COPYRIGHT TRANSFER CERTIFICATE

DECLARATION BY THE CANDIDATE

I, Nilesh Gajanan Bajad, certify that the work embodied in this Ph.D. thesis is my own bona fide work and carried out by me under the supervision of Prof. Sushil K. Singh from December, 2021 to June, 2025 at the Department of Pharmaceutical Engineering & Technology, Indian Institute of Technology (Banaras Hindu University), Varanasi.

The matter embodied in this Ph.D. thesis has not been submitted for the award of any other degree/diploma. I declare that I have faithfully acknowledged and given credit to the research workers wherever their works have been cited in my work in this thesis. I further declare that, I have not willfully copied any other's work, paragraphs, text, data, results, etc. reported in the journals, books, magazines, reports, dissertations, theses, etc., or available at websites and have not included them in this Ph.D. thesis and have not cited as my own work.

Date: 08.09.2025

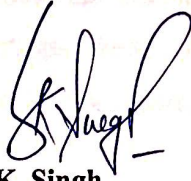

Place: IIT (BHU), Varanasi

Nilesh Gajanan Bajad

CERTIFICATE BY THE SUPERVISOR AND HEAD OF THE DEPARTMENT

It is certified that the above statement made by the student is correct to the best of our knowledge.

Prof. Sushil K. Singh
(Supervisor)

Head of the Department
विभागाध्यक्ष / Head
मेघजकीय अभियांत्रिकी एवं प्रौद्योगिकी विभाग /

CERTIFICATE

It is certified that the work contained in the thesis titled "Exploring the diagnostic and therapeutic potential of rationally designed and synthesized novel multifunctional ligands for Alzheimer's disease" by Mr. Nilesh Gajanan Bajad has been carried out under my supervision and that this work has not been submitted elsewhere for a degree.

It is further certified that the student has fulfilled all the requirements of Comprehensive Examination, Candidacy and SOTA for the award of Ph.D. Degree.

Date: 08.09.2025

Acknowledgements

*It is my privilege to express special reverence to **Bharat Ratna Mahamana Pt. Madan Mohan Malviya ji** for his untiring effort to create this holy place of study “Banaras Hindu University”.*

*I owe my deepest gratitude and I would like to record my sentiments of indebtedness to my respected supervisor **Prof. Sushil Kumar Singh**, for his constant support, guidance, patience, motivational thoughts, and encouragement throughout my research work. I am thankful for his insightful discussions and masterful work schedules to complete my thesis work within time frame.*

*I immensely express my profound gratitude to **Prof. Amit Patra**, Director, Indian Institute of Technology (Banaras Hindu University), Varanasi and Deans of the institute for providing the necessary amenities and sophisticated instrumental facilities for smooth conduct of research.*

*I would like to recognize and thank my Research Progress and Evaluation Committee (RPEC) members **Prof. Abha Mishra**, School of Biochemical Engineering, and **Dr. Shreyans Kumar Jain** of the department for valuable suggestions during evaluation of my research progress. I render my sincere thanks to **Prof. Brahmeshwar Mishra**, **Prof. Sanjay Singh**, **Prof. Sushant Kumar Shrivastava**, and **Prof. (Mrs.) S. Hemalatha**, former Heads of the Department and, **Prof. Sairam Krishnamurthy**, Head of the Department for giving me an opportunity to conduct research in the department and for providing necessary amenities required for my research work. I am also very much thankful to **DPGC members** for their support.*

*I sincerely thank **Dr. Ashok Kumar** for his valuable guidance and constructive suggestions throughout my Ph.D.*

*I would like to special thanks to **Prof. Sairam Krishnamurthy** and his lab members for support in performing in-vivo experiments.*

*I would like to keep on record my profound respect and sincere thanks to my respected teachers, **Prof. Senthil Raja A**, **Dr. Alakh N Sahu**, **Dr. S K. Mishra**, **Mr. A. K. Srivastava**, **Dr. (Mrs.) Ruchi Chawla**, **Dr. M. S. Muthu**, **Dr. Ashish K. Agrawal**, **Dr. Prasanta Kumar Nayak**, **Dr. Gyan Prakash Modi**, **Dr. Shreyans Kumar Jain**, **Dr. Vinod Tiwari**, **Dr. Rajnish Kumar**, **Dr. Deepak Kumar**, **Dr. Dinesh Kumar** and **Dr. Jairam Meena**.*

*I sincerely thank **Prof. Arindam Chowdhury** and his group, Department of Chemistry, IIT Bombay, for their guidance and laboratory support in evaluation of fluorescence lifetime measurements and in situ imaging of A β aggregation.*

*I am also thankful to **Prof. Madhu Tapadia** and her group, Department of Zoology, Banaras Hindu University, for their guidance, and facilities in fluorescence imaging of A β deposits in the *Drosophila AD* model.*

The support and the resources provided by PARAM Shivay Facility, Centre for computing and Information Services (CCIS) and Central Instrument Facility (CIF), IIT (BHU), Varanasi are gratefully acknowledged.

