Abbreviations and symbols.....	iv-v
Preface.....	vi-vii
List of figures.....	vii-xi
List of tables.....	xii
1 Introduction.....	1
2 Literature review.....	6
2.1 Antimicrobial resistance	6
2.2 Factors contributing to the emergence of antibiotic resistance	7
2.2.1 Natural factor.....	7
2.2.2 Human factors.....	8
2.3 Mechanism of antibiotic resistance.....	9
2.4 Biofilm	12
2.4.1 Components of biofilm.....	12
2.4.2 Biofilm lifecycle	14
2.5 Burn wound.....	17
2.5.1 Classification of burn wound.....	18
2.6 Burn wound infection.....	19
2.6.1 <i>P. aeruginosa</i> biofilm in burn wound infection.....	20
2.6.2 <i>A. baumannii</i> biofilm in burn wound infection.....	21
2.6.3 <i>K. pneumoniae</i> biofilm in burn wound infection.....	21
2.6.4. <i>S. aureus</i> biofilm in burn wound infection	22
2.6.5. Polybacterial biofilms infection in burn wound	22
2.7 Bacteriophage.....	23
2.7.1 Mechanism of action.....	23
2.7.2 Bacteriophage as personalized therapy for bacterial wound infection	25
2.7.3 National status	26
2.7.4 International status.....	27
2.8 Challenges associated with phage therapy	28
2.9 Bacteriophage formulation.....	30

2.10	Chitosan	32
2.11	Bacteriophage microparticle	34
3	Objectives.....	36
4	Materials and Methods.....	38
4.1	Materials.....	38
4.2	Methods.....	40
4.2.1	Bacterial strain collection and antibiotic sensitivity test.....	40
4.2.2	Bacteriophage isolation, amplification, and purification.....	41
4.2.3	Bacteriophage characterization.....	43
4.2.4	Formulation development.....	47
4.2.5	Bacteriophage microparticle preparation.....	48
4.2.6	Microparticle incorporation into gel	49
4.2.7	Formulation characterizations	50
4.2.8	<i>In vitro</i> antibacterial studies.....	52
4.2.9	<i>In vivo</i> studies	55
4.2.10	Gel occlusion and bioimaging study.....	57
4.2.11	Stability studies.....	57
4.2.12	Statistical analysis.....	57
5	Results and discussions.....	58
5.1	Antibiotic sensitivity test	58
5.2	Bacteriophage isolation, amplification, and purification	63
5.3	Bacteriophage characterization	63
5.3.1	Plaque assay.....	63
5.3.2	Morphological evaluation of bacteriophage	64
5.3.3	Singular step growth curve	65
5.3.4	pH, temperature, and U.V. stability studies of bacteriophages.....	66
5.3.5	Hemocompatibility assay of bacteriophages	68
5.4	Formulations development and characterizations	69
5.4.1	Particle size, polydispersity, zeta potential, and entrapment efficiency	70
5.4.2	Gel characterization.....	71
5.4.3	Morphological evaluation of microparticles and gel	71
5.4.4	<i>In vitro</i> release study of bacteriophage.....	73

5.5	Antibacterial study	75
5.5.1	Minimum inhibitory concentration & minimum bactericidal concentration	75
5.5.2	Antibiofilm assay.....	76
5.5.3	Microscopy of biofilm	78
5.6	<i>In vivo</i> wound healing study	80
5.6.1	Wound healing studies on infection caused by <i>A. baumannii</i>	80
5.6.2	Wound healing studies on infection caused by <i>K. pneumoniae</i>	83
5.6.3	Wound healing studies on infection caused by poly bacterial strains	86
5.7	Gel occlusion and bioimaging study	92
5.8	Stability studies	94
6	Summary and Conclusions.....	96
6.1	Summary	96
6.2	Conclusions	98
7	References.....	101
8	Achievements.....	130
9	Annexures	134
