Title of Thesis	i
Certificate	ii
Declaration by the Candidate & Certificate by the Supervisor(s)	iii
Copyright Transfer Certificate	iv
Preface	v-vi
Acknowledgement	vii
Contents	viii-xi
List of Figures	xi-xvi
List of Tables	xv
List of symbols/ Abbreviation	xvi

Chapter	Chapter Title	Page No.
CHAPTER 1	Introduction	2
1.1	Pollution	3
1.2	Water Pollution	3
1.3	Dyes	5
1.4	Components and Chemical Structure of Dyes	6
1.5	Classification of Dyes	8
1.6	Applications of Synthetic Dyes	11
1.7	Antibiotics	15
1.8	Applications of Antibiotics	16
1.9	Drawbacks of Antibiotics	17

1.10	Methods of pollutants removal from wastewater	18
1.10.1	Physical methods	18
1.10.2	Chemical methods	19
1.10.3	Biological methods	20
1.11	Economic considerations and combining approach	20
1.12	Adsorbents	21
1.13	Adsorption	27
1.14	Adsorption kinetics	28
1.15	Objective	31
1.16	References	32-55
CHAPTER 2	Literature Review	56
2.1	Polyaniline based composite used for dye removal	59
2.2	Polyaniline based composite used for antibiotic removal	87
2.3	PANI/Sand used for dye removal	93
2.4	Sugarcane bagasse used for dye removal	96
2.5	Research gap	116
2.6	References	118-141
CHAPTER 3	Novel Ganga-sand encapsulated polyaniline granules for effective remediation of textile and pharmaceutical wastewater	142
3.1	Introduction	143
3.2	Materials & Methods	146
3.2.1	Materials	146
3.2.2	Preparation of GS/PANI composite material	146
3.3	Batch Adsorption experiment	147

3.4	Adsorption kinetics	148
3.5	Results and discussion	150
3.5.1	Grain size distribution of Ganga sand	150
3.5.2	Optical microscopic image of GS and GS/PANI composite material	151
3.5.3	Powder XRD of GS and GS/PANI composite material	155
3.5.4	CHN elemental analysis of GS and GS/PANI composite material	156
3.5.5	FTIR of GS and GS/PANI composite material	157
3.5.6	Adsorption of MB dye and DXN antibiotic on GS/PANI composite	158
3.5.7	Effect of adsorbent dose	158
3.5.8	Effect of pH	160
3.5.9	Effect of contact time	161
3.5.10	Effect of the initial dye concentration	162
3.6	Adsorption kinetics and isotherm models	164
3.7	Conclusion	168
3.8	References	168-173
CHAPTER 4	Low-cost chemically treated sugarcane bagasse for removal of cationic, anionic, and neutral dyes from aqueous solution	174
4.1	Introduction	175
4.2	Materials and Methods	178
4.2.1	Materials	178
4.3	Adsorbent synthesis	178

4.4	Adsorption experiments	178
4.4.1	Adsorption kinetics	179
4.4.2	Adsorption isotherm	180
4.5	Adsorbent fabrication cost analysis	181
4.6	Characterization techniques	181
4.7	Results and Discussions	181
4.7.1	Characterization studies	181
4.8	Adsorption experiments	186
4.8.1	Effect of adsorbent dose	186
4.8.2	Effect of pH	187
4.8.3	Effect of Contact Time	188
4.8.4	Effect of the Initial Dye Concentration	189
4.9	Adsorption Kinetics and isotherm models	190
4.10	Conclusions	194
4.11	References	195-202
CHAPTER 5	Summary and Future Scope	203
5.1	Summary	204
5.2	Future scope	207
5.3	List of Publication and conferences	208
	Publications	209
	Conferences	209
