ACKNOWLEDGEMENTS .....	iv
INDEX.....	vi
CONTENT.....	vi
LIST OF FIGURES.....	xi
LIST OF TABLES .....	xiv
LIST OF ABBREVIATIONS .....	xvi
<b>Abstract .....</b>	<b>xix</b>
<b>Chapter 1.....</b>	<b>1</b>
<b>Introduction .....</b>	<b>1</b>
1.1 General.....	1
1.2 Noise Pollution .....	2
1.3 Impact of Traffic Noise on Health.....	5
1.4 Traffic Noise Pollution in Mid-Size Indian City .....	6
1.5 Background of Noise Modeling.....	8
1.6 Problem Statement.....	9
1.7 Research Objective .....	11
1.8 Scope of the Study .....	11
1.9 Organization of the Dissertation .....	12
<b>Chapter 2.....</b>	<b>15</b>
<b>Literature Review .....</b>	<b>15</b>
2.1 General.....	15
2.2 Development of Traffic Noise Model.....	15

2.3	Various Established Model Worldwide .....	17
2.3.1	FHWA approach .....	17
2.3.2	CoRTN approach .....	19
2.3.3	RLS-90 approach .....	20
2.3.4	ASJ approach .....	21
2.3.5	Son Road approach .....	22
2.3.6	CNOSSOS-EU approach .....	23
2.3.7	NORD 2000 approach .....	24
2.3.8	NMPB-routes approach .....	25
2.3.9	HARMONOISE approach .....	26
2.3.10	Conventional models .....	28
2.3.11	Literature on machine learning approach .....	30
2.3.12	Empirical modeling approach .....	34
2.3.13	Mathematical approach .....	34
2.4	Traffic Noise Study for Indian Scenario .....	35
2.5	Influential Attribute Affecting Traffic Noise .....	46
2.6	Traffic Noise Study on High Rise Residential Buildings .....	49
2.7	Vehicular Source Emission Model .....	59
2.8	Research Gap .....	64
2.8.1	For noise prediction model .....	64
2.8.2	For traffic noise study on vertical scale .....	66
2.8.3	For vehicular source emission model .....	68
<b>Chapter 3</b>	.....	<b>69</b>
<b>Instrumentation and Methodology</b>	.....	<b>69</b>
3.1	Instrument Details .....	69
3.1.1	Sound level meter .....	69
3.1.2	Speed gun .....	70
3.1.3	Weather station .....	71
3.1.4	Machine for evaluating roughness utilizing low-cost instrumentation .....	71
3.1.5	Camera .....	73

3.2	Methodology for Heterogeneous Road Traffic Noise Modeling at Mid-block Sections of Mid-sized City in India .....	73
3.2.1	Geographical location of study area .....	73
3.2.2	Data collection procedure.....	74
3.2.3	Applied machine learning algorithm.....	77
3.2.4	Method of developing the prediction model .....	79
3.3	Methodology for Vehicular Source Emission Model and Modified Highway Noise Model 83	
3.3.1	Research site.....	84
3.3.2	Methodology for data collection .....	85
3.3.3	Methodology for model development .....	88
3.3.4	Methodology for collection of highway traffic noise data .....	90
3.3.5	Methodology for modified highway traffic noise model development.....	91
3.4	Methodology for Measurement and Prediction of Road Traffic Noise at Different Floor Levels of Buildings in a Mid-size Indian City .....	93
3.4.1	Geographical location of study area .....	93
3.4.2	Case studies .....	94
3.4.3	Data collection procedure.....	94
3.4.4	Artificial neural network (ANN).....	98
<b>Chapter 4</b>	.....	<b>103</b>
<b>Heterogeneous Road Traffic Noise Modeling at Mid-block Sections of Mid-sized City in India .....</b>		<b>103</b>
4.1	General.....	103
4.2	Traffic Volume, Speed and Noise Study .....	103
4.3	Statistical Visualization of Prepared Dataset.....	116
4.4	Implementation of PCA .....	118
4.5	Result and Discussion.....	122
4.5.1	Results for <i>L</i> Aeq.....	122
4.5.2	Results for <i>L</i> 10 .....	125
4.6	Developed Computer-based Software for Predicting the Traffic Noise.....	128
4.7	Conclusion .....	129

4.8	Applicability and Limitation of Software .....	130
<b>Chapter 5</b>	.....	<b>131</b>
<b>Vehicular Source Emission Model and Modified Traffic Noise Prediction Model 131</b>		
5.1	General .....	131
5.2	Results and Discussion.....	132
5.2.1	Descriptive of <i>LAF</i> , max data.....	132
5.2.2	Vehicular source noise emission model for various vehicle category .....	133
5.2.3	Comparison of traffic volume, speed and noise .....	144
5.2.4	Modified highway noise model results.....	149
5.3	Conclusion .....	151
<b>Chapter 6</b>	.....	<b>153</b>
<b>Measurement and Prediction of Road Traffic Noise at Different Floor Levels of Buildings in a Mid-size Indian City..... 153</b>		
6.1	General .....	153
6.2	Road Traffic Information .....	153
6.3	Result and Analysis for Vertical Noise Propagation .....	155
6.3.1	Noise level variation across for heights.....	155
6.3.2	Frequency analysis.....	160
6.4	Result and Analysis of Traffic Noise Modeling for High rise Residential buildings 164	
6.4.1	Descriptive statistics .....	164
6.4.2	ANN Model Development.....	165
6.4.3	Prediction equation for <i>Leq</i> .....	168
6.4.4	Prediction equation for <i>L10</i> .....	170
6.4.5	Model performance.....	171
6.4.6	Garson algorithm .....	175
6.5	Discussion .....	177
6.6	Conclusion .....	179
<b>Chapter 7</b>	.....	<b>181</b>

<b>Conclusion</b> .....	<b>181</b>
7.1 General.....	181
7.2 Traffic Noise Modeling for Heterogeneous Traffic Flow in Mid-size Indian City	181
7.3 Vehicular Source Noise Emission Model and Modified Highway Noise Prediction Model	182
7.4 Measurement and Prediction of Road Traffic Noise at Different Floor Levels of Buildings in a Mid-size Indian City.....	183
7.5 Practical and Policy Implication.....	184
7.6 Limitations.....	187
7.7 Future Scope.....	189
<b>Chapter 8</b> .....	<b>191</b>
<b>References</b> .....	<b>191</b>
<b>List of Publications</b> .....	<b>209</b>
