COPYRIGHT TRANSFER CERTIFICATE.....	iii
ACKNOWLEDGEMENTS.....	iv
TABLE OF CONTENTS.....	vi
LIST OF TABLES	xi
LIST OF FIGURES	xiv
List of Abbreviations	xxiii
List of symbols.....	xxviii
Preface.....	xxxi
Chapter 1: Introduction & Literature Review	41
1.1 Introduction	41
1.2 Literature Review	47
1.2.1 Austenitic low-density steels	47
1.2.2 Strengthening by grain size refinement	56
1.2.3 Elastic modulus improvement.....	59
1.2.4 Strengthening by precipitation of α (B2)	62
1.2.5 Strengthening through electropulsing treatment.....	67
1.2.6 Ductilization through electropulsing.....	69
1.3 Objectives of the present investigation.....	71

Chapter 2: Materials and Methods	73
2.1 Introduction	73
2.2 Composition design	73
2.3 Alloy making	74
2.3.1 Thermomechanical & Heat treatment processes for P1&P2	76
2.3.2 Thermomechanical & Heat treatment processes for P3	78
2.3.3 Composition analysis	79
2.3.4 Electropulsing Treatment	80
2.4 Microstructural characterization	83
2.4.1 Optical microscopy	83
2.4.2 X-Ray Diffraction	83
2.4.3 Scanning Electron Microscopy	86
2.4.4 Transmission Electron Microscopy	87
2.5 Mechanical characterization	87
2.5.1 Hardness Test	87
2.5.2 Tensile Test	88
2.5.3 Fractography	90
2.5.4 Elastic modulus measurement	90
Chapter 3: Microstructure and Mechanical Properties of Austenitic Low-Density Steel	92
3.1 Introduction	92
3.2 Results	92

3.2.1	Phase diagram	92
3.2.2	Physical properties	94
3.2.3	Microstructural Characterization	94
3.2.4	Tensile properties	97
3.3	Discussion.....	98
3.3.1	Strengthening mechanisms and its contribution to yield strength	99
3.3.2	Work hardening behavior	100
3.4	Effect of cold rolling and repeated annealing (Thermal cyclic treatment)...	106
3.4.1	Results.....	106
3.4.2	Discussion	117
3.5	Conclusions	120
Chapter 4: Enhancement in modulus of elasticity by TiC reinforcement in austenitic low-density steel.....		
		123
4.1	Introduction	123
4.2	Results	123
4.2.1	Phase fraction Diagram.....	123
4.2.2	Physical Properties.....	124
4.2.3	Microstructural Characterization	125
4.2.4	Tensile Properties.....	130
4.3	Discussion.....	132
4.3.1	Physical properties	132
4.3.2	Carbon content analysis	132

4.3.3	Microstructure.....	133
4.3.4	Strengthening mechanisms and its contribution to yield strength	134
4.3.5	Work hardening behavior	136
4.4	Conclusions	141
Chapter 5: Microstructure and strengthening mechanisms in nickel added low-density duplex steel		
		142
5.1	Introduction	142
5.2	Results	142
5.2.1	Phase diagram and Phases	142
5.2.2	Optical microstructure	144
5.2.3	Phase analysis, size of crystal and crystalline defects	147
5.2.4	EBSD analysis	150
5.2.5	TEM microstructure.....	156
5.2.6	Tensile Properties.....	160
5.2.7	Fractography	164
5.3	Discussion.....	165
5.3.1	Microstructure.....	167
5.3.2	Mechanical properties.....	173
5.3.3	Comparison of tensile properties with automotive steels	182
5.4	Conclusions	185
Chapter 6: Strengthening and ductilization of low-density duplex steel by electropulsing treatment		
		188

6.1	Introduction	188
6.2	Effect of electropulsing on PD3-A	188
6.2.1	Results.....	188
6.2.2	Discussion.....	202
6.3	Effect of electropulsing treatment on PD3-AB ₃₀	223
6.3.1	Results.....	223
6.3.2	Discussion.....	236
6.4	Comparison between tensile and work hardening behavior of annealed, aged samples and of their electropulsed ones	239
6.5	Conclusions	241
Chapter 7: Summary of the present investigation and suggestions for future work		244
7.1	Summary of the present work.....	244
7.2	Suggestions for future work	247
References.....		248
