List of Notations, Symbols, and Abbreviations	xiv-xv
General Experimental Considerations	xvi
Preface	xvii

List of Titles

Chapter 1	Introduction	1-42
1.1	Introduction	1
1.2	Energy efficiency (visible light)	3
	1.2.1 Introduction: Mechanistic pathway of photoredox catalysis	4
	1.2.1.1 Photoredox catalysis (Electron transfer)	4
	1.2.1.2 Hydrogen atom transfer (HAT)	6
	1.2.1.3 Energy Transfer	7
	1.2.1.4 Electron donor-acceptor (EDA) complexes	7
1.3	Solvent-Free	8
1.4	Green approach for synthesis of nitrogen & sulfur-containing organic compounds	9
	1.4.1 Nitrogen & sulphur containing acyclic compounds	11
	1.4.1.1 Amines	11
	1.4.1.2 Amides	12
	1.4.1.3 Thioamides	13

	1.4.2 Nitrogen & sulphur containing five-membered cyclic compounds	15
	1.4.2.1 Pyrrole	15
	1.4.2.2 Thiophene	17
	1.4.2.3 Thiazoles	18
	1.4.3.1.1 Synthesis of 1,3-Thiazoles	19
	1.4.2.4 Thiadiazole	20
	1.4.2.4.1 Synthesis of 1,2,4-thiadiazoles by dimerization of thioamides	21
	1.4.3 Nitrogen & sulphur containing six-membered and fused heterocyclic compounds	22
	1.4.3.1 Pyridine	22
	1.4.3.2 Benzothiazole	24
	1.4.3.3 Benzimidazole	26
1.5	Objectives of Thesis Work	29
1.6	References	30
Chapter 2	A Novel Approach Towards Synthesis of Benzothiazole and Benzimidazole: Eosin Y Catalyzed Photo-Triggered C-S and C-N Bond Formation	43-81
2.1	Introduction	43
2.2	Results and Discussion	47
2.3	Controlled Experiments	52
	2.3.1 UV-Vis Absorption Experiment	53
	2.3.2 Stern-Volmer Fluorescence Quenching Studies	54
	2.3.3 ON-OFF Experiments	55
2.4	Proposed Mechanism	56
2.5	Conclusion	57
2.6	Experimental Section	58
2.7	Analytical Data	58
	2.6.1 General procedure for synthesis of compounds 3a-3t/4a-4i	58
2.8	Spectral Data of Few Products	71
2.9	References	77

Chapter 3	Visible-light-induced C-S bond formation in the synthesis of 2,4-disubstituted thiazoles through cascade difunctionalization of acetophenone: A greener approach	82-117
3.1	Introduction	82
3.2	Results and Discussion	87
	3.2.1 Optimization of reaction conditions	87
	3.2.2 Gram-scale synthesis protocol for 2,4-disubstituted thiazole	91
3.3	Controlled Experiments and Mechanistic Studies	92
	3.3.1 UV-Vis Absorption Experiment	93
	3.3.2 Stern-Volmer Fluorescence Quenching Experiments	94
	3.3.3 Light-Dark Cycle Experiment	95
3.4	Plausible Reaction Mechanism	95
3.5	Conclusions	96
3.6	Experimental Section	97
	3.6.1 General procedure for synthesis of 2,4-disubstituted thiazoles 3a-3r/4a-4l	97
3.7	Analytical Data [3a-3r/4a-4l]	97
3.8	Spectral Data of Few Products	108
3.9	HRMS Spectra	111
3.10	References	112
Chapter 4	Synthesis of thioamides from amides using Lawesson reagent in Solvent-free Conditions: A chromatography-free approach	118-150
4.1	Introduction	118
4.2	Results and Discussion	122
	4.2.1 Optimization of reaction conditions	122
	4.2.2 Gram-scale synthesis for thiobenzamide (3a)	130
4.3	Proposed mechanism	130
4.4	Conclusion	131
4.5	Experimental Section	132
	4.5.1 General procedure for the synthesis of thioamides derivatives	132
4.6	Analytical Data for (2a-2t/3a-3t)	132
4.7	Spectral Data of Few Products	139
4.8	References	145

Chapter 5	A-Chromatography-Free One-pot, two-step synthesis of 1,2,4-thiadiazoles from primary amides via thiolation and oxidative dimerization under solvent-free conditions: A greener approach	151-190
5.1	Introduction	151
5.2	Results and Discussion	155
5.3	Gram-scale synthesis of 1,2,4-thiadiazole (3a)	161
5.4	Controlled Experiments	162
	5.1.1 Mechanistic Studies	162
5.5	Proposed Mechanism	163
5.6	Conclusion	165
5.7	Experimental Procedure	165
	5.7.1 General procedure for the synthesis of thiadiazoles derivatives	165
5.8	Analytical Data	166
5.9	Spectra of few derivatives	175
5.10	HRMS Spectra of 3a, 4a and by-product A	184
5.11	References	186
Summary and Conclusions		191
