Abstract	v
List of Tables	xi
List of Figures	xiii
1 Introduction	1
1.1 Background	2
1.2 Motivation	6
1.2.1 Defence strategies	11
1.3 Objectives	14
1.4 Thesis organization	18
2 State estimation in power grid and false data injection attack	21
2.1 Introduction	21
2.2 Power system modeling	24
2.3 Linear state estimation	26
2.4 Nonlinear state estimation for IEEE 14 bus system	29
2.5 Bad data detection	29
2.6 FDIA on nonlinear state estimation algorithm	31
2.7 FDIA on linear state estimation algorithm	32
2.8 Summary	33
3 Reduced-rank based approaches for false data injection attack	35
3.1 Introduction	35
3.2 Preliminaries	35
3.3 Low-rank structure based attack vector formulation strategy	36

3.3.1	SVD based low-rank approximation	38
3.3.2	Low-rank approximation using CUR decomposition	39
3.3.3	Go-Dec based low-rank approximation	46
3.4	Results	50
3.4.1	Computational burden	52
3.5	Summary	54
4	Deep learning-based identification of false data injection attacks	55
4.1	Introduction	55
4.2	Proposed forecasting strategy	56
4.2.1	DNN based state forecasting model	56
4.2.2	LSTM based state forecasting model	58
4.3	Proposed anomaly detection scheme - I	60
4.4	Proposed anomaly detection scheme - II	63
4.5	Results	65
4.5.1	FDIA identification	66
4.5.2	Computational performance	69
4.6	Summary	70
5	A neural-network based identification and location detection of false data injection attacks	71
5.1	Introduction	71
5.2	Location identification of FDIA	73
5.2.1	Identification of intrusion Points	73
5.2.2	Proposed FDIA detection policy	73
5.2.3	Training strategy of the models	84
5.3	Results	86
5.3.1	Data set preparation	87
5.3.2	Structured FDIA Implementation	89
5.3.3	Noise in the measurements	89
5.3.4	Training and testing Data	89
5.3.5	Performance metrics for detection of intrusions of FDIA	91
5.3.6	Results for the IEEE 118-bus system	92

5.3.7	Presence identification performance	100
5.3.8	Presence and location identification using conventional machine learning classifier and traditional MLP model	103
5.4	Summary	104
6	Conclusions and future scopes	105
6.1	Conclusions	105
6.2	Future scope	107
	List of Publications	141
