List of Figures	xii
List of Tables	xiii
Preface	xv
1 Introduction	1
1.1 Porous Media	1
1.1.1 Porosity	2
1.1.2 Permeability	2
1.2 Background of Porous Media	2
1.3 Diffusion	4
1.3.1 Application of Diffusion Equations	5
1.3.2 Reaction-advection diffusion equation	9
1.4 Fractional Calculus	11
1.4.1 The Fractal Integral	13
1.4.2 Riemann-Liouville derivative of Fractional Order	13
1.4.3 Caputo Derivative of Fractional Order	14
1.4.4 Some Properties of Fractional Operators	15
1.4.5 Kronecker Product	15
1.5 Some Numerical Methods for Solving Fractional Diffusion Problems	16
1.5.1 Non-Standard Finite Difference Method (NSFDM)	16
1.5.2 Spectral Collocation Method	17
2 A numerical approach based on Vieta-Fibonacci polynomials to solve fractional order advection-reaction diffusion problem	19
2.1 Introduction	19
2.2 Preliminaries and Definitions	23
2.2.1 Shifted Vieta-Fibonacci Polynomials	24
2.2.2 Shifted Chebyshev Polynomials of the Second Kind	26

2.3	Non-Standard Finite Difference Scheme	27
2.4	Approximation of Caputo Derivative for Fractional-Order	27
2.5	Solution of the Problem	29
2.6	Stability and Convergence Analysis	33
2.7	Numerical Results	38
2.8	Conclusion	48
3	A numerical approach to solve two-dimension fractional reaction advection diffusion equation of variable-order with Vieta-Lucas poly- nomials	51
3.1	Introduction	51
3.2	Properties of Shifted Vieta-Lucas Polynomials	56
3.3	Approximation of an Arbitrary Function	57
3.4	Construction of Operational Matrix	59
3.5	Discription of the Present Method	61
3.6	Convergence and Error Analysis	63
3.7	Examples and Discussion	69
3.8	Conclusion	76
4	An operational matrix approach to solve a two-dimension variable- order reaction advection diffusion equation with Vieta-Fibonacci polynomials	79
4.1	Introduction	79
4.2	Properties of Shifted Vieta-Fibonacci Polynomials	83
4.2.1	Approximation of an Arbitrary Function	83
4.2.2	The Operational Matrix for the Derivatives of Variable-Order	85
4.3	Discription of the Present Method	87
4.4	Error and Convergence Analysis	90
4.5	Numerical Examples and Discussion	97
4.6	Conclusion	107
5	Numerical study of the dynamics of travelling waves through fourth- order nonlinear time-space fractional sub-diffusion equations of variable- order	109
5.1	Introduction	109
5.2	Shifted Airfoil Polynomials and their Properties	114
5.3	Function Approximation	115
5.4	Construction of Operational Matrix for Variable Derivatives	116
5.5	Solution Methodology	119
5.6	Error and Convergence Analysis	122
5.7	Numerical Simulation	134

5.8 Conclusion	138
6 Conclusion and future work	139
6.1 Conclusion	139
6.2 Future Work	142
Bibliography	145
