Title of the Thesis	i
Certificate	ii
Declaration by the candidate	iii
Certificate by the supervisor	iv
Copyright transfer certificate	v
Dedication	vi
Acknowledgment	vii-ix
Contents	x-xiii
List of figures	xiv-xvi
List of tables	xvii
List of abbreviations	xviii-xix
Preface	xx-xxii

CHAPTER - 1 INTRODUCTION AND REVIEW OF LITERATURE

1-36

Section	Title	Page Number
1.1	Water: a natural resource	1
1.1.1	Types of water	2
1.2	Groundwater pollution	5
1.3	Water pollution by fluoride and nitrate: distribution, sources, and health implications	6
1.3.1	Fluoride contamination in drinking water	6
1.3.1.1	Sources of fluoride in water	8
1.3.1.2	Global and Indian scenario of fluoride contamination in water	9
1.3.1.2.1	International status of fluoride contamination in water	9
1.3.1.2.2	Indian status of fluoride contamination of groundwater	10
1.3.1.3	Health effects of consuming fluoride-rich water	13
1.3.2	Nitrate contamination in drinking water	17
1.3.2.1	Sources of nitrate contamination in groundwater	19
1.3.2.2	Global and Indian scenario of nitrate contamination in water	21
1.3.2.2.1	International status of nitrate contamination in water	21
1.3.2.2.2	Indian status of nitrate contamination of groundwater	22
1.3.2.3	Human health risks from nitrate contamination in drinking water	25
1.4	Techniques for eradicating ionic impurities from water	26
1.4.1	Advantage of adsorption for Fluoride and Nitrate Removal	31
1.4.3	Adsorbents used in fluoride and nitrate remediation	32
1.5	Biochar	33

Section	Title	Page Number
1.5.1	Production of Biochar	33

CHAPTER - 2 MATERIALS AND METHODS **37-51**

Section	Title	Page Number
2.1	Introduction	37
2.2	Materials	37
2.3	Synthesis of biochar's	39
2.3.1	Precipitation method of synthesis	40
2.3.2	Ball milling method for biochar modification	40
2.4	Characterization	42
2.4.1	Determination of zero-point charge (pH_{pzc}) of the adsorbent	42
2.4.2	Thermogravimetric analysis (TGA)	42
2.4.3	Scanning electron microscopy (SEM) analysis	43
2.4.4	xray diffraction technique (XRD)	43
2.4.5	X-ray photoelectron spectroscopy (XPS)	44
2.4.6	Fourier-transform infrared (FT-IR) spectroscopy	44
2.4.7	Brunauer-emmett-teller (BET) surface area analysis	45
2.5	Experimental procedure	45
2.5.1	Batch adsorption experiments	45
2.5.2	Adsorption kinetics models	46
2.5.3	Adsorption isotherms models	48

CHAPTER - 3 STUDIES ON ADSORPTIVE REMOVAL OF FLUORIDE USING CeO₂/BC **52-76**

Section	Title	Page Number
3.1	Introduction	52
3.2	Methodology and experimental	54
3.2.1	Preparation of ceo ₂ -loaded biochar	54
3.2.2	Characterization of CeO ₂ /BC	54
3.2.3	Fluoride batch adsorption experiments	54
3.2.4	Reusability test of synthesised adsorbent	55
3.3	Biochar sample characterisation	56

Section	Title	Page Number
3.3.1	SEM and EDX analysis	56
3.3.2	XRD analysis	57
3.3.3	BET analysis	58
3.3.4	FTIR analysis	59
3.3.5	pHPZC analysis of CeO ₂ /BC	60
3.4	Batch adsorption studies	62
3.4.1	Pre adsorption test and Effect of cerium loading on adsorption	62
3.4.2	Effect of optimum adsorbent dose on fluoride adsorption	62
3.4.3	Effect of initial pH of solution on fluoride adsorption	63
3.4.4	Effect of counterions on CeO ₂ /BC	63
3.4.5	Effect of contact time on adsorption	64
3.4.6	Kinetic study of fluoride adsorption	65
3.4.7	Effect of initial concentration of fluoride on adsorption	67
3.4.8	Isotherm study of fluoride adsorption	67
3.4.9	Thermodynamic study of adsorbent CeO ₂ /BC	70
3.5	Reusability test	70
3.6	Adsorption mechanism	72
3.7	Conclusion	76

CHAPTER- 4 Stabilization of CeO₂/BC with pre-treated biochar for nitrate removal
77-94

Section	Title	Page Number
4.1	Introduction	77
4.2	Methodology and experimental	79
4.2.1	Pre- Treatment of Raw biochar	79
4.2.2	Stabilization of Cerium oxide on pre-treated biochar	79
4.2.3	Characterization of CeO ₂ /BC	80
4.2.4	Nitrate batch adsorption experiments	80
4.3	Biochar sample characterisation	81
4.3.1	XRD analysis	81
4.3.2	BET analysis	82
4.3.3	FTIR analysis	83
4.3.4	SEM analysis	85
4.3.5	Surface charge / Zeta potential measurement	86
4.4	Batch adsorption studies	87
4.4.1	Nitrate removal by Cerium supported on modified biochars	87
4.4.2	Effect of pH on Nitrate removal	88
4.4.3	Effect of contact time on adsorption and kinetic studies	90

Section	Title	Page Number
4.4.4	Effect of Initial Nitrate Concentration and Mechanistic Insights	92
4.5	Conclusions	94

CHAPTER - 5 STUDIES ON ADSORPTIVE REMOVAL OF FLUORIDE AND NITRATE USING CAO@CBC **95-118**

5.1	Introduction	95
5.2	Methodology and experimental	98
5.2.1	Preparation of ball milled EGWS modified biochar	98
5.2.2	Characterization of cao@CBC	99
5.2.3	Fluoride batch adsorption experiments	99
5.3	Biochar sample characterisation	100
5.3.1	TGA analysis	100
5.3.2	XRD analysis	100
5.3.3	BET analysis	101
5.3.4	FTIR analysis	102
5.3.5	SEM analysis	104
5.4	Batch adsorption studies	106
5.4.1	Influence of ph and phpzc results	106
5.4.2	Effect of contact time on adsorption and kinetic studies	107
5.4.3	Effect of concentration, isotherm and thermodynamic studies	110
5.5	Adsorption mechanism	115
5.6	Conclusions	118

CHAPTER - 6 Summary **119-123**

CHAPTER - 7 Suggestions for future work **124**

References **125-142**

List of publications **142-144**