*I also thank all the non-teaching staff of the department for their assistance in using sophisticated instruments of the department. I would like to thank office staff of the department, **Mr. Yashwant Singh, Mr. Anand, Mr. Atul Gupta and** all others for their co-operation, frictionless approach in sending scholarship and contingency bills.*

*I gratefully acknowledge the **Ministry of Education, Government of India**, for the award of **Prime Minister's Research Fellowship** and providing financial assistance in the form of teaching assistantship (TA) and contingency grant to carry out the research work.*

*I am highly thankful to my lab senior, **Dr. Gopichand Gutti**, for his continues guidance and constant support during my research work. I would also like to thank the entire esteemed lab member in our group. It was good time to have wonderful past and present lab members, **Dr. Ankit Ganeshpurkar, Dr. Devendra Kumar, Dr. Rayala Swetha, Dr. Ravi Singh, Ms. Powsali Ghosh, Mr. Jatin Jangra, Mr. Mahesh Raut, Mr. Amit Ghosh, Mr. Chinmay** and all others for their extended help.*

*My heartiest thanks to my seniors and friends **Mr. Himanshu Rai, Dr. Akash Verma, Dr. Digambar Waikar, Dr. Anurag T. K. Baidya, Mr. Hansal Kumar, Mr. Gajendra TA, Dr. Manjeet, Mr. Abhinav Singh, Mr. Madhukiran DR, Mr. Sunil Kumar, Mr. Sanjay Dhakad.***

A special thanks to my family. Words cannot express how grateful I am to all my family members for all of the sacrifices that they made on my behalf and the continues support they provided to me. Most importantly, none of this would have been possible without the love and patience of my mother, father, grandmother and sister. They have been constant source of love, moral support, and strength all these years. I owe this achievement to them.

Finally, I thank everyone who came across my life like a passing cloud to shower happiness to my life.

List of figures

Figure No.	Description	Page No.
1.1	Schematic depiction of amyloid- β aggregation.	5
1.2	Schematic depiction of tau aggregation and formation of neurofibrillary tangles (NFTs).	6
1.3	A β_{1-42} Sequence with sub-regions formed through the amyloidogenic pathway.	8
1.4	Representation of the possible binding sites of A β_{1-42} protein.	8
1.5	Clinical drugs for the treatment of AD.	12
2.1	Chemical structures of recently reported classical push-pull architecture-based fluorescent probes.	15
2.2	Chemical structures of recently reported fluorescent probes, designed on the basis of different strategies.	18
3.1	Overview of the research objectives.	24
4.1	Molecular framework of design strategy of novel theranostic fluorescent probes.	28
4.2	(A) Lineweaver-Burk plot for the kinetic study of <i>ee</i> AChE inhibition by compound 39 (B) Dixon plot of compound 39 showing the K_i value as negative intercept on X-axis of the Dixon plot for AChE.	52
4.3	The absorption spectra and fluorescence emission spectra (A) of probe 39 in PBS (10% DMSO). The absorption spectra (B) and fluorescence emission spectra (C) of probe 39 in different solvents. Solid-state emission spectrum of probe 39 (D).	55
4.4	(A) ThT-fluorescence assay to confirm the formation of A β aggregates from A β monomers. (B) Emission spectra of probe 39 upon interaction with A β aggregates. (C) Binding constant of 39 toward the A β_{1-42} aggregates.	56
4.5	Fluorescence image of A β aggregates incubated with (A) ThT dye (emission filter: 435-485 nm, λ_{ex} : 405nm) and (B) probe 39 (emission filter: 590-700 nm, λ_{ex} : 488nm). Co-staining of A β aggregates with ThT and probe 39 imaged in (C) ThT channel (emission filter: 435-485 nm, λ_{ex} : 405nm) (D) Near IR channel (emission filter: 590-700 nm, λ_{ex} : 488nm) (E) Merged image of C and D.	57
4.6	Fluorescence lifetime measurement. (A) Decay curve of the probe 39 incubated with A β (red curve) and without A β (green curve) obtained from TCSPC (λ_{ex} : 440 nm). (B) Average lifetime image of the probe 39 alone (λ_{ex} : 440 nm, emission filter: 590-700 nm). (C) Average lifetime image of Probe 39	59

