Conclusion	79
4	Study of an interfacial semi-infinite crack in a composite structure	85
4.1	Introduction	85
4.1.1	Background	85

4.1.2	Literature survey and research gaps	86
4.1.3	Chapter organisation	89
4.2	Governing equations	90
4.3	Boundary conditions and problem formulation	91
4.4	Solution Procedure	96
4.4.1	W-H method for the solution of the problem	97
4.5	Results	101
4.5.1	Particular case	102
4.6	Numerical results and discussion	103
4.6.1	Validation	103
4.6.2	Results and discussion	103
4.7	Conclusion	106
5	Partially insulated cracks in orthotropic materials under steady state thermo-mechanical loadings	115
5.1	Introduction	115
5.1.1	Background	115
5.1.2	Literature survey and research gaps	117
5.1.3	Chapter organisation	119
5.2	Mathematical formulation of the problem	120
5.3	Solution procedure	124
5.3.1	Temperature field	127
5.3.2	Stress and displacements	129
5.3.3	Crack tip fields	131
5.4	Numerical Results and Discussion	135
5.4.1	Validity of numerical computation	135
5.4.2	Validation of the methodology	136
5.4.3	Discussion	137
5.5	Conclusion	142
6	Conclusion and future work	159
6.1	Conclusion	159
6.2	Limitations and Future works	163
