

CONTENTS

Chapters	Titles	Page No.
	List of Figures	XIV
	List of Tables	XX
	List of Abbreviations	XXII
	List of Mineral Abbreviations	XXIV
	Preface	XXVI
Chapter – 1	Introduction	1-12
	1.1 General	1
	1.2 Scope of the Investigation	6
	1.3 Methodology	8
	1.4 Purpose of the Thesis	11
Chapter - 2	Literature Review	13-24
	2.1 General	13
	2.2 Previous work in the Chhotanagpur Granite Gneiss Complex	14
	2.3 Previous work in the Makrohar area	15
	2.4 Monazite dating	16
	2.5 Geothermobarometry	18
	2.6 Geochemistry	20
	2.7 Research gap	22
Chapter - 3	Geological Setting	25-54
	3.1 Introduction	25
	3.2 Classification	26
	3.3 Regional structure	38
	3.4 Tectonothermal events and geochronology of CGGC	39
	3.5 Geological setting around Makrohar area	42

	3.6 Stratigraphy	46
	3.7 Rock types and their field relations	48
	3.7.1 Migmatite gneiss and Granite gneisses	48
	3.7.2 Porphyritic granites and Pegmatites	48
	3.7.3 Gabbro-anorthosite rock	51
	3.7.4 Dolerite dykes	51
	3.7.5 Calc-silicate rocks	51
	3.7.6 Mafic granulites	53
	3.7.7 Pelitic granulites	53
	3.7.8 Amphibolites	53
Chapter - 4	Petrography	55-73
	4.1 Introduction	55
	4.2 Preparation of thinsection	56
	4.3 Petrography of the thin section	57
	4.3.1 Pelitic granulites	58
	4.3.2 Garnet bearing gneisses	61
	4.3.3 Mafic granulites	64
	4.3.4 Calc-silicate granulites	67
	4.3.5 Amphibolites	69
Chapter-5	Mineral Chemistry	74-119
	5.1 Introduction	74
	5.2 EPMA analytical technique	75
	5.3 Garnet	76
	5.4 Pyroxene	78
	5.4.1 Orthopyroxene	79
	5.4.2 Clinopyroxene	79
	5.5 Amphibole	80
	5.6 Cordierite	82

	5.7 Mica	83
	5.7.1 Biotite	84
	5.7.2 TiO ₂ content	86
	5.8 Feldspar	86
	5.9 Sillimanite	87
	5.10 Sphene, Clinozoisite and Ilmenite	88
	5.11 Monazite dating	88
	5.11.1 Introduction	88
	5.11.2 Analytical techniques	89
	5.11.3 Sample preparation and identification of monazite	91
	5.11.4 Electron microprobe dating	92
Chapter - 6	Geochemistry	120-131
	6.1 Introduction	120
	6.2 Major oxides Geochemistry	121
	6.3 Trace Element Geochemistry	121
	6.4 Rare Earth Elements Geochemistry	122
	6.5 Analytical techniques	122
	6.5.1 XRF and ICP-MS	123
	6.6 Metabasics	123
	6.6.1 Major oxides	123
	6.6.2 Trace and REEs	124
	6.6.3 Petrogenesis and tectonic implications	126
	6.6.4 Metabasics: Geochemical Insights	127
Chapter-7	Metamorphic Condition	132-169
PART – A:	Geothermometry and Geobarometry	132-140
	7.A.1 Introduction	132
	7.A.2 Thermodynamic Basis	132

	7.A.3 Presumption	133
	7.A.4 Geothermobarometers	134
	7.A.5 Errors in Geothermobarometry	135
PART – B:	Application of Geothermobarometers and Average P-T	141-154
	7.B.1 Pelitic granulites	141
	7.B.2 Garnet bearing gneiss	142
	7.B.3 Calc-silicate granulites	144
	7.B.4 Mafic granulites	145
	7.B.5 Amphibolites	147
PART – C:	Bulk composition modelling	155-169
	7.C.1 Application of equilibrium thermodynamic	155
	7.C.2 Pseudosection modeling	157
	7.C.3 Methodology	158
	7.C.4 Pelitic granulite	158
	7.C.5 Mafic granulite	162
	7.C.6 Calc-silicate granulite	165
	7.C.7 Garnetiferous amphibolite	166
Chapter - 8	Metamorphic Evolution	170-185
	8.1 Metamorphic condition	170
	8.1.1 Petrographic evidences	171
	8.1.1.a Pelitic granulite	171
	8.1.1.b Mafic granulite	172
	8.1.1.c Amphibolite	173
	8.1.2 Geochronological evidences	173
	8.1.3 P-T-t Path	175
	8.1.3a Pelitic granulite	177
	8.1.3b Mafic granulite	178

	8.1.3c Amphibolite	179
	8.2 Geodynamic condition	179
	8.3 The CGGC and supercontinent cycle	182
	8.3.1 Correlation with the Columbia supercontinent	182
	8.3.2 Correlation with the Rodinia supercontinent	184
Chapter - 9	Summary and Conclusion	186-198
	Scope for Future Work	199
	References	201-241
	List of publications	242
