DECLARATION BY THE CANDIDATE.....	ii
COPYRIGHT TRANSFER CERTIFICATE.....	iii
ACKNOWLEDGEMENT	iv
TABLE OF CONTENTS.....	xi
LIST OF TABLES	xvii
LIST OF FIGURES	xix
ABBREVIATIONS	xxiv
ABSTRACT.....	xxix
CHAPTER 1. INTRODUCTION.....	1
1.1 Preamble.....	1
1.2 Status of WMA Technology In India	4
1.3 Need for the Research.....	6
1.4 Significance of the Research	11
1.5 Goals and Objectives of the Research	12
1.6 Scope of the Present Research.....	14
1.7 Organisation of Thesis.....	15
CHAPTER 2. WARM MIX TECHNOLOGY: STATE-OF-THE-ART	19
2.1 Preamble	19
2.2 History of Warm Mix Asphalt Development	20
2.3 Various WMA Technologies.....	24
2.3.1 Foaming Technology	29
2.3.2 Organic Additives	34
2.3.3 Chemical Additives.....	41
2.4 Benefits and Limitations of WMA Technologies.....	47
2.4.1 Environmental Benefits.....	48
2.4.2 Production Benefits.....	50

2.4.3	Paving Benefits	51
2.4.4	Economic Benefits	52
2.4.5	Limitations of WMA technology	53
2.5	Mixing and Compaction Temperature.....	54
2.5.1	Various Approaches to Estimate Production Temperatures: A Critical Review.....	56
2.5.2	Review on the Suitability of Workability Approach for WMA Technology	62
2.5.3	Global Overview of WMA Production Temperature Guidelines.....	65
2.6	Tribology as Emerging Science for Warm Mix Technology	68
2.6.1	Basics of Tribology and Tribo-system.....	70
2.6.2	Tribological Characterization of Asphalt Binders.....	72
2.6.3	Major Influencing Factors.....	82
2.6.4	Effect of WMA Additives on CoF	83
2.6.5	Relation of CoF with the Asphalt Binder and Mixture Properties	84
2.6.6	Future Opportunities in Tribology of Asphalt Binder.....	86
2.7	Physical Properties of WMA Modified Binders.....	88
2.8	Performance of WMA Modified Binders	89
2.8.1	Rutting Performance	89
2.8.2	Fatigue Performance	97
2.8.3	Moisture Sensitivity of WMA Modified Binders.....	99
2.8.4	Aging Potential of WMA Technology	104
2.9	Interaction of Polymer Modified Binder with WMA technology	109
2.10	Field Project on WMA Technology	112
2.11	Summary.....	117
2.12	Research Gaps	120
CHAPTER 3. MATERIALS AND RESEARCH METHODOLOGY		123
3.1	Preamble	123
3.2	Phase 1: Material Section	125
3.2.1	Selection of Asphalt Binder	125
3.2.2	Selection of WMA Additives.....	126

3.2.3	Physical Properties of WMA Additives	132
3.2.4	Aggregates.....	133
3.3	Phase 2: Preparation of WMA Modified Asphalt Binders	140
3.4	Phase 3: Development of Experimental Program.....	142
3.4.1	Basic characterization of WMA Modified Binders.....	144
3.4.2	Results of Basic Properties of WMA Modified Binders.....	148
3.4.3	Determination of Mixing and Compaction Temperatures.....	155
3.4.4	Tribological Assessment of WMA Modified Binders	157
3.4.5	Validation of Tribology Based Approach	158
3.4.6	Aging of WMA Modified Binders	162
3.4.7	Fourier Transform Infrared Spectroscopy (FTIR) Test.....	166
3.4.8	Performance of WMA Modified Binders.....	169
3.5	Phase 4: Strategy for Selection of WMA Additives.....	177
3.6	Summary.....	178
CHAPTER 4. DETERMINATION OF MIXING AND COMPACTION TEMPERATURES OF WMA TECHNOLOGY: CONVENTIONAL APPROACHES.....		181
4.1	Preamble	181
4.2	Methodology.....	183
4.3	Phase 1: Determination of MT and CT Using RV	184
4.4	Phase 2: Determination of MT and CT Using DSR	190
4.5	Results and Discussion	192
4.5.1	Phase 1: Determination of MT and CT Using RV	192
4.5.2	Phase 2: Determination of MT and CT Using DSR.....	197
4.5.3	Drawback of Phase Angle Method for Organic and Chemical Additives.....	201
4.6	Summary.....	203
CHAPTER 5. TRIBOLOGICAL ASSESSMENT OF WMA TECHNOLOGY.....		205
5.1	Preamble	205
5.2	Review of Tribological Studies Related to WMA Technology.....	207
5.3	Methodology.....	209

