<b>1 INTRODUCTION AND LITERATURE REVIEW</b>	<b>1</b>
1.1 Mathematical Modeling and its Applications . . . . .	1
1.2 Classical Fourier’s Law of Heat Conduction and its Drawback . . . . .	3
1.3 Modified Fourier’s Law of Heat Conduction . . . . .	5
1.3.1 Cattaneo-Vernotte (CV) Law of Heat Conduction . . . . .	5
1.3.2 Dual-Phase-Lag (DPL) Law of Heat Conduction . . . . .	6
1.4 Bio-Heat Transfer Models . . . . .	7
1.5 Thermoelasticity: Definition and Applications . . . . .	8
1.5.1 Classical Coupled Theory of Thermoelasticity and its Limitations	9
1.5.2 Generalized Thermoelasticity . . . . .	12

1.5.2.1	Lord-Shulman (LS) thermoelasticity theory . . . . .	13
1.5.2.2	Green-Lindsay (GL) thermoelasticity theory . . . . .	13
1.5.2.3	Green-Naghdi (GN) thermoelasticity theory . . . . .	14
1.5.2.4	Dual-Phase-Lag (DPL) thermoelasticity theory . . . . .	15
1.5.2.5	Three-Phase-Lag (TPL) thermoelasticity theory . . . . .	15
1.5.2.6	Moore-Gibson-Thompson (MGT) thermoelasticity theory	16
1.6	Two-Temperature Thermoelasticity . . . . .	16
1.7	Porosity Thermoelasticity . . . . .	18
1.8	Other Extended Thermoelasticity Theories . . . . .	19
1.9	Literature Review . . . . .	20
1.10	Objective of the Thesis . . . . .	33
<b>2</b>	<b>ON MGT THERMOELASTICITY: DOMAIN OF INFLUENCE RESULTS</b>	<b>35</b>
2.1	A Domain of Influence Theorem under MGT Thermoelasticity Theory .	35
2.1.1	Introduction <sup>1</sup> . . . . .	35
2.1.2	Basic Equations and Problem Formulation . . . . .	37
2.1.3	Main Results . . . . .	39
2.1.4	Conclusion . . . . .	48
2.2	A Domain of Influence Theorem for a Natural Stress-Heat-Flux Problem in the Moore-Gibson-Thompson Thermoelasticity Theory . . . . .	50
2.2.1	Introduction <sup>2</sup> . . . . .	50
2.2.2	Basic Equations and Problem Formulation . . . . .	50
2.2.3	Some Definitions . . . . .	53
2.2.4	Main Results . . . . .	54
2.2.5	Conclusion . . . . .	63
<b>3</b>	<b>SOME INVESTIGATIONS ON MOORE-GIBSON-THOMPSON THERMOELASTICITY THEORY</b>	<b>65</b>
3.1	On Propagation of Harmonic Plane Waves under the Moore-Gibson-Thompson Thermoelasticity Theory . . . . .	65
3.1.1	Introduction <sup>3</sup> . . . . .	65
3.1.2	Basic Equations and Problem Formulation . . . . .	67
3.1.3	Harmonic Plane Waves . . . . .	69
3.1.3.1	Dispersion relation and its derivation . . . . .	70
3.1.3.2	Expressions for attenuation coefficient and wave number	72
3.1.4	Analytical Results . . . . .	73

---

3.1.4.1	High-frequency asymptotic expressions . . . . .	74
3.1.4.2	Low-frequency asymptotic expressions . . . . .	75
3.1.5	Asymptotic Results for Different Wave Fields . . . . .	77
3.1.5.1	Phase velocity . . . . .	77
3.1.5.2	Specific loss . . . . .	78
3.1.5.3	Penetration depth . . . . .	79
3.1.6	Stability Analysis . . . . .	79
3.1.6.1	Stability analysis of plane waves in the MGT model . .	80
3.1.7	Numerical Results and Discussion . . . . .	82
3.1.7.1	Phase velocity . . . . .	83
3.1.7.2	Specific loss . . . . .	86
3.1.7.3	Penetration depth . . . . .	89
3.1.8	Conclusion . . . . .	91
3.2	Legendre Wavelet Collocation Method for Investigating Thermo-Mechanical Responses on Biological Tissue During Laser Irradiation . . . . .	95
3.2.1	Introduction <sup>4</sup> . . . . .	95
3.2.2	Basic Governing Equations . . . . .	96
3.2.3	Problem Formulation . . . . .	99
3.2.3.1	Boundary and initial conditions . . . . .	100
3.2.4	Variable Thermal Conductivity . . . . .	101
3.2.5	Legendre Wavelets . . . . .	105
3.2.5.1	Function approximation . . . . .	105
3.2.5.2	Convergence of Legendre wavelets . . . . .	106
3.2.6	Solution Method . . . . .	106
3.2.6.1	Time discretization . . . . .	107
3.2.6.2	Space discretization by Legendre wavelets . . . . .	109
3.2.7	Numerical Results . . . . .	112
3.2.7.1	Convergence and validation of the present numerical scheme . . . . .	113
3.2.7.2	Influence of variable thermal conductivity . . . . .	115
3.2.7.3	Influence of thermal relaxation parameters . . . . .	117
3.2.7.4	Responses at different instants of time . . . . .	119
3.2.7.5	Comparison between different models . . . . .	121
3.2.8	Conclusion . . . . .	123

