LIST OF ABBREVIATIONS	i
LIST OF SYMBOLS	ii
LIST OF FIGURES	iii
LIST OF TABLES	xii
PREFACE.....	xvi
Chapter 01: Introduction	1
1.1 Metallic Glass	1
1.2 Bulk Metallic Glasses.....	1
1.3 Concept of Glass Formation.....	2
1.4 Glass Forming Ability (GFA) and Glass Forming Criteria	5
1.5 Fabrication Technique and their Influences on Glass Formation and Properties.....	7
1.5.1 Preparation methods for Fe-based BMGs	7
1.5.2 Effects of Cooling rate on glass formation and properties	9
1.5.3 Effects of oxide impurities on glass formation and properties.....	10
1.6 Crystallization behaviour	13
1.6.1 Polymorphous Crystallization	13
1.6.2 Eutectic Crystallization	14
1.6.3 Primary Crystallization.....	15
1.7 Mechanical behaviour of MGs/BMGs.....	15
1.7.1 Plastic deformation	15
1.7.2 The free volume model	17
1.7.3 The Shear transformation zone (STZ) model.....	18
1.7.4 Shear bands in metallic glasses	19
1.7.5 Bulk metallic glass composites (BMGs composites).....	19
1.9 Applications	24
1.9.1 Soft magnetic materials	25
1.9.2 Structural materials.....	26
1.10 Objectives of the thesis	28
Chapter 02: Selection of Glass forming Fe-alloys based on empirical correlation	29
2.1 Introduction.....	30
2.2 Present Work.....	31
2.3 Computation of glass-forming parameters (e/a, V_R, R_R and K_F)	33
2.4. The e/a, V_R, and R_R criteria for BMGs.....	35

2.5. Role of G1, G2, and K_F	39
2.6. Alloy Compositions Selection	41
2.7. Conclusions	42
Chapter 03: Materials and Experimental Details	43
3.1 Introduction	44
3.2 Materials Systems	44
3.3 Materials Synthesis Techniques.....	45
3.3.1 Cu-mould casting Technique	46
3.3.2 Melt-spinning Technique.....	47
3.3.3 High-Energy Ball milling Technique.....	49
3.3.4 Spark plasma sintering (SPS) Technique	51
3.3.5 Heat Treatment: Annealing Experiment	52
3.4 Techniques used for Characterization	53
3.4.1 Density Measurement	53
3.4.2 Optical Microscopy (OM): Microstructure Analysis.....	53
3.4.3 X-ray Diffraction (XRD) Technique: Structural and phase Analysis	53
3.4.5 Scanning Electron Microscopy (SEM): Morphology and Elemental mapping.....	54
3.4.6 Transmission Electron Microscopy (TEM): Microstructure and phase Analysis	55
3.4.7 Differential Scanning Calorimetry (DSC): Thermal Characterization	57
3.4.8 Indentation Characteristics: Mechanical property Measurements.....	58
Chapter 04: Copper-Mould Casting of Alloys	59
4.1 Introduction.....	59
4.2 Experimental Procedure.....	60
4.3 Results	61
4.3.1 Density Measurement	61
4.3.2 Evolution of Microstructures	62
4.3.3 Structural and Phase Characterization: X-ray diffraction	64
4.3.4 Thermal Analysis of as-cast alloys.....	70
4.3.5 Nature of Indentation of as-cast alloy at different loads	71
4.3.6 Determination of Indentation Fracture toughness (K_{IC})	76
4.3.7 Determination of Yield strength (σ_0), Meyer's exponent (n), material constant (K) ...	77
4.5.8 Determination of Plastic criterion (R_w), and Percentage of Elastic recovery (%R).....	78
4.4 Discussions	81
4.4.1 Microstructure, Phase/Structure Analysis.....	81

4.4.2 Indentation Characteristics Analysis	82
4.5 Conclusions	84
Chapter-05: Melt-Spinning of Alloys	86
5.1 Introduction.....	86
5.2 Experimental Procedures	87
5.3 Results	89
5.3.1 Evolution of Microstructures	89
5.3.2 Structural and Phase Characterization: X-ray diffraction	90
5.3.3 Phase Analysis: Transmission Electron Microscopy (TEM).....	93
5.3.4 Morphology of melt-spun ribbon.....	96
5.3.5 Thermal behaviour Analysis	101
5.3.6 Nature of indentation of melt-spun ribbon at different load	102
5.3.7 Determination of Yield strength (σ_0), Meyer's exponent (n), material constant (K) .	107
5.3.8 Determination of Plastic criterion (R_w) and Percentage of Elastic recovery (%R)....	109
5.4 Discussion.....	111
5.4.1 Microstructure, Phase/Structure Analysis.....	111
5.4.2 Thermal Analysis	112
5.4.3 Indentation Characteristics Analysis	113
5.5 Conclusions.....	114
Chapter 06: Ball-Milling and Spark-Plasma Sintering of Alloys	115
6.1 Introduction.....	115
6.2 Experimental Procedure.....	116
6.3 Results	117
6.3.1 Density Measurement	117
6.3.2 Evolution of Microstructures	118
6.3.3 X-ray Diffraction Analysis of Ball milled Powder.....	119
6.3.4 X-ray Diffraction Analysis of SPSed alloys	124
6.3.5 Morphology of Ball milled Powder.....	127
6.3.6 Morphology of Sintered Alloy.....	129
6.3.7 Nature of Indentation of sintered alloys at different loads.....	137
6.3.8 Determination of Indentation Fracture toughness (K_{IC})	140
6.3.9 Determination of Yield strength (σ_0), Meyer's exponent (n), material constant (K) .	141
6.3.10 Determination of Plastic criterion (R_w) and Percentage of Elastic recovery (%R)..	143
6.4 Discussion.....	145

6.4.1 Microstructure, Phase/Structure Analysis	145
6.4.2 Indentation Characteristics Analysis	146
6.5 Conclusions	148
7.1 Summary	149
7.1.1 Synthesis and characterization of as-cast alloys	149
7.1.2 Glass/glass-nanocomposites formation in Fe-based alloys	150
7.1.3 Phase evolution and Indentation of Ball milled powder/ Pellets	150
7.2 Scope and suggestion for future work	151
ANNEXURE-I	152
References	162