5.4	Materials	211
5.5	Phase 1: Determination of MT and CT using RV and Tribology Test.....	213
5.5.1	Rotational Viscometer Test.....	213
5.5.2	Tribology Test.....	213
5.6	Phase 2: Validation Using Workability, Coating ability, Compactibility test.....	220
5.6.1	Background, Need and Development of Workability Prototype.....	220
5.6.2	Validation of Tribology Approach Using Coating Ability and Compactibility Test....	227
5.7	Results and Discussion: Phase 1.....	232
5.7.1	Rotational Viscometer Test.....	232
5.7.2	Tribology Test.....	234
5.8	Phase 2: Validation of Tribological Approach	257
5.8.1	Workability Test.....	257
5.8.2	Validation of MT and CT of Tribology Approach Using Phase Angle Method.....	270
5.8.3	Validation of MT and CT using Coating Ability and Compactibility test	273
5.9	Summary.....	278
CHAPTER 6. PERFORMANCE OF WMA MODIFIED BINDERS.....		281
6.1	Preamble	281
6.2	Scope for Performance Assessment of WMA Modified Binders.....	287
6.3	Materials	290
6.4	Experimental Investigation.....	290
6.4.1	Determination of MT and CT of WMA Modified Binders.....	290
6.4.2	Aging of WMA Modified Binders	291
6.4.3	Fourier Transform Infrared Spectroscopy (FTIR) Test.....	291
6.4.4	Performance Test on WMA Modified Binders	292
6.5	Results and Discussion	294
6.5.1	Aging Resistance of WMA Modified Binders Using FTIR test	294
6.6	MSCR Results	301
6.6.1	J_{nr} of WMA Modified Asphalt Binders.....	301
6.6.2	Percent Recovery of WMA Modified Binders.....	306

6.6.3	Grading of WMA Modified Binders.....	307
6.7	LAS Results.....	310
6.7.1	Strain Response Curve	310
6.7.2	Fatigue Law Parameters and Fatigue Life.....	314
6.8	BBS Test Results.....	323
6.8.1	Effect of Base Binder and Aggregate Source on POTS and BSR.....	324
6.8.2	Effect of Warm Mix Additive on POTS and BSR	326
6.8.3	Establishing Threshold Limit for BSR:.....	335
6.9	Summary.....	336
CHAPTER 7. DOSAGE OPTIMISATION AND SELECTION OF WMA ADDITIVES.....		339
7.1	Preamble	339
7.2	Scope and Objectives.....	340
7.3	Statistical Analysis	341
7.3.1	Aging.....	342
7.3.2	Non-Recoverable Creep Compliance and % Recovery	345
7.3.3	Fatigue Life	347
7.3.4	Bond Strength Test Parameters (Dry POTS, wet POTS, and BSR).....	349
7.4	Selection of Optimum Dosage of WMA additives.....	352
7.4.1	Ranking for Optimum Dosage of WMA Additives	353
7.5	Selection of WMA Additives	359
7.5.1	Location 1 (Prone to Rutting).....	360
7.5.2	Location 2 (Prone to Fatigue Cracking)	360
7.5.3	Location 3 (Prone to Moisture Damage).....	360
7.5.4	Location 4 (Environment Friendly).....	361
7.5.5	Ranking for Optimum Dosage of WMA Additives	361
7.6	Summary.....	365
CHAPTER 8. CONCLUSIONS AND RECOMMENDATIONS.....		367
8.1	Preamble	367
8.2	Conclusions	367

8.2.1	Physical Properties of WMA Modified Binders	367
8.2.2	Production Temperatures Using Conventional Approaches	368
8.2.3	Tribology of WMA Modified Binders	368
8.2.4	Performance of WMA Modified Binders.....	369
8.2.5	Dosage Optimisation and Selection of WMA Additives	371
8.3	Application of the Study.....	372
8.4	Future Recommendations	372