<b>4</b>	<b>ON TEMPERATURE-RATE DEPENDENT TWO-TEMPERATURE THERMOELASTICITY</b>	<b>127</b>
4.1	Variational and Reciprocal Principles on the Temperature-Rate Dependent Two-Temperature Thermoelasticity Theory . . . . .	127
4.1.1	Introduction <sup>5</sup> . . . . .	127
4.1.2	Basic Equations and Problem Formulation . . . . .	130
4.1.3	Alternative Formulation . . . . .	133
4.1.4	Variational Theorem . . . . .	135
4.1.5	Reciprocity Theorem . . . . .	138
4.1.6	Conclusion . . . . .	141
4.2	Thermoelastic Interactions on Temperature-Rate Dependent Two-Temperature Thermoelasticity in an Infinite Medium Subjected to a Line Heat Source	143
4.2.1	Introduction <sup>6</sup> . . . . .	143
4.2.2	The Mathematical Model . . . . .	144
4.2.3	Formulation of the Problem . . . . .	145
4.2.4	The Governing Equations in the Laplace Transform Domain . .	147
4.2.5	Short-Time Approximation . . . . .	150
4.2.6	Analytical Results . . . . .	153
4.2.7	Analysis of the Analytical Results . . . . .	156
4.2.8	Numerical Results and Discussion . . . . .	157
4.2.9	Conclusion . . . . .	163
<b>5</b>	<b>ON GENERALIZED PORO-THERMOELASTICITY THEORY</b>	<b>165</b>
5.1	Variational Principle and Continuous Dependence Results on the Generalized Poro-Thermoelasticity Theory with One Relaxation Parameter	165
5.1.1	Introduction <sup>7</sup> . . . . .	165
5.1.2	Basic Equations and Problem Formulation . . . . .	167
5.1.3	Alternative Formulation . . . . .	172
5.1.4	Variational Theorem . . . . .	174
5.1.5	Continuous Dependence Result . . . . .	178
5.1.6	Conclusion . . . . .	186
5.2	Application of Legendre Wavelet Collocation Method to the Analysis of Poro-Thermoelastic Coupling with Variable Thermal Conductivity . .	187
5.2.1	Introduction <sup>8</sup> . . . . .	187
5.2.2	Basic Equations . . . . .	188
	5.2.2.1 Problem formulation: Application to a problem of layer	192

5.2.2.2	Initial and boundary conditions . . . . .	193
5.2.3	Solution Method . . . . .	194
5.2.3.1	Time discretization . . . . .	195
5.2.3.2	Space discretization by Legendre wavelets . . . . .	197
5.2.4	Numerical Results . . . . .	200
5.2.4.1	Verification of numerical results . . . . .	202
5.2.4.2	Effect of temperature-dependent thermal conductivity . . . . .	202
5.2.4.3	Effect of porosity . . . . .	204
5.2.4.4	Effect of thermal relaxation parameters . . . . .	205
5.2.5	Conclusion . . . . .	207
<b>6</b>	<b>SUMMARY OF THE THESIS AND FUTURE SCOPE</b>	<b>211</b>
6.1	Summary . . . . .	211
6.2	Future Scope . . . . .	217
	<b>BIBLIOGRAPHY</b>	<b>219</b>
	<b>APPENDICES</b>	<b>243</b>
	<b>PUBLICATIONS AND CONFERENCES</b>	<b>249</b>