	incubated with A β aggregates (λ_{ex} : 440 nm, emission filter: 590-700 nm).	
4.7	Lifetime distribution and decay curve of Probe 39 with and without A β obtained from FLIM analysis.	59
4.8	Probe frontier molecular orbital.	60
4.9	Binding interaction mode of compound 39 with AChE (PDB: 4EY7).	62
4.10	Binding interaction mode of compound 39 with A β species (PDB: 5OQV).	62
4.11	Effect of compound 39 on organ toxicity.	63
4.12	Effect of compound 39 and DPZ on cognition enhancement in the scopolamine-induced amnesia model.	65
4.13	<i>Ex vivo</i> estimation of the effect of compound 39 on biochemical parameters	66
5.1	Molecular framework and design strategy of donor-acceptor architecture type theranostic fluorescent probes.	71
5.2	Absorbance spectra in DMSO (A) & PBS (B) and emission spectra in DMSO (E) & PBS (F) of indolium-based derivatives respectively. Absorption spectra in DMSO (C) & PBS (D) and emission spectra in DMSO (G) & PBS (H) of benzothiazolium-based derivatives, respectively	86
5.3	The fluorescence emission spectra of probes 22 (A) and 18 (B) in different solvents.	87
5.4	Change in fluorescence intensity of lead probes 22 (A) and 18 (B) upon interaction with A β ₁₋₄₂ species.	88
5.5	Binding constant of compounds 22 (A) and 18 (B) toward the A β ₁₋₄₂ aggregates.	88
5.6	Confocal projection of larval brain in <i>Drosophila</i> larval brain.	90
5.7	Effect of compound 18 on organ toxicity Histological analysis of major organs. (A–D) shows histological changes in the kidneys, liver, heart, and brain in the untreated control group. (E–H) illustrates the impact of compound 18 on histological changes in the kidneys, liver, heart, and brain, respectively.	91
5.8	Effect of compound 18 and DPZ on cognitive improvement in the scopolamine-induced amnesia model.	92
5.9	Novel object recognition test (A) Track plots & (B) Discrimination index between novel (N) and familiar (F) objects in control, scopolamine, and compound 18 treatment groups.	93
5.10	Effect of compound 18 on <i>ex vivo</i> biochemical parameters.	95
6.1	Strategy for design of multi-target-directed ligand for AD.	99
6.2	Effect of compound 41 on the A β ₁₋₄₂ aggregation inhibition.	127

6.3	(A) 3D and (B) 2D binding interaction of compound 41 with AChE active site.	128
6.4	(A) 3D and (B) 2D binding interaction of compound 41 with BACE1 active site (PDB ID: 2VKM).	129
6.5	Analysis of molecular dynamics studies of compound 41-AChE (4EY7) docked complex.	131
6.6	Analysis of molecular dynamics studies of compound 41-BACE-1 (2VKM) docked complex.	132
6.7	Effect of compound 41 on organ toxicity.	133
6.8	Effect of compound 41 on scopolamine induced cognition and memory impairment.	134
6.9	Effect of compound 41 on <i>ex vivo</i> biochemical parameters.	135
7.1	Design strategy of multi-target-directed ligand for AD.	139
7.2	Thioflavin T assay of compound 48 to assess the modulation of A β ₁₋₄₂ aggregation.	161
7.3	(A, C) Three-dimensional and (B, D) Two-dimensional binding mode of the compound 48 with active site of AChE (4EY7). (A,B: <i>R</i> and C,D: <i>S</i>).	163
7.4	Figure 7.4. (A) (A, C) Three-dimensional and (B, D) Two-dimensional binding mode of the compound 48 with active site of BACE-1 (PDB ID: 2VKM) (A,B: <i>R</i> and C,D: <i>S</i>).	163
7.5	MD simulation analysis of compound 48 (<i>R</i> - and <i>S</i> -form) with AChE (4EY7) docked ligand–protein complex.	165
7.6	Effect of compound 48 on organ toxicity.	166
7.7	Effect of compound 48 and DPZ on cognition enhancement in scopolamine-induced Y-maze amnesia model.	167
7.8	<i>Ex vivo</i> analysis of compound 48.	168
